Certificates are certifying that you have passed various qualifying examinations. Watch carefully you will find that more and more people are willing to invest time and energy on the M2 Exam, because the exam is not achieved overnight, so many people are trying to find a suitable way.

## International Code Council Commercial Mechanical Inspector Sample Questions (Q37-Q42):

### NEW QUESTION # 37

Exhibit:

□ CEF-5 is a ceiling exhaust fan manufactured by:

- A. Nutone
- B. Carnes
- C. G.E.
- D. Markel

**Answer: A**

Explanation:

This is also an exhibit-reading question. From the equipment schedule in the image, CEF-5 is listed as a Nutone unit, so Option D is correct. This falls under reading commercial mechanical drawings and equipment schedules related to exhaust/ventilation components.

### NEW QUESTION # 38

For the installation of listed fuel-burning appliances, the required clearances should be found:

- A. in the mechanical code.
- B. on the nameplate of the appliance.
- C. by using a calculation based on the Btu/h output rating of the appliance.
- D. on the approved plans and specifications for the building.

**Answer: B**

Explanation:

The IMC requires fuel-burning units to be marked with the hourly rating, approved fuel type, and required clearances. That means the appliance marking/nameplate is the direct source for the required clearance information for listed fuel-burning appliances. This is why B is the correct answer.

### NEW QUESTION # 39

Infrared radiant heaters shall be installed:

- A. with a 6-ft. clearance on all sides.
- B. with clearances from combustible material in accordance with the manufacturer's installation instructions.
- C. in accordance with UL 2158.
- D. in accordance with UL 1240.

**Answer: B**

Explanation:

The ICC mechanical code provision for infrared radiant heaters states that the heaters must be installed with clearances from combustible material in accordance with the manufacturer's installation instructions.

That makes Option B the correct answer. The code does not establish a blanket 6-foot clearance on all sides in this section, and the exam expects the candidate to rely on the listed installation requirements for the appliance.

### NEW QUESTION # 40

Given: The listed clearance is 12 inches.

□ What would be the reduced clearance to combustibles, in inches, if the millboard is replaced with 24-gauge sheet metal?

- A. 0
- B. 1
- C. 2

- D. 3

**Answer: A**

Explanation:

For a clearance-reduction system using 24-gauge sheet metal with a ventilated 1-inch air space, the recognized reduction method brings a 12-inch listed clearance down to 4 inches. That matches Option B.

This is also consistent with the protection method shown in the exhibit.

#### NEW QUESTION # 41

What type of cooking appliance is required to have its own independent hood and exhaust system?

- A. Light-duty
- B. Heavy-duty
- C. Extra-heavy-duty
- D. Medium-duty

**Answer: C**

Explanation:

The IMC specifically provides that Type I hoods used over extra-heavy-duty cooking appliances shall not cover other appliances requiring fire-extinguishing protection and shall discharge to an independent exhaust system. Therefore, D is correct.

#### NEW QUESTION # 42

.....

After years of operation, our platform has accumulated a wide network of relationships, so that we were able to learn about the changes in the exam at the first time. This is a benefit that students who have not purchased M2 exam guide can't get. The team of experts hired by Commercial Mechanical Inspector study questions constantly updates and supplements the contents of study materials according to the latest syllabus and the latest industry research results. We also have dedicated staff to maintain M2 Exam Material every day, and you can be sure that compared to other test materials on the market, Commercial Mechanical Inspector study questions are the most advanced.
