

AI-102 Certification Exam Cost & Online AI-102 Lab Simulation

Microsoft Azure Certification Details		
AI-102: Designing and Implementing a Microsoft Azure AI Solution		
 Prior Certification Not Required	 Exam Validity 1 Year	 Exam Fee \$165 USD
 Exam Duration 180 Minutes	 No. of Questions 40-60 Questions	 Passing Marks 700
 Recommended Experience Skills to build, manage, and deploy AI solutions that leverage Azure Cognitive Services and Azure Applied AI services		 Exam Format Multiple choice, Drag & drop, Case studies, Multiple response
 Languages English, Japanese, Chinese (Simplified), Korean, German, French, Spanish, Portuguese (Brazil), Arabic (Saudi Arabia), Russian, Chinese (Traditional), Italian, Indonesian (Indonesia)		

P.S. Free 2026 Microsoft AI-102 dumps are available on Google Drive shared by ActualVCE: <https://drive.google.com/open?id=1p7w2CJsk5z0WxEbDw9H0wGZYimso71bI>

we believe that all students who have purchased AI-102 practice dumps will be able to successfully pass the professional qualification exam as long as they follow the content provided by our AI-102 study materials, study it on a daily basis, and conduct regular self-examination through mock exams. Our AI-102 Study Materials offer you a free trial service, and you can download our trial questions bank for free. I believe that after you try AI-102 training engine, you will love them.

Microsoft AI-102 certification exam requires the candidate to have a strong background in programming languages such as Python and R. AI-102 exam also requires the candidate to have experience in developing and deploying AI models using Azure services. AI-102 exam is conducted online and consists of multiple-choice questions and case studies. The candidate must pass the exam to receive the certification.

To pass the exam, candidates must demonstrate their ability to design and implement AI solutions that meet specific business requirements. They must also be proficient in using Azure services to build intelligent applications that can process natural language, recognize images and speech, and make predictions based on data. Additionally, they must have a clear understanding of how to train and evaluate machine learning models, and how to deploy these models in production environments.

The AI-102 Certification Exam consists of multiple-choice questions and performance-based scenarios. Candidates are given a limited amount of time to complete the exam, and they must pass with a score of at least 700 out of 1000 points to earn the certification. AI-102 exam can be taken online or in a testing center, and it is recommended that candidates prepare thoroughly by taking online courses, reading technical documentation, and practicing with sample questions.

AI-102 Learning Materials: Designing and Implementing a Microsoft Azure AI Solution - AI-102 Actual Lab Questions

You can download ActualVCE Microsoft AI-102 PDF dumps file on your desktop computer, laptop, tab, or even on your smartphone. Just download the AI-102 PDF questions file after paying affordable Prepare for your Designing and Implementing a Microsoft Azure AI Solution (AI-102) exam questions charges and start Designing and Implementing a Microsoft Azure AI Solution (AI-102) exam preparation anytime and anywhere.

Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q14-Q19):

NEW QUESTION # 14

You have 1,000 scanned images of hand-written survey responses. The surveys do NOT have a consistent layout. You have an Azure subscription that contains an Azure AI Document Intelligence resource named Aldoc1.

You open Document Intelligence Studio and create a new project.

You need to extract data from the survey responses. The solution must minimize development effort.

To where should you upload the images, and which type of model should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 15

You are building a customer support chatbot.

You need to configure the bot to identify the following:

- * Code names for internal product development

- * Messages that include credit card numbers

The solution must minimize development effort.

Which Azure Cognitive Service for Language feature should you use for each requirement? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

The chatbot needs to recognize two different kinds of information:

- * Code names for internal product development

- * These are not standard entities like "locations" or "organizations" that prebuilt NER can detect.

- * You need to train a custom model to recognize internal terms or codenames (for example, "Project Falcon").

- * The correct Azure Cognitive Service for Language feature is Custom Named Entity Recognition (Custom NER), which allows defining and training entity categories specific to your business.

- * Messages that include credit card numbers

- * Credit card numbers are sensitive data falling under Personally Identifiable Information (PII).

- * Azure Cognitive Service for Language provides a PII detection feature that automatically identifies and masks sensitive information such as credit card numbers, SSNs, and phone numbers.

- * This minimizes development effort since it is prebuilt and ready to use.

Correct Answer Mapping:

- * Identify code names for internal product development # Custom named entity recognition (NER)

- * Identify messages that include credit card numbers # Personally Identifiable Information (PII) detection

- * Custom Named Entity Recognition in Azure AI Language

- * PII detection in Azure AI Language

NEW QUESTION # 16

You have 100 chatbots that each has its own Language Understanding model.

Frequently, you must add the same phrases to each model.

You need to programmatically update the Language Understanding models to include the new phrases.

How should you complete the code? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

NEW QUESTION # 17

You are building a natural language model.
You need to enable active learning.
What should you do?

- A. Add show-all-intents=true to the prediction endpoint query.
- **B. Add log=true to the prediction endpoint query.**
- C. Enable speech priming.
- D. Enable sentiment analysis.

Answer: B

NEW QUESTION # 18

You are building a chatbot by using the Microsoft Bot Framework Composer. You have the dialog design shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 19

.....

Success in the Designing and Implementing a Microsoft Azure AI Solution (AI-102) certification exam helps people update their skills. Many aspirants don't find updated Microsoft AI-102 practice test questions and fail the final test. This failure in the Microsoft AI-102 Exam leads to a loss of money and time. If you are also planning to attempt the Designing and Implementing a Microsoft Azure AI Solution (AI-102) exam and are confused about where to prepare yourself for it then you are at the right place.
