

CrowdStrike IDP Actual Test | New IDP Exam Question

If you want to get promotions or high-paying jobs in the CrowdStrike sector, then it is important for you to crack the CrowdStrike Certified Identity Specialist(CCIS) Exam (IDP) certification exam. The CrowdStrike IDP certification has become the best way to validate your skills and accelerate your tech career. IDP Exam applicants who are doing jobs or busy with their other matters usually don't have enough time to study for the test.

We have seen that candidates who study with outdated IDP practice material don't get success and lose their resources. To save you from loss of money and time, BrainDumpsStore is offering a product that is specially designed to help you pass the CrowdStrike Certified Identity Specialist(CCIS) Exam (IDP) exam on the first try. The CrowdStrike IDP Exam Dumps is easy to use and very easy to understand, ensuring that it is student-oriented. You can choose from 3 different formats available according to your needs. The 3 formats are desktop IDP practice test software, web-based IDP practice exam, and IDP dumps PDF format.

New IDP Exam Question | IDP Test Discount

Earning the CrowdStrike Certified Identity Specialist(CCIS) Exam (IDP) exam credential is undoubtedly a big achievement. No matter how hard the CrowdStrike Certified Identity Specialist(CCIS) Exam (IDP) test of this certification is, it serves the important purpose to validate skills in the CrowdStrike industry. Once you crack the CrowdStrike Certified Identity Specialist(CCIS) Exam (IDP) exam, a whole new career scope opens up for you. Candidates for the CrowdStrike Certified Identity Specialist(CCIS) Exam (IDP) exam dumps usually don't have enough time to study for the test. To prepare successfully in a short time, you need a trusted platform of real and updated CrowdStrike Certified Identity Specialist(CCIS) Exam (IDP) exam dumps.

CrowdStrike Certified Identity Specialist(CCIS) Exam Sample Questions (Q17-Q22):

NEW QUESTION # 17

Which of the following BEST indicates that this user has an established baseline?

- A. The user was found logging into five endpoints
- B. The user has recent logon activity on ETIS-WS03
- C. The user has endpoints that they are considered owners of**
- D. The user has a risk score of 6.4

Answer: C

Explanation:

In Falcon Identity Protection, a user baseline is established by observing consistent and repeatable behavior over time, including authentication patterns, endpoint associations, and usage context. According to the CCIS curriculum, one of the strongest indicators that a user has an established baseline is the presence of endpoints for which the user is identified as an owner.

Endpoint ownership is determined through historical authentication behavior and usage frequency. When Falcon identifies that a user consistently logs into specific endpoints over time, those endpoints are marked as owned, which signifies that sufficient historical data exists to confidently model the user's normal behavior.

This ownership relationship is only created after Falcon has observed the user long enough to establish a reliable baseline.

The other options do not definitively indicate a baseline:

- * Logging into multiple endpoints may occur during initial discovery or anomalous activity.
- * A risk score reflects current risk posture, not baseline maturity.
- * Recent logon activity alone does not imply historical consistency.

Because endpoint ownership requires sustained, predictable behavior over time, it is the clearest indicator that Falcon has successfully established a user baseline. Therefore, Option B is the correct and verified answer.

NEW QUESTION # 18

The Enforce section of Identity Protection is used to:

- A. Define policy rules that determine what actions to take in response to certain triggers observed in the environment
- B. Configure domains, appliances, subnets, connectors, risk configuration, and settings
- C. View all identity-based detections and identity-based incidents in the environment
- D. Gain an overview of the domain and indicate whether the domain follows best security practice

Answer: A

Explanation:

The Enforce section of Falcon Identity Protection is dedicated to policy-based identity enforcement.

According to the CCIS curriculum, this section allows administrators to define and manage Policy Rules and Policy Groups that specify how the platform should respond when identity-related conditions are detected.

These rules evaluate triggers such as risky authentication behavior, privilege misuse, compromised credentials, or elevated risk scores, and then execute actions like blocking access, enforcing MFA, or initiating Falcon Fusion workflows. Enforce is therefore the execution layer of Falcon's identity security model.

The other options correspond to different sections of the platform:

Configuration tasks are handled in Configure.

Detections and incidents are reviewed in Monitor or Explore.

Domain posture overviews are displayed in Domain Security Overview.

Because Enforce directly controls what actions are taken in response to identity risk, Option B is the correct and verified answer.

NEW QUESTION # 19

How should an organization address the domain risk score found in the Domain Security Overview page?

- A. Prioritizing the detections by severity, addressing the High (Red) detections first
- B. Prioritizing the risks by severity, addressing the Low (Green) risks first
- C. Address the risks on the list from top to bottom as risks are presented in a descending order
- D. Prioritizing the risks by severity, addressing the Medium (Yellow) risks first

Answer: C

Explanation:

The Domain Security Overview page in Falcon Identity Protection presents domain risks in an prioritized, descending order, based on a combination of severity, likelihood, and consequence. The CCIS curriculum emphasizes that organizations should address risks from top to bottom, as the list is already optimized to reflect the most impactful identity risks first.

This ordering allows security teams to focus remediation efforts where they will produce the greatest reduction in overall domain risk score. Addressing risks sequentially ensures alignment with Falcon's risk modeling and avoids misprioritization that could occur if teams focus only on color-based severity or individual detections.

The incorrect options reflect common misconceptions:

- * Medium risks should not be prioritized over higher-impact risks.
- * Detections are different from risks and should not be addressed independently of risk context.
- * Low risks are intentionally deprioritized by the platform.

By following the descending order provided in the Domain Security Overview, organizations align remediation with Falcon's Zero Trust-driven identity risk scoring methodology, making Option C the correct answer.

NEW QUESTION # 20

The NIST SP 800-207 framework for Zero Trust Architecture defines validation and authentication standards for users in which

network locations?

- A. Only those users outside the network
- B. Only those users accessing the network remotely over VPN
- **C. All users both inside and outside of the network**
- D. Only those users inside the network

Answer: C

Explanation:

The NIST SP 800-207 Zero Trust Architecture framework fundamentally rejects the concept of implicit trust based on network location. As outlined in both NIST guidance and reinforced in the CCIS curriculum, all users must be continuously validated and authenticated regardless of whether they are inside or outside the network perimeter.

Zero Trust assumes that threats can originate from anywhere, including internal networks. Therefore, authentication and authorization decisions must be made dynamically using identity, device posture, behavior, and risk signals—not network placement.

Falcon Identity Protection aligns directly with this principle by continuously evaluating identity behavior for all users, whether they authenticate from internal corporate networks, remote locations, or cloud environments.

Because Zero Trust applies universally, Option C is the correct and verified answer.

NEW QUESTION # 21

Any countries or regions included in the _ will trigger a geolocation detection.

- **A. Blocklist**
- B. Exclusion
- C. Dictionary
- D. Allowlist

Answer: A

Explanation:

Falcon Identity Protection supports geolocation-based detections to identify potentially risky authentication activity originating from unexpected or prohibited locations. According to the CCIS curriculum, any countries or regions added to the Blocklist will automatically trigger a geolocation-based detection when authentication traffic is observed from those locations.

The Blocklist is designed to explicitly define disallowed geographic regions. When an authentication attempt originates from a blocklisted country or region, Falcon treats the activity as suspicious and generates a detection or contributes to increased identity risk.

By contrast:

- * An Allowlist defines approved locations and suppresses detections.
- * A Dictionary is used for password-related analysis.
- * An Exclusion suppresses detections rather than generating them

Because geolocation detections are triggered by blocklisted locations, Option A is the correct answer.

NEW QUESTION # 22

.....

IDP practice materials are typically seen as the tools of reviving, practicing and remembering necessary exam questions for the exam, spending much time on them you may improve the chance of winning. However, our IDP training materials can offer better condition than traditional practice materials and can be used effectively. We treat it as our major responsibility to offer help so our IDP Practice Guide can provide so much help, the most typical one is their efficiency.

New IDP Exam Question: https://www.passcollection.com/IDP_real-exams.html

With the help of our latest IDP exams4sure review, you can improve your ability and professional skills in the real exam, CrowdStrike IDP Actual Test We aim to serve every customer heart and soul, With our test-oriented IDP test prep in hand, we guarantee that you can pass the IDP exam as easy as blowing away the dust, as long as you guarantee 20 to 30 hours practice with our IDP study materials, This software helps hopefuls improve their performance on subsequent attempts by recording and analyzing CrowdStrike Certified Identity Specialist(CCIS) Exam (IDP) exam results.

There are a few ways to cook this egg. This IDP is particularly helpful for testing a feature prior to purchasing a license, With the help of our latest IDP Exams4sure review, you can improve your ability and professional skills in the real exam

IDP Prep Guide - IDP Guide Torrent & IDP Exam Torrent

We aim to serve every customer heart and soul. With our test-oriented IDP test prep in hand, we guarantee that you can pass the IDP exam as easy as blowing away the dust, as long as you guarantee 20 to 30 hours practice with our IDP study materials.

This software helps hopefuls improve their performance on subsequent attempts by recording and analyzing CrowdStrike Certified Identity Specialist(CCIS) Exam (IDP) exam results, CrowdStrike study dumps training Q&As Are Based On The Real Exam.
