## Interactive 71301T Course, Test 71301T Online

Try our demo products and realize the key advantages coming through our 71301T products. Our demo products are quite useful for sketching out the real competence of our actual products. You can estimate the real worth of our 71301T products, once you go through our free trial products. Free demos experience pre determines what you are really purchasing and what benefits you can acquire through our 71301T products.

## Avaya Aura Communication Applications Implement Sample Questions (Q99-Q104):

### NEW QUESTION # 99

How many Server Flows and/or Subscriber Flows are required for SIP Trunking?

- A. one Subscriber Flow and one Server Flow

- B. one Subscriber Flow and two Server Flows
- **C. a minimum of two Server Flows**
- D. a minimum of two Subscriber Flows

**Answer: C**

#### NEW QUESTION # 100

What is the process for Web browsing to the AES Management Console, and logging in with the default account and default password?

- A. https://<AES Management IP Addr> then enter login=admin password=admin01
- B. http://<AES Management IP Addr> then enter login=admin password=admin
- **C. https://<AES Management IP Addr> then enter login=cust password=custpw**
- D. https://<AES Management IP Addr>:8443, then enter login=craft password=crftpw

**Answer: C**

Explanation:

Log in to the AE Server as the default administrator (cust).

Make sure that the URL begins with "https://" and the host name or IP address of the AE Services Server is correct.

<https://downloads.avaya.com/css/P8/documents/100171737>

#### NEW QUESTION # 101

What is the correct procedure for connecting the Application Enablement Services (AES) command-line interface (CLI), and the default login ID?

- A. Use PuTTY or equivalent to connect to < AES IP address > using port 21, then enter login=admin.
- **B. Use PuTTY or equivalent to SSH to < AES IP address > using port 22, then enter login=cust.**
- C. Use PuTTY or equivalent to SSH to < AES IP address > using port 222, then enter login=ipcs.
- D. Use PuTTY or equivalent to SSH to < AES IP address > using port 22, then enter login=craft.

**Answer: B**

Explanation:

The Application Enablement Services (AES) CLI is accessed via SSH, not FTP or other protocols.

Standard SSH uses port 22.

The default login for AES CLI access is cust.

#### NEW QUESTION # 102

A field engineer runs the Installation Wizard during the deployment of the Avaya Session Border Controller for Enterprise (ASBCE). Which statement about configuring Domain Name System (DNS) server address during the Installation Wizard is true?

- **A. A Primary DNS server address needs to be configured.**
- B. A DNS server address is not required.
- C. Both the Primary and the Secondary DNS server addresses must be configured, even if only one DNS server is available.
- D. A DNS server address should not be configured during the Installation Wizard.

**Answer: A**

Explanation:

When deploying an Avaya Session Border Controller for Enterprise (ASBCE), providing a DNS server is a mandatory step in the Installation Wizard.

Necessity: The ASBCE requires DNS resolution to correctly identify and communicate with other components in the Avaya Aura ecosystem (such as the Avaya Aura System Manager (SMGR), WebLM servers, and external SIP trunks).

Minimum Requirement: While the wizard allows for the configuration of a primary, secondary, and tertiary DNS server, only the Primary DNS server is strictly required for the initial network configuration and service activation.

### NEW QUESTION # 103

The Avaya WebRTC solution uses the web intensively to make media calls from a standard web browser in the internet, into internal and secure communication premises in the enterprise. Which statement about security between the Enterprise-edge and those standard Web browsers in the internet is true?

- A. A trust relationship based on certificates must be built to make WebRTC work.
- B. There must be a VPN connection between the Web Browser and the Enterprise-edge to build a WebRTC link.
- C. No trust relationship exists between enterprise edge security and web browsers; therefore, the security strategy is based on an Authorization Token instead.
- D. WebRTC only works within the Enterprise network. External Web Browsers must connect through an Avaya Session Border Controller for Enterprise (SBCE) via a SIP trunk.

**Answer: C**

Explanation:

Validation of the authorization token.

The WebRTC Snap-in will validate the authorization token created and encrypted by the web server. If the snap-in can decrypt the token and ensure that the time stamp is valid, it knows that the incoming HTTP request is valid. The time stamp will usually be short lived; on the order of 5-

10seconds to protect against reply attacks.

### NEW QUESTION # 104

.....

Under the instruction of our 71301T exam torrent, you can finish the preparing period in a very short time and even pass the exam successful, thus helping you save lot of time and energy and be more productive with our Avaya Aura Communication Applications Implement prep torrent. In fact the reason why we guarantee the high-efficient preparing time for you to make progress is mainly attributed to our marvelous organization of the content and layout which can make our customers well-focused and targeted during the learning process with our 71301T Test Braindumps. The high pass rate of our 71301T exam prep is 99% to 100%.
