

Pass Guaranteed Quiz 2026 Fortinet High Hit-Rate NSE8_812 Actual Braindumps

2026 Latest ValidExam NSE8_812 PDF Dumps and NSE8_812 Exam Engine Free Share: <https://drive.google.com/open?id=1ET0906nF8EbCzzqV0EGBVdvrls85AXsf>

Using a smartphone, you may go through the Fortinet NSE8_812 dumps questions whenever and wherever you desire. The NSE8_812 PDF dumps file is also printable for making handy notes. ValidExam has developed the online Fortinet NSE8_812 practice test to help the candidates get exposure to the actual exam environment. By practicing with web-based Fortinet NSE8_812 Practice Test questions you can get rid of exam nervousness. You can easily track your performance while preparing for the Fortinet NSE 8 - Written Exam (NSE8_812) exam with the help of a self-assessment report shown at the end of Fortinet NSE8_812 practice test.

The Fortinet NSE8_812 exam consists of 60 multiple-choice questions that are to be completed in 120 minutes. The questions are designed to test the candidate's understanding of advanced security concepts and their ability to apply this knowledge to real-world scenarios. NSE8_812 Exam also includes scenario-based questions that require the candidate to analyze a given situation and provide the best course of action.

Exam Fortinet NSE8_812 Study Solutions, New NSE8_812 Practice Questions

PDF design has versatile and printable material for Fortinet NSE8_812 certification, so you all can breeze through the Fortinet NSE8_812 exam without any problem. You can get to the PDF concentrate on material from workstations, tablets, and cell phones for the readiness of Fortinet NSE 8 - Written Exam (NSE8_812) (NSE8_812) exam.

Fortinet NSE8_812 Certification Exam is designed to test the skills and knowledge of network security professionals who are looking to advance their careers to the next level. Fortinet NSE 8 - Written Exam (NSE8_812) certification is part of the Fortinet Network Security Expert (NSE) program, which is a comprehensive training and certification program that covers all aspects of network security. The NSE8_812 exam focuses on the advanced skills required to design, implement, and manage complex network security solutions using Fortinet products.

Fortinet NSE8_812 Certification Exam is a written exam that is designed to validate the skills and knowledge of network security professionals who work with Fortinet products and solutions. NSE8_812 exam is intended for those who have a strong understanding of network security concepts and who have experience with Fortinet solutions. Passing NSE8_812 exam is an important milestone for those who want to demonstrate their expertise in network security and to advance their careers in this field.

Fortinet NSE 8 - Written Exam (NSE8_812) Sample Questions (Q40-Q45):

NEW QUESTION # 40

A customer is planning on moving their secondary data center to a cloud-based IaaS. They want to place all the Oracle-based systems Oracle Cloud, while the other systems will be on Microsoft Azure with ExpressRoute service to their main data center. They have about 200 branches with two internet services as their only WAN connections. As a security consultant you are asked to design an architecture using Fortinet products with security, redundancy and performance as a priority.

Which two design options are true based on these requirements? (Choose two.)

- A. Two ExpressRoute services to the main data center are required to implement SD-WAN between a FortiGate VM in Azure and a FortiGate device at the data center edge
- B. Use FortiGate VM for IPSEC over ExpressRoute, as traffic is not encrypted by Azure.
- C. Branch FortiGate devices must be configured as VPN clients for the branches' internal network to be able to access Oracle services without using public IPs.
- D. Systems running on Azure will need to go through the main data center to access the services on Oracle Cloud.

Answer: B,C

Explanation:

* A. Systems running on Azure will need to go through the main data center to access the services on Oracle Cloud. This is because the Oracle Cloud is not directly connected to the Azure Cloud. The traffic will need to go through the main data center in order to reach the Oracle Cloud.

* C. Branch FortiGate devices must be configured as VPN clients for the branches' internal network to be able to access Oracle services without using public IPs. This is because the Oracle Cloud does not allow direct connections from the internet. The traffic will need to go through the FortiGate devices in order to reach the Oracle Cloud.

The other options are not correct.

* B. Use FortiGate VM for IPSEC over ExpressRoute, as traffic is not encrypted by Azure. This is not necessary. Azure does encrypt traffic over ExpressRoute.

* D. Two ExpressRoute services to the main data center are required to implement SD-WAN between a FortiGate VM in Azure and a FortiGate device at the data center edge. This is not necessary. A single ExpressRoute service can be used to implement SD-WAN between a FortiGate VM in Azure and a FortiGate device at the data center edge.

NEW QUESTION # 41

Refer to the exhibit, which shows a multi-region SD-WAN architecture.

Given this scenario, which two statements are true? (Choose two.)

- A. If iBGP is used, cross-regional spoke-to-hub shortcuts cannot be used.
- B. If eBGP is used, ADVPN can be established for branch-to-branch traffic across regions.
- C. If iBGP is used, cross-regional spoke-to-hub shortcuts can be established.
- D. If eBGP is used, ADVPN can be established only for branch-to-branch traffic within each region.

Answer: D

NEW QUESTION # 42

A FortiGate deployment contains the following configuration:

What is the result of this configuration?

- **A. Route-maps for VDOM SERVICES are excluded from HA configuration synchronization**
- B. Route-maps from VDOM SERVICES are available in all other VDOMs
- C. Route-maps from the Root VDOM configuration are available in VDOM SERVICES
- D. Route-maps are not configurable in VDOM SERVICES

Answer: A

Explanation:

<https://docs.fortinet.com/document/fortigate/7.2.4/administration-guide/105611>

NEW QUESTION # 43

Refer to the exhibit, which shows an SD-WAN configuration.

You configured the SD-WAN from Branch1 to the HUB and enabled packet duplication. You later notice that the traffic is not being duplicated. In this scenario, what is causing this problem?

- **A. Traffic cannot be duplicated over multiple zones.**
- B. Packet duplication is not enabled on the HUB side.
- C. There is a mismatch in the FortiOS version between Branch1 and HUB.
- D. Packet duplication did not occur because an interface is out of SLA.

Answer: A

NEW QUESTION # 44

Refer to the exhibit.

You have deployed a security fabric with three FortiGate devices as shown in the exhibit. FGT_2 has the following configuration:

FGT_1 and FGT_3 are configured with the default setting. Which statement is true for the synchronization of fabric-objects?

- A. Objects from the root FortiGate will not be synchronized to any downstream FortiGate.
- B. Objects from the root FortiGate will only be synchronized to FGT_2.
- **C. Objects from the root FortiGate will only be synchronized to FGT_3.**
- D. Objects from the FortiGate FGT_2 will be synchronized to the upstream FortiGate.

Answer: C

Explanation:

<https://docs.fortinet.com/document/fortigate/6.4.0/new-features/520820/improvements-to-synchronizing-objects-across-the-security-fabric-6-4-4>
