Which solution should the consultant recommend when CK sets up the new account process?

- A. Place the user in a separate role at the highest level of the role hierarchy.
- **B. Add the user to a separate role at the lowest level of the role hierarchy.**
- C. Assign the Modify All Data permission to the user.

**Answer: B**

Adding the user to a separate role at the lowest level of the role hierarchy ensures that the manual reviewer does not inadvertently gain access to other users' accounts through role hierarchy-based sharing rules.
