Die Salesforce Sharing-and-Visibility-Architect Prüfung Schulungsunterlagen von EchteFrage sind überprüfte Prüfungsmaterialien. Alle diesen Fragen und Antworten zeigen unsere praktische Erfahrungen und Spezialisierung.

Salesforce Certified Sharing and Visibility Architect Sharing-and-Visibility-Architect Prüfungsfragen mit Lösungen (Q76-Q81):

76. Frage

What is the best practice for testing sharing and visibility changes?

- A. Use Field Audit Trail to audit the field meta-data and visibility.
- B. Use Administrative and User reports to view the Active Users.
- **C. Use the Login As feature for a sample user in each role and profile.**
- D. Use the Sharing button to test Profile and Permission set changes.

Antwort: C

Begründung:

Explanation

The best practice for testing sharing and visibility changes is to use the login as feature for a sample user in each role and profile. This allows the tester to see exactly what the user can see and do in the org, and verify that the sharing settings are working as expected. The other options are either not comprehensive or not relevant.

77. Frage

A company intends bring work from anywhere culture in a bid to improve productivity. Their sellers use wide variety of devices with different form factors. The company currently uses one page layout to display opportunity record details to the sellers. The Regional Vice President of Seles is complaining about incorrect alignment of data in opportunity records, making it difficult for some sellers. Which steps are recommended to rectify this?

- A. Use a custom LWC override for Opportunity view action, identify form factor onLoad action and display relevant layouts

based on form factors.

- B. Use Dynamic Form to define different field sections applicable for different form factors of devices.
- C. Use a visualforce override for Opportunity view action, identify the form factor onLoad action and display relevant layouts based on form factors,

Antwort: B

78. Frage

At Universal Containers there is a team of auditors distributed through the organization that all need access to high-value Opportunities.

With a private sharing model, which two option should an architect recommend when designing a solution for this requirement? Choose 2 answers

- A. Put the auditors as the highest level of the role hierarchy.
- B. Create a criteria-based sharing rule to give access to the public group for high-value Opportunities.
- C. Create a public group and assign the Auditors to the group.
- D. Add the auditors to the default Opportunity Team.

Antwort: B,C

Begründung:

Explanation

Creating a criteria-based sharing rule to give access to the public group for high-value opportunities and creating a public group and assigning the auditors to the group are the best options to give access to high-value opportunities to a team of auditors distributed through the organization. Option A is incorrect, since putting the auditors as the highest level of the role hierarchy would give them access to all opportunities, not just high-value ones. Option B is incorrect, since adding the auditors to the default opportunity team would require manual configuration and maintenance

79. Frage

Universal Containers (UC) operates worldwide with offices in more than 100 regions in 10 different countries role hierarchy to control data visibility. In the new fiscal year, UC is planned to reorganize the roles and reassign accounts owners. Which two points should an architect consider in this situation?

Which two point should an Architect consider in this situation?

Choose 2 answers

- A. Using a temporary parking lot account to improve performance.
- B. Changing complex role hierarchy can cause a high level of sharing recalculation.
- C. Replacing Account records ownerships massively can cause data skew.
- D. Restricting the organization-sharing configurations to private.

Antwort: B,C

80. Frage

Universal Containers uses the Case object to track service tickets. They have implemented Case teams to allow multiple support representatives to manage the Cases. Which two "Filter by owner" options would the user see while creating a list view on the Case object? Choose 2 answers

- A. Public Groups
- B. Roles
- C. Queue
- D. My Case Teams

Antwort: C,D

Begründung:

Explanation

The user can filter by owner using Queue or My Case Teams options when creating a list view on the Case object, as these are related to the Case team feature
