

1z0-1080-25 German, 1z0-1080-25 Prüfungsinformationen

P.S. Kostenlose 2026 Oracle 1z0-1080-25 Prüfungsfragen sind auf Google Drive freigegeben von Pass4Test verfügbar:
<https://drive.google.com/open?id=16WHDNWHP8fXYPPCDjCrSCrQyvYA2Nmjs>

Wenn Sie IT-Industrie auswählen, wählen Sie nämlich die gutbezahlte Arbeit und bessere Aussichten. Deshalb wollen immer mehr Leute das IT-Zertifikat besitzen. Und heute nehmen immer mehr Leute an Oracle 1z0-1080-25 Zertifizierungsprüfung teil. Und wir Pass4Test bieten Kadidaten die echten Prüfungsfragen und -antworten mit günstigen Preisen und höher Qualität. Und Wir Pass4Test bieten Ihnen einjährigen kostenlosen Aktualisierungsservice. Und unsere 1z0-1080-25 Prüfungsunterlagen sind schon bereit. Wir Pass4Test sind der führende Lieferant der Prüfungsunterlagen. Wir haben die neuesten und die richtigsten Oracle 1z0-1080-25 Zertifizierungsunterlagen, nämlich die Prüfungsfragen und die Testantworten.

Oracle 1z0-1080-25 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Manage Rules: This section of the exam measures the skills of an EPM Consultant and covers designing and managing business logic using rules and rulesets to automate calculations.
Thema 2	Report on EPM data: This section of the exam measures the skills of a Planning Administrator and covers using reporting tools to analyze data stored in EPM applications.
Thema 3	Describe Planning modules: This section of the exam measures the skills of an EPM Consultant and includes identifying different modules like Financials, Workforce, Projects, and Capital.
Thema 4	Creating System Reports: This section of the exam measures the skills of a Planning Administrator and focuses on system-generated reports that provide insights into application activity.
Thema 5	Describe Planning features: This section of the exam measures the skills of an EPM Consultant and focuses on recognizing key Planning features that help organizations manage and analyze financial data efficiently.
Thema 6	Design forms and dashboards: This section of the exam measures the skills of an EPM Consultant and covers designing planning input forms and visual dashboards to support decision-making.
Thema 7	Import and export metadata into Planning: This section of the exam measures the skills of a Planning Administrator and involves understanding how to bring metadata in and out of Planning applications.
Thema 8	Design business rules and rulesets: This section of the exam measures the skills of an EPM Consultant and focuses on creating logic structures to perform calculations and automate processes in Planning.
Thema 9	Set up Planning and FreeForm Applications: This section of the exam measures the skills of a Planning Administrator and involves setting up Planning applications, including FreeForm apps, to support flexible planning and modeling needs.

Thema 10	• Set Up Planning Security: This section of the exam measures the skills of a Planning Administrator and includes provisioning user roles and assigning appropriate access rights across Planning artifacts and data.
Thema 11	• Manage Metadata and Data: This section of the exam measures the skills of a Planning Administrator and covers methods for loading and maintaining metadata and data in Planning.
Thema 12	• Explain required and user-defined dimensions; how dimension hierarchies impact Planning
Thema 13	• Introduction to Planning Modules: This section of the exam measures the skills of an EPM Consultant and introduces the available Planning modules, their integration, and use cases.
Thema 14	• Identify metadata and data load options: This section of the exam measures the skills of a Planning Administrator and introduces options available for importing and managing metadata and data within the system.
Thema 15	• Assign access permissions to artifacts and cells in Planning: This section of the exam measures the skills of a Planning Administrator and involves granting permissions to users for accessing specific Planning objects and data.
Thema 16	• Create Reports: This section of the exam measures the skills of a Planning Administrator and involves creating reports that summarize planning activities and outcomes.
Thema 17	• Provision users and groups. This section of the exam measures the skills of a Planning Administrator and covers how to manage user access by assigning them to appropriate roles and groups.
Thema 18	• This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.
Thema 19	• Set up and run data maps: This section of the exam measures the skills of a Planning Administrator and focuses on configuring and executing data maps to move data across plan types or applications.
Thema 20	• Create and manage navigation flows: This section of the exam measures the skills of an EPM Consultant and involves organizing navigation flows to simplify user interaction in Planning.

1z0-1080-25 Prüfungsinformationen - 1z0-1080-25 Übungsmaterialien

Auf unterschiedliche Art und Weise kann man verschiedene Zwecke erfüllen. Was wichtig ist, dass man welchen Weg einschlägt. Viele Leute beteiligen sich an der Oracle 1z0-1080-25 Zertifizierungsprüfung, um seine Lebens- und Arbeitsumstände zu verbessern. Wie alle wissen, dass es nicht so leicht ist, die Oracle 1z0-1080-25 (Oracle Planning 2025 Implementation Professional) Zertifizierungsprüfung zu bestehen. Für die Prüfung verwendet man viel Energie und Zeit. Traurigerweise haben sie die Oracle 1z0-1080-25 Prüfung noch nicht bestanden.

Oracle Planning 2025 Implementation Professional 1z0-1080-25 Prüfungsfragen mit Lösungen (Q52-Q57):

52. Frage

Which Mass Update form in Workforce allows you to update employee properties, job properties, or salary- related information?

- A. Process Updated Data
- B. Synchronize Defaults
- C. Process Data and Synchronize Defaults
- D. Synchronize Definitions

Antwort: D

Begründung:

In the Oracle Planning 2024 Workforce module, the Synchronize Definitions Mass Update form is the tool provided to update employee properties, job properties, or salary-related information in bulk. This form allows administrators to modify and synchronize metadata definitions across multiple employees or jobs efficiently, ensuring consistency in workforce planning data.

* D. Synchronize Definitions: This form enables updates to employee properties (e.g., status, department), job properties (e.g., job code, title), and salary-related information (e.g., salary basis, grade). It is designed to handle mass updates to metadata and ensure that changes are reflected across the Workforce model.

* A. Synchronize Defaults: This option is related to applying default assumptions or settings to data, not specifically for updating employee, job, or salary properties.

* B. Process Updated Data: This form focuses on processing data changes (e.g., recalculating costs after data entry), not on updating properties or definitions.

* C. Process Data and Synchronize Defaults: This is a combined action that processes data and applies defaults, but it does not specifically target updates to employee properties, job properties, or salary information.

The Synchronize Definitions form stands out as the correct choice because it directly addresses bulk updates to workforce metadata, aligning with the question's focus on properties and salary-related information.

References

* Oracle Enterprise Performance Management Cloud Documentation: "Managing Workforce - Mass Update Forms" (docs.oracle.com, updated 2024). Describes the "Synchronize Definitions" form as the tool for updating "employee properties, job properties, and salary-related information."

* Oracle Planning 2024 Implementation Study Guide: Confirms that "Synchronize Definitions" is the Mass Update form for modifying workforce metadata.

53. Frage

Which two features can help users create business rules?

- A. Add calculations by using preformed system templates, such as clearing data, copying data, aggregating data, and so on.
- B. Rules are represented graphically in a flow chart into which you can drag and drop components to design the rule.
- C. Design sophisticated rules that solve use cases that normal business rules cannot solve by using Groovy business rules.
- D. Add calculations in calculation script syntax by switching to Script Mode.

Antwort: A,C

Begründung:

In Oracle Planning 2024 Implementation, business rules are essential for automating calculations, data manipulations, and complex logic within the application. The platform provides multiple features to assist users in creating these rules efficiently, as outlined in the Oracle documentation. The two features that directly help users create business rules are:

* A. Add calculations by using preformed system templates, such as clearing data, copying data, aggregating data, and so on: Oracle Planning offers predefined system templates that simplify rule creation. These templates enable users to quickly implement common operations like clearing data, copying data between dimensions, or aggregating data without writing complex code from scratch. This feature is particularly useful for users who may not have advanced scripting skills, as it provides a guided, template-driven approach to rule design.

* C. Design sophisticated rules that solve use cases that normal business rules cannot solve by using Groovy business rules: Groovy business rules extend the capabilities of standard business rules by allowing users to write custom logic using the Groovy scripting language. This feature is designed for advanced use cases, such as dynamic calculations based on runtime conditions or complex data manipulations that go beyond the scope of traditional rules. It empowers users to address specialized business requirements efficiently.

* B. Add calculations in calculation script syntax by switching to Script Mode: While Script Mode exists and allows users to write calculations using a script-based syntax (e.g., Essbase calc scripts), it is not highlighted as a primary "feature" for creating business rules in the Oracle Planning 2024 context. It is more of a mode of operation rather than a distinct feature assisting rule creation.

* D. Rules are represented graphically in a flow chart into which you can drag and drop components to design the rule: Although graphical rule design was a feature in older Hyperion Planning versions (e.g., Calculation Manager's graphical interface), Oracle Planning 2024 documentation does not emphasize a drag-and-drop flowchart interface as a current primary method for rule creation. Instead, it focuses on templates and Groovy scripting.

References

* Oracle Enterprise Performance Management Cloud Documentation: "Working with Business Rules" (docs.oracle.com, updated 2024). This section details the use of "system templates for calculations" and "Groovy business rules" as key features for rule creation.

* Oracle Planning 2024 Implementation Study Guide: Confirms that predefined templates (e.g., for clearing or aggregating data) and Groovy rules are core features to assist users in designing business rules.

54. Frage

Which three principles of assigning permissions to artifacts, rules and folders are valid?

- A. Users and Power Users can design artifacts.
- B. Users and Power Users can work only with members to which they have permissions.
- C. Users who are assigned permissions to a folder can access the items in that folder, unless they are assigned.
- D. Users and Power Users have Write permissions to all dimension members and to all artifacts.

Antwort: A,B,C

55. Frage

You want to select a probability distribution for your Strategic Modeling simulation. The minimum and maximum are fixed, and you know the most likely values.

Which probability distribution is useful with limited data in situations such as sales estimates, inventory numbers, and marketing costs in Strategic Modeling simulations?

- A. Lognormal
- B. Normal
- C. Triangular
- D. Uniform
- E. Beta PERT

Antwort: C

Begründung:

In Oracle Planning 2024's Strategic Modeling simulations, selecting a probability distribution for scenarios with fixed minimum and maximum values and a known most likely value (e.g., sales estimates, inventory, marketing costs) points to:

* A. Beta PERT: Incorrect. Beta PERT uses min, max, and most likely values but requires more data to shape the curve accurately, making it less ideal with limited data.

* B. Uniform: Incorrect. Uniform assumes equal probability between min and max, ignoring the most likely value, which doesn't fit this scenario.

* C. Triangular: Correct. The Triangular distribution uses minimum, maximum, and most likely values, making it simple and effective for limited data situations like sales or costs.

* D. Normal: Incorrect. Normal requires mean and standard deviation, not just min, max, and most likely, and assumes more data availability.

* E. Lognormal: Incorrect. Lognormal is skewed and suited for data with a positive range, requiring more statistical input than provided here.

The Oracle documentation recommends the Triangular distribution for its simplicity and suitability with limited data, making C the correct answer.

56. Frage

You need to schedule a weekly data import job. Which two statements are true about scheduling jobs?

- A. You can delete that are currently processing.
- B. You can schedule an Import Data job to run later at intervals.
- C. You can set to receive notifications when the job has completed.
- D. You can check the execution status of a job only if it completed.
- E. You can set the daily maintenance time when scheduling cloning environment jobs.

Antwort: B,C

Begründung:

In Oracle Planning 2024, scheduling jobs such as a weekly data import is managed through the Jobs interface, which provides

options for automation, monitoring, and notifications. Let's evaluate the provided statements to identify the two that are true:

* A. You can check the execution status of a job only if it completed: This is false. The Jobs console in Oracle EPM allows users to check the status of a job (e.g., Running, Completed, Failed) at any time, not just after completion. Real-time monitoring is a key feature.

* B. You can set the daily maintenance time when scheduling cloning environment jobs: This is false.

Daily maintenance time is a system-wide setting controlled by administrators via Application Settings, not something adjustable when scheduling specific jobs like cloning or data imports.

* C. You can set to receive notifications when the job has completed: This is true. When scheduling a job (e.g., Import Data), users can enable email notifications to be alerted upon job completion, success, or failure, enhancing job management.

* D. You can schedule an Import Data job to run later at intervals: This is true. The scheduling feature supports recurring jobs, such as weekly data imports, allowing users to define the start time and frequency (e.g., daily, weekly) for tasks like importing data from external sources.

* E. You can delete that are currently processing: This is false. Jobs that are currently processing (i.e., in a "Running" state) cannot be deleted until they complete or fail, as per Oracle's job management rules.

Thus, the two true statements are C and D, reflecting the flexibility of scheduling recurring Import Data jobs and receiving completion notifications, both of which are explicitly supported in Oracle Planning 2024.

57. Frage

.....

Wenn Sie Ihre Position in der konkurrenzfähigen Gesellschaft durch die Oracle 1z0-1080-25 Zertifizierungsprüfung festigen und Ihre fachliche Fähigkeiten verbessern wollen, müssen Sie gute Fachkenntnisse besitzen und sich viel Mühe für die Prüfung geben. Aber es ist nicht so einfach, die Oracle 1z0-1080-25 Zertifizierungsprüfung zu bestehen. Vielleicht durch die Oracle 1z0-1080-25 Zertifizierungsprüfung können Sie Ihnen der IT-Branche vorstellen. Aber man braucht nicht unbedingt viel Zeit und Energie, die Fachkenntnisse kennenzulernen. Sie können die Schulungsunterlagen zur Oracle 1z0-1080-25 Zertifizierungsprüfung von Pass4Test wählen. Sie werden zielgerichtet nach den IT-Zertifizierungsprüfungen entwickelt. Mit ihr können Sie mühelos die schwierige Oracle 1z0-1080-25 Zertifizierungsprüfung bestehen.
