

# 100% Pass Quiz OGEA-101 - TOGAF Enterprise Architecture Part 1 Exam—Efficient Valid Exam Prep

DOWNLOAD the newest Free4Dump OGEA-101 PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1A3MD0dwV8PPxFy\\_UekFlyUgLfCgMjBR](https://drive.google.com/open?id=1A3MD0dwV8PPxFy_UekFlyUgLfCgMjBR)

Our OGEA-101 study materials will be very useful for all people to improve their learning efficiency. If you do all things with efficient, you will have a promotion easily. If you want to spend less time on preparing for your OGEA-101 exam, if you want to pass your OGEA-101 exam and get the certification in a short time, our OGEA-101 Study Materials will be your best choice to help you achieve your dream. Only studying with our OGEA-101 exam questions for 20 to 30 hours, you will be able to pass the OGEA-101 exam with confidence.

## The Open Group OGEA-101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Information Systems Architecture: Focusing on data and application architectures, this topic of the OGEA-101 exam assesses ability of TOGAF practitioners to define and manage information systems. It measures their skills in identifying data entities and application components.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Architecture Content Framework: Candidates learn about the TOGAF content metamodel and architecture artifacts. This topic of the OGEA-101 exam measures their understanding of content organization and documentation.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>ADM Phase Requirements: This topic of the TOGAF Enterprise Architecture Part 1 exam focuses on the specific requirements for each ADM phase, including stakeholder identification and architecture scope definition. It measures the ability of aspiring TOGAF Practitioner to apply these requirements in real-world scenarios.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Architecture Change Management: Focusing on managing architecture changes, this topic of the TOGAF Enterprise Architecture Part 1 exam assesses skills of practitioners in handling change requests and maintaining architecture repositories.</li></ul>

Topic 5	<ul style="list-style-type: none"> <li>• <b>Fundamental Concepts of Enterprise Architecture:</b> This topic covers the definition, purpose, and benefits of enterprise architecture, emphasizing its role in aligning business objectives with IT strategies. It measures the understanding of TOGAF practitioners about foundational principles essential for effective enterprise architecture practice, crucial for passing the OGEA-101 Exam.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• <b>Architecture Governance:</b> This topic of The Open Group OGEA-101 exam covers the governance framework and responsibilities of architecture boards. It evaluates the skills of TOGAF practitioners in establishing governance structures.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• <b>Architecture Vision:</b> Aspiring TOGAF practitioners learn to develop an architecture vision that aligns with business goals and drivers. This topic evaluates the skills in articulating a clear and compelling vision, a necessary competency for successfully navigating the OGEA-101 exam and implementing enterprise architecture.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• <b>Business Architecture:</b> This topic of The Open Group OGEA-101 exam emphasizes the development of business architecture, including baseline and target architectures. It measures the understanding of TOGAF practitioners about business capabilities and processes.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>• <b>Introduction to the Architecture Development Method (ADM):</b> The ADM is central to TOGAF, outlining a structured approach to developing and managing enterprise architecture. This section assesses comprehension of TOGAF practitioners about the ADM phases and their application, ensuring they grasp the method's iterative nature, which is vital for the OGEA-101 exam.</li> </ul>

## 2026 100% Pass-Rate OGEA-101 Valid Exam Prep Help You Pass OGEA-101 Easily

We are popular not only because we own the special and well-designed OGEA-101 exam materials but also for we can provide you with well-rounded services beyond your imagination. At the very beginning, we have an authoritative production team and our OGEA-101 study guide is revised by hundreds of experts, which means that you can receive a tailor-made OGEA-101 Study Material according to the changes in the syllabus and the latest development in theory and breakthroughs. Without doubt, our OGEA-101 practice torrent keep up with the latest information.

### The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q84-Q89):

#### NEW QUESTION # 84

Which ADM phase focuses on defining the problem to be solved, identifying the stakeholders, their concerns, and requirements?

- A. Phase
- **B. Phase A**
- C. Preliminary Phase
- D. Phase

**Answer: B**

Explanation:

Phase A: Architecture Vision is the first phase of the Architecture Development Method (ADM) cycle, which is the core of the TOGAF standard. The main purpose of this phase is to define the scope and approach of the architecture development, and to create the Architecture Vision, which is a high-level description of the desired outcomes and benefits of the proposed architecture. To achieve this purpose, this phase focuses on defining the problem to be solved, identifying the stakeholders, their concerns, and requirements, and establishing the business goals and drivers that motivate the architecture work. This phase also involves obtaining the approval and commitment of the sponsors and other key stakeholders, and initiating the Architecture Governance process.

### NEW QUESTION # 85

Consider the following ADM phases objectives.

	Objective
1	Develop the Target Data Architecture that enables the Business Architecture and the Architecture Vision
2	Develop the Target Business Architecture that describes how the enterprise needs to operate to achieve the business goals
3	Develop a high-level aspirational vision of the capabilities and business value to be delivered as a result of the proposed Enterprise Architecture
4	Develop the Target Application Architecture that enables the Business Architecture and the Architecture Vision, in a way that addresses the Statement of Architecture Work and stakeholder concerns

Which phase does each objective match?

- A. 1C-2B-3A-4C
- B. 1C-2D-3B-4A
- C. 1A-2B-3C-4D
- D. 1B-2D-3A-4C

**Answer: A**

Explanation:

The objectives listed in the question correspond to the objectives of different phases of the TOGAF ADM (Architecture Development Method), which is a method for developing and managing an enterprise architecture<sup>1</sup>.

The ADM consists of nine phases, each with a specific purpose and output. The phases are<sup>1</sup>:

Preliminary Phase: To prepare and initiate the architecture development cycle, including defining the architecture framework, principles, and governance.

Phase A: Architecture Vision: To define the scope, vision, and stakeholders of the architecture initiative, and to obtain approval to proceed.

Phase B: Business Architecture: To describe the baseline and target business architecture, and to identify the gaps between them.

Phase C: Information Systems Architectures: To describe the baseline and target data and application architectures, and to identify the gaps between them.

Phase D: Technology Architecture: To describe the baseline and target technology architecture, and to identify the gaps between them.

Phase E: Opportunities and Solutions: To identify and evaluate the opportunities and solutions for implementing the target architecture, and to define the work packages and transition architectures.

Phase F: Migration Planning: To finalize the implementation and migration plan, and to ensure alignment with the enterprise portfolio and project management.

Phase G: Implementation Governance: To provide architecture oversight and guidance for the implementation projects, and to manage any architecture change requests.

Phase H: Architecture Change Management: To monitor the changes in the business and technology environment, and to assess the impact and performance of the architecture.

Based on the above definitions, we can match each objective with the corresponding phase as follows:

Objective 1: Develop the Target Data Architecture that enables the Business Architecture and the Architecture Vision. This objective is achieved in Phase C: Information Systems Architectures, where the data architecture is defined as a subset of the information systems architecture<sup>2</sup>.

Objective 2: Develop the Target Business Architecture that describes how the enterprise needs to operate to achieve the business goals. This objective is achieved in Phase B: Business Architecture, where the business architecture is defined as a subset of the enterprise architecture<sup>3</sup>.

Objective 3: Develop a high-level aspirational vision of the capabilities and business value to be delivered as a result of the proposed Enterprise Architecture. This objective is achieved in Phase A: Architecture Vision, where the architecture vision is defined as a high-level description of the target architecture and its benefits<sup>4</sup>.

Objective 4: Develop the Target Application Architecture that enables the Business Architecture and the Architecture Vision, in a way that addresses the Statement of Architecture Work and stakeholder concerns. This objective is achieved in Phase C:

Information Systems Architectures, where the application architecture is defined as a subset of the information systems architecture<sup>2</sup>.

Reference:

1: The TOGAF Standard, Version 9.2, Chapter 5: Architecture Development Method (ADM)

2: The TOGAF Standard, Version 9.2, Chapter 9: Phase C: Information Systems Architectures

3: The TOGAF Standard, Version 9.2, Chapter 8: Phase B: Business Architecture

**NEW QUESTION # 86**

Complete the sentence. Actions arising from the Business Transformation Readiness Assessment technique should be incorporated in the

- A. Architecture Roadmap
- B. Architecture Requirements Specification
- **C. Implementation and Migration Plan**
- D. Implementation Governance Model

**Answer: C**

Explanation:

The Business Transformation Readiness Assessment technique is used to evaluate the readiness of the organization to undergo change and to identify the actions needed to increase the likelihood of a successful business transformation. These actions should be incorporated in the Implementation and Migration Plan, which is the detailed plan to transition from the Baseline Architecture to the Target Architecture. The Implementation and Migration Plan also includes the Transition Architectures, the Architecture Building Blocks, the Work Packages, the Implementation Governance Model, and the Architecture Contract<sup>12</sup> References: 1: The TOGAF Standard, Version 9.2, Part III: ADM Guidelines and Techniques, Chapter 27: Business Transformation Readiness Assessment 2: The TOGAF Standard, Version 9.2, Part II: Architecture Development Method (ADM), Chapter 21: Phase F: Migration Planning

**NEW QUESTION # 87**

Which statement best describes iteration and the ADM?

- A. The ADM is sequential Iteration is applied within phases
- B. The ADM is iterative within the first cycle and then between phases
- C. The level of detail is defined once and applies to all iterations
- **D. The ADM is iterative, over the whole process between phases and within phases**

**Answer: D**

Explanation:

This statement best describes iteration and the ADM. The ADM is iterative over the whole process between phases and within phases because it allows for feedback loops and refinements at any point in the architecture development and transition process. Iteration enables architects to address changing requirements, assumptions, constraints, and environments; to validate and improve architectures; to manage risks and issues; and to ensure stakeholder satisfaction and value realization. Reference: The TOGAF Standard | The Open Group Website, Section 3.1 Introduction to the ADM.

**NEW QUESTION # 88**

Complete the sentence. When considering agile development, Architecture to Support Project will identify what products the Enterprise needs, the boundary of the products, and what constraints a product owner has; this defines the Enterprise's

- 
- A. operations
  - B. lifecycle economics
  - **C. workflow management**
  - D. backlog

**Answer: C**

**NEW QUESTION # 89**
