CompTIA Data+ Exam (2025) Sample Questions (Q44-Q49):

NEW QUESTION # 44
A data analyst needs to provide a weekly sales report for the Chief Financial Officer. Which of the following delivery methods is the most appropriate?

- A. A granular daily report in a dashboard
- B. A detailed text document
- C. A high-level email
- D. A spreadsheet with raw data

Answer: C

Explanation:
This question pertains to the Visualization and Reporting domain, focusing on report delivery methods for a specific audience. The Chief Financial Officer (CFO) needs a weekly sales report, suggesting a concise, executive-level summary.
* A granular daily report in a dashboard (Option A): Daily granularity is too frequent for a weekly report, and a dashboard might be too interactive for a CFO's needs.
* A detailed text document (Option B): A detailed document is too lengthy for a CFO, who typically needs a summary.
* A spreadsheet with raw data (Option C): Raw data requires further analysis, which isn't appropriate for an executive-level report.
* A high-level email (Option D): A high-level email provides a concise summary of weekly sales, tailored for an executive like a CFO, making it the most appropriate delivery method.
The DA0-002 Visualization and Reporting domain emphasizes "translating business requirements to form the appropriate visualization," and a high-level email is best for delivering a weekly summary to a CFO.

NEW QUESTION # 45
Which of the following is business intelligence software?

- A. Notepad++
- B. SAS
- C. Tableau
- D. Python

Answer: C

Explanation:
This question falls under the Visualization and Reporting domain, focusing on identifying tools used for business intelligence (BI), which typically involves data visualization and reporting.
* SAS (Option A): SAS is a statistical analysis software, not primarily a BI tool focused on visualization.
* Python (Option B): Python is a programming language, not a BI software, though it can be used for data analysis with libraries.
* Notepad++ (Option C): Notepad++ is a text editor, not a BI tool.
* Tableau (Option D): Tableau is a leading BI software designed for data visualization, dashboards, and reporting, making it the correct choice.
The DA0-002 Visualization and Reporting domain includes understanding "the appropriate visualization in the form of a report or dashboard," and Tableau is a recognized BI tool for this purpose.

NEW QUESTION # 46
A product goes viral on social media, creating high demand. Distribution channels are facing supply chain issues because the testing and training models that are used for sales forecasting have not encountered similar demand. Which of the following best describes this situation?

- A. Model bias
- B. Data drift
- C. Skewing
- D. Incorrect sizing

Answer: B

Explanation:

This question pertains to theData Analysisdomain, focusing on issues with forecasting models. The scenario describes a sudden change in demand (viral product) that the model couldn't predict because it hasn't seen similar patterns before.

* Model bias (Option A): Model bias occurs when a model systematically favors certain outcomes due to flawed training data, but this scenario is about a change in data patterns, not bias.

* Data drift (Option B): Data drift occurs when the statistical properties of the data change over time (e.

g., sudden high demand due to virality), causing the model to perform poorly because it was trained on different patterns, which fits the scenario.

* Incorrect sizing (Option C): This term is vague and not a standard concept in data analysis for this context.

* Skewing (Option D): Skewing refers to data distribution asymmetry, not a change in data patterns affecting model performance.

The DA0-002 Data Analysis domain includes understanding "applying the appropriate descriptive statistical methods," and data drift is a key concept in forecasting when data patterns change unexpectedly.

NEW QUESTION # 47

Which of the following best describes an assessment a data analyst would use to validate that the number of records in a dataset matches the expected results?

- A. Stress test
- B. Source control
- C. Unit test
- D. Health check

Answer: C

Explanation:

This question pertains to theData Governancedomain, focusing on data quality validation techniques. The task is to validate that the number of records matches expectations, which requires a specific type of assessment.

* Source control (Option A): Source control (e.g., Git) manages code versions, not dataset validation.

* Unit test (Option B): A unit test checks a specific component of a process, such as verifying that the number of records in a dataset matches the expected count, making it the best fit.

* Stress test (Option C): Stress tests evaluate system performance under load, not record counts.

* Health check (Option D): A health check monitors system status but isn't specific to validating record counts.

The DA0-002 Data Governance domain includes "data quality control concepts," and unit tests are a standard method for validating specific data outcomes like record counts.

NEW QUESTION # 48

A data analyst needs to get an accurate idea of how data components are automated. Which of the following types of documentation should the analyst review first?

- A. Data flow diagram
- B. Data explainability report
- C. Data dictionary
- D. Data lineage

Answer: A

Explanation:

This question pertains to the Data Concepts and Environments domain, focusing on documentation for understanding data processes. The analyst needs to understand automation of data components, which involves data movement and processes.

* Data flow diagram (Option A): A data flow diagram (DFD) visualizes how data moves through systems, including automated processes, making it the best starting point.

* Data explainability report (Option B): This is related to AI/ML model transparency, not data automation.

* Data dictionary (Option C): A data dictionary defines data elements, not how they're automated.

* Data lineage (Option D): Data lineage tracks data origin and transformations but doesn't focus on automation processes.

The DA0-002 Data Concepts and Environments domain includes understanding "data schemas and dimensions," and a data flow diagram is key for visualizing automation.
