Certification CPIM-8.0 Book Torrent - Practice CPIM-8.0 Test Online

Many of the candidates like the Soft version of our CPIM-8.0 exam questions. The software of CPIM-8.0 guide torrent boosts varied self-learning and self-assessment functions to check the results of the learning. The software can help the learners find the weak links and deal with them. Our CPIM-8.0 Exam Questions boost timing function and the function to stimulate the exam. Our product sets the timer to stimulate the exam to adjust the speed and keep alert. So it is worthy for you to buy our CPIM-8.0 exam questions.

APICS CPIM-8.0 Exam Syllabus Topics:

| Topic | Details |
|-------|---------|
| | |

| | |
|---------|--|
| Topic 1 | <ul style="list-style-type: none"> • Supply: This module tests the competencies of Procurement Specialists in managing supply chains effectively. It involves creating master schedules for production planning, maintaining these schedules over time, material requirements planning (MRP), capacity requirements planning (CRP), supplier management practices, and purchasing strategies during product life cycle changes. A key skill measured here is "validating master schedules." |
| Topic 2 | <ul style="list-style-type: none"> • Quality, Technology, and Continuous Improvement: This section assesses skills of Quality Assurance Specialists, focusing on quality assurance methodologies enhanced by technology to drive continuous improvement efforts. A key skill measured here is "enhancing quality metrics." |
| Topic 3 | <ul style="list-style-type: none"> • Inventory: The inventory module evaluates the skills of Inventory Controllers, covering inventory planning principles such as determining optimal stock levels based on costs versus benefits analysis metrics like ABC classification systems used globally today along with itemized inventory control mechanisms ensuring efficient stock turnover rates while minimizing holding costs. Distribution: This section measures the abilities of Logistics Coordinators, focusing on distribution network design principles that optimize replenishment orders efficiently while considering reverse logistics practices aimed at reducing waste through proper disposal methods according to environmental regulations. |
| Topic 4 | <ul style="list-style-type: none"> • Detailed Schedules: This section assesses the skills of Production Planners by focusing on detailed scheduling processes for production or service delivery environments. It includes methods like PAC (Programmable Automation Controller) scheduling techniques to manage detailed production timelines efficiently across different materials required for manufacturing or service delivery processes. |
| Topic 5 | <ul style="list-style-type: none"> • Supply Chains and Strategy: This section of the exam measures the skills of Supply Chain Managers and covers various aspects related to supply chains, including their interaction with the environment and strategic objectives. It delves into developing organizational strategies, functional strategies, performance monitoring using KPIs, risk management, capital equipment management, and sustainability strategies. A key skill assessed here is "analyzing market trends." |
| Topic 6 | <ul style="list-style-type: none"> • Demand: This section evaluates the abilities of Demand Analysts in managing demand through forecasting techniques. It explores sources of demand data for accurate forecasting and evaluating forecast performance to improve future predictions. One important skill evaluated is "forecasting demand accurately." |

APICS Certified in Planning and Inventory Management (CPIM 8.0) Sample Questions (Q525-Q530):

NEW QUESTION # 525

- A. Something one does
- B. Something one knows
- C. Something one has
- **D. Something one is**

Answer: D

NEW QUESTION # 528

A life cycle assessment (LCA) would be used to determine:

- A. how an item should be scheduled.
- B. If risk pooling would reduce inventory investment.
- C. the length of a long-term agreement.
- **D. environmental aspects and impacts.**

Answer: D

Explanation:

A life cycle assessment (LCA) is a method of evaluating the environmental impacts of a product or service throughout its life cycle, from raw material extraction to disposal or recycling¹. LCA can help to identify opportunities for reducing environmental impacts, improving resource efficiency, and enhancing customer value². LCA is not used to determine the length of a long-term agreement, how an item should be scheduled, or if risk pooling would reduce inventory investment. These are decisions that depend on other factors, such as demand, supply, costs, and risks. References:
