The Certified Information Security Manager (CISM) exam is a globally recognized certification program offered by the Information Systems Audit and Control Association (ISACA). The CISM Certification is designed for professionals who manage, design, and oversee an organization's information security program. Certified Information Security Manager certification is highly valued in the industry and is considered as one of the most prestigious certifications in the field of information security.

ISACA Certified Information Security Manager Sample Questions (Q305-Q310):

NEW QUESTION # 305

An organization is considering a self-service solution for the deployment of virtualized development servers. Which of the following should be information security manager's PRIMARY concern?

- A. Generation of excessive security event logs
- B. Ability to remain current with patches
- C. Ability to maintain server security baseline

- D. Segregation of servers from the production environment

Answer: C

NEW QUESTION # 306

An organization's human resources (HR) department is planning to migrate a legacy application to a new application in the cloud. What is the BEST way for the information security manager to support this effort?

- **A. Conduct a security assessment on the cloud provider.**
- B. Update the policies to add controls for protecting the data.
- C. Encrypt the data to the cloud so that the data is secure.
- D. Conduct vulnerability scans on the cloud provider.

Answer: A

NEW QUESTION # 307

An information security manager uses security metrics to measure the:

- A. performance of the security baseline.
- **B. performance of the information security program.**
- C. effectiveness of the security risk analysis.
- D. effectiveness of the incident response team.

Answer: B

Explanation:

Section: INFORMATION SECURITY PROGRAM DEVELOPMENT

Explanation:

The security metrics should be designed so that there is a relationship to the performance of the overall security program in terms of effectiveness measurement. Use of security metrics occurs after the risk assessment process and does not measure it. Measurement of the incident response team performance is included in the overall program performance, so this is an incomplete answer.

NEW QUESTION # 308

The BEST way to identify the risk associated with a social engineering attack is to:

- A. perform a business risk assessment of the email filtering system.
- B. monitor the intrusion detection system (IDS),
- **C. test user knowledge of information security practices.**
- D. review single sign-on (SSO) authentication logs.

Answer: C

NEW QUESTION # 309

The FIRST step in developing an information security management program is to:

- A. assess adequacy of controls to mitigate business risks.
- B. identify business risks that affect the organization.
- C. assign responsibility for the program.
- **D. clarify organizational purpose for creating the program.**

Answer: D

Explanation:

In developing an information security management program, the first step is to clarify the organization's purpose for creating the program. This is a business decision based more on judgment than on any specific quantitative measures. After clarifying the purpose, the other choices are assigned and acted upon.
