We update the CCSFP guide torrent frequently and provide you the latest study materials which reflect the latest trend in the theory and the practice. So you can master the Certified CSF Practitioner 2025 Exam test guide well and pass the exam successfully. While you enjoy the benefits we bring you can pass the exam.

HITRUST Certified CSF Practitioner 2025 Exam Sample Questions (Q31-Q36):

NEW QUESTION # 31

Sampling is generally not required when testing a manual control. [0055]

- A. False
- B. True

Answer: B

Explanation:

Manual controls (e.g., managerial reviews, manual approvals) are typically tested through inquiry, observation, or inspection of a small number of instances.

Sampling is generally not required, since the control effectiveness is assessed by reviewing evidence of execution rather than broad data sets.

Sampling applies more often to automated or system-based controls.

Extract Reference (HITRUST Assessment Testing Guidance [0055]):

Sampling is not generally required for manual controls; validation can be achieved through limited inspection.

NEW QUESTION # 32

A MyCSF Subscription is required to perform a Readiness Assessment.

- A. True
- B. False

Answer: B

Explanation:

Unlike validated assessments, Readiness Assessments can be performed without a paid MyCSF subscription.

HITRUST provides tools and options for organizations to conduct readiness reviews either directly in MyCSF (for subscribers) or through external assessor support without requiring a subscription. This flexibility allows organizations to test their preparedness and identify gaps before committing to the cost of a subscription or validated assessment. While subscription provides additional benefits (e.g., analytics, inheritance, reporting dashboards), it is not mandatory for readiness. This ensures that even smaller organizations or first-time users can access HITRUST readiness services without financial barriers.

Requirements."

NEW QUESTION # 33

For an r2 assessment, HITRUST requires a Corrective Action Plan (CAP) when the Control Reference required for certification scored a 70 or less, and Implementation scores less than 100%.

- A. False
- B. True

Answer: B

Explanation:

In an r2 assessment, CAP requirements are determined at the Control Reference level. If the aggregate score falls below the certification threshold of 71, and the Implementation maturity level is not at 100%, a Corrective Action Plan (CAP) must be documented. This ensures that organizations commit to remediating critical control deficiencies before certification can be finalized. CAPs must include clear details such as responsible parties, remediation steps, and timelines. Without CAPs, HITRUST will not accept the assessment for certification. Even if Policy or Procedure scores are strong, missing implementation creates unacceptable risk. Therefore, HITRUST mandates CAPs in these cases to close certification-critical gaps.

References: HITRUST Scoring Rubric - "CAP Trigger Conditions"; CCSFP Practitioner Guide - "CAPs in r2 Certification."

NEW QUESTION # 34

Which type of assessments must be performed to be eligible for certification? [0158]

- A. Customized Assessment
- B. e1 Readiness Assessment
- C. Targeted Assessment
- D. an e1, i1 or an r2 Validated Assessment

Answer: D

Explanation:

Certification can only be achieved through a Validated Assessment (not readiness).

Eligible assessment types for certification are:

e1 Validated Assessment

i1 Validated Assessment

r2 Validated Assessment

Readiness Assessments, Customized, or Targeted Assessments cannot result in certification.

Extract Reference (HITRUST CSF Assurance Program [0158]):

Only validated e1, i1, or r2 assessments are eligible for HITRUST certification.

NEW QUESTION # 35

Should a company always select the most current version of the CSF framework? [0163]

- A. Yes
- B. No, the tool will select the version
- C. No, the assessor should select the version
- D. No, a company can select any active version of the framework that best fits their needs

Answer: D

Explanation:

Comprehensive and Detailed Explanation:

HITRUST permits organizations to select from active versions of the CSF framework. While using the most current version is recommended, it is not mandatory. Companies may choose the version that best aligns with their compliance timelines, regulatory obligations, or contractual requirements.

The tool does not automatically select the version.

The assessor does not choose the version-the organization makes this decision.

Selecting any active version gives flexibility while maintaining recognized assurance validity.

Extract Reference (HITRUST CSF v11 Guidance, CCSFP Study Guide [0163]):

Organizations may use any active version of the HITRUST CSF for their assessment. While it is encouraged to adopt the most recent version, HITRUST allows organizations to choose the version that best meets their needs

NEW QUESTION # 36

• • • • •

Without a doubt, there is one thing that can assist them with perceiving this interest and clearing their Certified CSF Practitioner 2025 Exam (CCSFP) exam with flying colors.
