SY0-701 Original Questions & SY0-701 Training Online & SY0-701 Dumps Torrent

Our product provides the demo thus you can have a full understanding of our SY0-701 prep torrent. You can visit the pages of the

product and then know the version of the product, the characteristics and merits of the SY0-701 test braindumps, the price of the product and the discount. There are also the introduction of the details and the guarantee of our SY0-701 prep torrent for you to read. You can also know how to contact us and what other client's evaluations about our SY0-701 test braindumps. You will pass the SY0-701 exam as our SY0-701 study gude has a pass rate of 99% to 100%.

CompTIA Security+ Certification Exam Sample Questions (Q552-Q557):

NEW QUESTION # 552
An administrator is installing an SSL certificate on a new system. During testing, errors indicate that the certificate is not trusted. The administrator has verified with the issuing CA and has validated the private key.
Which of the following should the administrator check for next?

- A. If the certificate signing request is valid
- B. If the root certificate is installed
- C. If the wildcard certificate is configured
- D. If the public key is configured

Answer: B

NEW QUESTION # 553
Which of the following security concepts is the best reason for permissions on a human resources fileshare to follow the principle of least privilege?

- A. Integrity
- B. Availability
- C. Non-repudiation
- D. Confidentiality

Answer: D

Explanation:
Confidentiality is the security concept that ensures data is protected from unauthorized access or disclosure.
The principle of least privilege is a technique that grants users or systems the minimum level of access or permissions that they need to perform their tasks, and nothing more. By applying the principle of least privilege to a human resources fileshare, the permissions can be restricted to only those who have a legitimate need to access the sensitive data, such as HR staff, managers, or auditors. This can prevent unauthorized users, such as hackers, employees, or contractors, from accessing, copying, modifying, or deleting the data.
Therefore, the principle of least privilege can enhance the confidentiality of the data on the fileshare. Integrity, availability, and non-repudiation are other security concepts, but they are not the best reason for permissions on a human resources fileshare to follow the principle of least privilege. Integrity is the security concept that ensures data is accurate and consistent, and protected from unauthorized modification or corruption.
Availabilityis the security concept that ensures data is accessible and usable by authorized users or systems when needed. Non-repudiation is the security concept that ensures the authenticity and accountability of data and actions, and prevents the denial of involvement or responsibility. While these concepts are also important for data security, they are not directly related to the level of access or permissions granted to users or systems.

NEW QUESTION # 554
A security team wants to work with the development team to ensure WAF policies are automatically created when applications are deployed. Which concept describes this capability?

- A. IoT
- B. IoC
- C. IaaS
- D. IaC

Answer: D

Explanation:

The ability to automatically generate WAF (Web Application Firewall) policies during application deployment is a characteristic of Infrastructure as Code (IaC). IaC allows infrastructure components-such as firewalls, WAF policies, load balancers, and security groups-to be defined, version-controlled, and deployed programmatically.

According to Security+ SY0-701, IaC enhances DevSecOps workflows by embedding security controls directly into deployment pipelines, ensuring consistent, repeatable, and automated application protection. This reduces human error, eliminates configuration drift, and ensures that every new application instance is deployed with the correct WAF rules already in place.

IoT (B) involves connected devices.

IoC (C) refers to Indicators of Compromise.

IaaS (D) provides cloud infrastructure but does not itself automate security policy generation.

Thus, A: IaC is the correct concept enabling automated WAF policy creation.

NEW QUESTION # 555

Local guidelines require that all information systems meet a minimum security baseline to be compliant. Which of the following can security administrators use to assess their system configurations against the baseline?

- A. Security control matrix
- B. SOAR playbook
- C. Risk management framework
- D. Benchmarks

Answer: D

Explanation:

Benchmarks: Security benchmarks provide standardized sets of best practices and settings that help ensure the secure configuration of an operating system or application. Organizations such as the Center for Internet Security (CIS) provide security benchmarks that can be used to evaluate and harden systems to meet security baselines.

NEW QUESTION # 556

Which of the following is a prerequisite for a DLP solution?

- A. Data sanitization
- B. Data destruction
- C. Data classification
- D. Data masking

Answer: C

Explanation:

Data classification is required before implementing a Data Loss Prevention (DLP) solution because DLP policies depend on identifying and categorizing sensitive data to monitor, block, or encrypt it accordingly.

Data destruction (A) and sanitization (B) remove data, and masking (D) obscures data but classification is foundational for DLP effectiveness.

Data classification is emphasized in Security Program Management and Data Protection topics#6:Chapter 16 CompTIA Security+ Study Guide#.

NEW QUESTION # 557

......

Our SY0-701 study materials do our best to find all the valuable reference books, then, the product we hired experts will carefully analyzing and summarizing the related materials, such as: SY0-701 SY0-701 exam, eventually form a complete set of the review system. Experts before starting the compilation of " the SY0-701 study materials ", has put all the contents of the knowledge point build a clear framework in mind, though it needs a long wait, but product experts and not give up, but always adhere to the effort, in the end, they finished all the compilation. So, you're lucky enough to meet our SY0-701 Study Materials l, and it's all the work of the experts.
