Salesforce Certified Heroku Architect Sample Questions (Q79-Q84):

NEW QUESTION # 79

A client has a Heroku app that uses Apache Kafka on Heroku. They want to refactor the app into 2 distinct appsthat will both continue to use Kafka (because they probably don't have so much to do in their life). Based on this refactoring, what should an Architect recommend?

- A. Ensure that the apps consume mutually exclusive sets of Kafka topics
- **B. Attach the existing Kafka add-on to both apps**
- C. Designate one app as a producer and the other as a consumer
- D. Attach the existing Kafka add-on to one app and attach a new Kafka add-on to the other app

Answer: B

NEW QUESTION # 80

Universal Containers (UC) wants to allow its developers to only use certain add-ons. UC enables Add-on Controls for Enterprise Teams and adds the add-ons they wish to allow to the list. There is an existing set of add-ons attached to applications, which are NOT on the list.

What happens to these add-ons?

- A. They are deleted, and all data is backed up and saved.
- **B. They are flagged for removal, and the developers are notified.**
- C. They are added to the exception list and not affected.
- D. They are added to the allowed add-ons list.

Answer: B

Explanation:

NEW QUESTION # 81

What is a Heroku dyno?

- A. Your application code compiled and ready to be served to a variety of web clients
- **B. A managed runtime container with a Linux operating system underneath**
- C. An on-prem server that you can install in a rack at your nearest co-location facility
- D. A specialized dinosaur monitoring service delivered from the cloud

Answer: B

NEW QUESTION # 82

A client is building a collection of Heroku applications that will be audited regularly. To comply with the audit, it must be guaranteed that the applications all forward their logs to the same, single destination. Which solution meets this requirements?

- A. Deploy all the applications to the same Private Space with Logplex disabled.
- B. Deploy all the applications to the Common runtime, and add the same log drain URL to all of them.
- C. Deploy all of the applications to the Common Runtime, and attach the same instance of a logging add-on to all of them.
- **D. Deploy all the applications to the same Shield Private Space with Private Space Logging enabled**

Answer: D

Explanation:

- <https://devcenter.heroku.com/articles/dataclips>

NEW QUESTION # 83

Universal Containers has a Heroku app that uses several third-party add-ons. They now need to enforce data privacy and be compliant with General Data Protection Regulation (GDPR).

What should an Architect advise UC regarding data residency in this scenario?

- A. Heroku does not control where add-on providers store data.
- B. Heroku guarantees the physical location of its control surface APIs.
- C. Data residency for add-ons is covered under Salesforce's GDPR compliance.
- **D. Heroku support can configure add-ons for specific data residency needs.**

Answer: D

NEW QUESTION # 84
