# Instant CWNP CWAP-405 Download & CWAP-405 VCE Exam Simulator

What's more, part of that ExamTorrent CWAP-405 dumps now are free: https://drive.google.com/open?id=1ddYIeoxDgElUWgEp72uFtcsxQyR6J1Oj

Along with the three version of our CWAP-405 exam braindumps: the PDF, Software and APP online, we also offer you the best practicing opportunity to ace exam in your first try. They are the special trial versions-the free demos of the CWAP-405 practice engine that provides you the latest questions and answers to have a try on not only the content but also the displays. With these free demos, you can test and check the quality of the CWAP-405 Study Guide, and have a nice experience to practice on them.

It is known to us that getting the CWAP-405 certification is not easy for a lot of people, but we are glad to tell you good news. The CWAP-405 study materials from our company can help you get the certification in a short time. Now we are willing to introduce our CWAP-405 Practice Questions to you in detail, we hope that you can spare your valuable time to have a try on our products. Please believe that we will not let you down!

CWAP-405 VCE Exam Simulator, CWAP-405 Study Demo

We offer money back guarantee if anyone fails but that doesn't happen if one uses our CWAP-405 dumps. These CWAP-405 exam dumps are authentic and help you in achieving success. Do not lose hope and only focus on your goal if you are using ExamTorrent CWAP-405 PDF. It is a package of CWAP-405 braindumps that is prepared by the proficient experts. These CWAP-405 Exam Questions dumps are of high quality and are designed for the convenience of the candidates. These are based on the CWAP-405 Exam content that covers the entire syllabus. The CWAP-405 practice test content is very easy and simple to understand.

CWNP Certified Wireless Analysis Professional Sample Questions (Q70-Q75):

NEW QUESTION # 70
What is encrypted within the third message of the 4-Way Handshake?

- A. PMK
- B. PTK
- C. GMK
- D. GTK

Answer: D

Explanation:
The GTK (Group Temporal Key) is encrypted within the third message of the 4-Way Handshake. The 4-Way Handshake is a process that establishes a secure connection between a STA (station) and an AP (access point) using WPA2 (Wi-Fi Protected Access 2), which is a security protocol that uses AES-CCMP (Advanced Encryption Standard-Counter Mode CBC-MAC Protocol) as its encryption algorithm. The 4-Way Handshake consists of four messages that are exchanged between the STA and the AP. The first message is sent by the AP to the STA, containing the ANonce (Authenticator Nonce), which is a random number generated by the AP. The second message is sent by the STA to the AP, containing the SNonce (Supplicant Nonce), which is a random number generated by the STA, and the MIC (Message Integrity Code), which is a value that verifies the integrity of the message. The third message is sent by the AP to the STA, containing the GTK, which is a key that is used to encrypt and decrypt multicast and broadcast data frames, and the MIC. The GTK is encrypted with the KEK (Key Encryption Key), which is derived from the PTK (Pairwise Temporal Key).
The PTK is a key that is used to encrypt and decrypt unicast data frames, and it is derived from the PMK (Pairwise Master Key), the ANonce, and the SNonce. The fourth message is sent by the STA to the AP, containing only the MIC, to confirm the completion of the 4-Way Handshake. The other options are not correct, as they are not encrypted within the third message of the 4-Way Handshake. The PMK is a key that is derived from a passphrase or obtained from an authentication server, and it is not transmitted in any message of the 4-Way Handshake. The PTK is a key that is derived from the PMK, the ANonce, and the SNonce, and it is not transmitted in any message of the 4-Way Handshake. The GMK (Group Master Key) is a key that is generated by the AP and used to derive the GTK, and it is not transmitted in any message of the 4-Way Handshake. NEW QUESTION # 71
An RTS frame should be acknowledged by which frame?

- A. RTS-Ack
- B. Block Ack
- C. Ack
- D. CTS

Answer: D

Explanation:
An RTS (Request to Send) frame should be acknowledged by a CTS (Clear to Send) frame. An RTS and CTS frame are types of control frames that are used to implement a virtual carrier sense mechanism called RTS
/CTS. RTS/CTS is a technique that helps to avoid collisions and hidden node problems in wireless transmissions. When a STA (station) wants to send a data frame, it first sends an RTS frame to the intended receiver, indicating the duration of the transmission. The receiver then responds with a CTS frame, also indicating the duration of the transmission. The other STAs in the vicinity hear either the RTS or the CTS frame and update their NAV (Network Allocation Vector) timers accordingly, deferring their access to the medium until the transmission is over. The sender then sends the data frame, followed by an ACK (Acknowledgement) frame from the receiver. The other options are not correct, as they are not used to acknowledge an RTS frame. An ACK frame is used to acknowledge a data frame, not an RTS frame. An RTS- Ack frame does not exist, as there is no such type of control frame in 802.11. A Block Ack (BA) frame is used to acknowledge multiple data frames in a single frame, not an RTS frame. References: [Wireless Analysis Professional Study Guide CWAP-405], Chapter 6: 802.11 Frame Exchanges, page 166-167

NEW QUESTION # 72
When would you expect to see a Reassociation Request frame'

- A. Only when a STA is using FT roaming
- B. Every time a STA associates to an AP to which it has previously been associated
- C. Every time a STA roams

- D. Only when a STA roams back to an AP it has previously been associated with

Answer: C

Explanation:
A Reassociation Request frame is sent every time a STA roams from one AP to another within the same ESS.
A Reassociation Request frame is similar to an Association Request frame, but it also contains the BSSID of the current AP that the STA is leaving. This allows the new AP to coordinate with the old AP and transfer the STA's context information, such as security keys, QoS parameters, and buffered frames. This way, the STA can maintain its connectivity and session continuity during roaming. References: CWAP-405Certified Wireless Analysis Professional Study and Reference Guide, Chapter 6: MAC Sublayer Frame Exchanges, page 195; CWAP-405Certified Wireless Analysis Professional Study and Reference Guide, Chapter 6: MAC Sublayer Frame Exchanges, page 196.

NEW QUESTION # 73
VoIP is used heavily in your organization. You must troubleshoot problems with dropped calls on the WLAN.
What is a common cause of dropped calls when using Wi-Fi VoIP phones?

- A. Data rates below 75 Mbps
- B. Slow roaming
- C. Data rates below 54 Mbps
- D. Use of WMM

Answer: B

NEW QUESTION # 74
After examining a Beacon frame decode you see the SSID Element has a length of 0. What do you conclude about this frame?

- A. The frame is corrupted
- B. This is a common attack on WISP backend SQL databases
- C. The beacon is from a BSS configured to hide the SSID
- D. SSID elements always have a length of 0

Answer: C

Explanation:
If the SSID element has a length of 0 in a Beacon frame decode, it means that the beacon is from a BSS configured to hide the SSID. The SSID element is a part of the Beacon frame that contains the name or identifier of the BSS. The SSID element has two fields: length and value. The length field indicates how many bytes are used for the value field, which contains the actual SSID string. If the length field is 0, it means that there is no value field or SSID string in the element. This is a common technique used by some APs to hide their SSID from passive scanning clients or potential attackers. However, this technique does not provide much security, as there are other ways to discover or reveal the hidden SSID, such as active scanning or capturing probe response or association frames. References: [Wireless Analysis Professional Study Guide CWAP-405], Chapter 5: 802.11 MAC Sublayer, page 122-123

NEW QUESTION # 75
......

Martin Fowler: They called me in to do some consulting CWAP-405 around domain modeling for a project they were working on, How To Succeed In Different Nocturnal Scenarios.

Our questions are never the stereotypes, but always CWAP-405 Exam Simulator Fee being developed and improving according to the trend, If you do not pass the exam after using our materials, you can provide the scanning CWAP-405 VCE Exam Simulator items of report card which provided by authorized test centers (Prometric or VUE) .

Certified Wireless Analysis Professional passleader free questions & CWAP-405 valid practice dumps

CWAP-405 Test Questions help 98%+ candidates clear CWNP exams and obtain certifications at first attempt, If you use CWAP-405 test material, you will have a very enjoyable experience while improving your ability.

Our proficient and licensed members CWAP-405 VCE Exam Simulator of team designed exam oriented and comprehensive questions.
