And you will be more confident as you know the inform of the CSCP Exam and the questions and answers.

APICS Certified Supply Chain Professional Sample Questions (Q126-Q131):

NEW QUESTION # 126

A company finds that one of its warehouses is out of capacity to store products. Expanding the physical size of the warehouse is not an option. The most appropriate solution would be to increase the:

- A. inventory days of supply of fast-moving items
- B. inventory turn of slow-moving items.

- C. use of break-bulk warehousing.
- D. cash-to-cash cycle of slow-moving items.

Answer: B

Explanation:

When a warehouse reaches its capacity and expanding the physical space is not an option, increasing the inventory turn of slow-moving items is the most appropriate solution. Here's why:

* Inventory Turn: This measures how frequently inventory is sold and replaced over a period. Increasing inventory turn means reducing the amount of time products stay in the warehouse.

* Slow-Moving Items: These items contribute significantly to storage space issues. By focusing on increasing the turn rate of these items, you can free up space for faster-moving goods.

* Efficient Use of Space: By increasing the turnover of slow-moving items, you avoid the need for additional storage space and ensure that the warehouse is utilized more effectively.

* Improved Cash Flow: Higher inventory turnover rates help in converting stock into cash more quickly, improving the company's liquidity. In essence, managing slow-moving inventory more efficiently helps to optimize the use of existing warehouse space without the need for physical expansion.

NEW QUESTION # 127

Which supply chain activity would improve the cash flow cycle time of a manufacturing firm?

- A. The manufacturer increases both revenue and profit by adding additional customers in regions not served in the past
- B. The manufacturer takes ownership of the inventory at the customer's retail outlet via a customer mandated vendor-managed inventory (VMI) program.
- C. The manufacturer reduces transit time on inventory owned by the firm through an effective lean program.
- D. As part of a strategic alliance, the manufacturer agrees to decrease net payment terms on the supplier's contracts

Answer: C

NEW QUESTION # 128

When an importer and manufacturer are operating in a free trade zone, payment of a customs duty is triggered when products are:

- A. stored.
- B. distributed.
- C. assembled.
- D. returned.

Answer: B

NEW QUESTION # 129

A company manufactures special products for select customers. When demand for these products drops, the manufacturer can switch the production line to a commodity-type product that can be sold on the open market at reduced terms to generate cash. The company is executing a corporate strategy that is based on:

- A. forecast accuracy.
- B. customer focus and alignment.
- C. multiple upstream supply chains.
- D. multiple downstream channels.

Answer: C

Explanation:

Section: Fundamentals of Supply Chain Management
