#### 10. Frage

What challenges does WalkMe address for enterprises adopting SAP S/4HANA? Note: There are 2 correct answers to this question.

- A. Low user engagement and adoption rates
- B. Lack of third-party integrations
- C. High software licensing costs
- D. Difficulty in managing change management processes

**Antwort: A,D**

Begründung:

Here are the two main challenges WalkMe addresses for enterprises adopting SAP S/4HANA, as outlined on [learning.sap.com](https://learning.sap.com)

C. Low user engagement and adoption rates

WalkMe accelerates user adoption during S/4HANA migrations-whether Greenfield or Brownfield-by embedding in-app guidance like Smart Walk-Thrus, real-time help, and automation. This helps users quickly become proficient and engaged with new workflows.

D. Difficulty in managing change management processes

WalkMe supports change initiatives by delivering targeted announcements, reminders, and context-aware guidance, which significantly reduces friction, user errors, and support tickets during transitions [learning.sap.com](https://learning.sap.com)

Not correct:

\* A. Lack of third-party integrations - WalkMe enhances the SAP platform experience but doesn't specifically provide integrations for third-party systems.

\* B. High software licensing costs - Reducing licensing expenses isn't a primary focus of WalkMe's S/4HANA deployment strategy.

Bonus Insight

Here's a practical example of how WalkMe, in partnership with Deloitte, supports organizations during the S/4HANA implementation:

#### 11. Frage

From a WalkMe perspective, what is a common reason enterprises fail to maximize ROI on software investments?

- A. Lack of employee training programs
- B. Insufficient IT budgets
- C. Low software adoption rates
- D. Excessive third-party integrations

**Antwort: C**

Begründung:

D. Low software adoption rates.

WalkMe emphasizes that one of the biggest reasons enterprises fail to maximize ROI on their software investments is due to poor software adoption. Organizations frequently see massive inefficiencies, underutilized tools, and productivity losses-all stemming from low adoption rates-costing up to \$104 million annually and dramatically reducing ROI

Why not the other choices?

\* A. Insufficient IT budgets - While budget constraints can impact projects, WalkMe highlights adoption, not funding, as the primary

barrier.

\* B. Excessive third-party integrations - Integration complexity is a challenge but not cited as the leading cause of failed ROI.

\* C. Lack of employee training programs - Training is important, but the core issue is that even with training, employees still aren't using the software effectively-and that's indicative of poor adoption.

Thus, low software adoption rates is the common reason cited from WalkMe's perspective.

## 12. Frage

What benefit does the combined WalkMe-SAP solution offer to enterprises?

- A. Increased hiring efficiency
- B. Lower software maintenance costs
- C. Enhanced physical supply chain management
- **D. Streamlined user adoption and seamless process integration**

**Antwort: D**

Begründung:

The combined WalkMe-SAP solution delivers enterprises with:

A . Streamlined user adoption and seamless process integration

WalkMe enhances SAP applications by embedding real-time, in-app guidance that helps users confidently navigate complex workflows. This integration significantly boosts adoption rates, reduces friction, and ensures that critical processes are executed smoothly across the organization

Why the other options don't fit:

Option Reason it's incorrect

B . Increased hiring efficiency WalkMe isn't focused on HR-specific modules like talent acquisition-it's a digital adoption platform.

C . Lower software maintenance costs WalkMe doesn't reduce software maintenance expenses-it improves usage and adoption.

D . Enhanced physical supply chain management WalkMe enhances user interaction with software, rather than managing any physical aspects of supply chains.

Final Answer:

A . Streamlined user adoption and seamless process integration
