

AEE CEM Certified Questions: Certified Energy Manager (CEM) - VCEdumps Products Prepare for your Exam in Short Time

BTW, DOWNLOAD part of VCEdumps CEM dumps from Cloud Storage: <https://drive.google.com/open?id=1qxbnpjbPcmpT2-ak4uk0GOHrgVMiA5wQ>

For candidates who buy CEM test materials online, they may care more about the privacy protection. We can ensure you that your personal information such as your name and email address will be protected well if you choose us. Once the order finishes, your personal information will be concealed. Furthermore, CEM exam braindumps are high-quality, and we can help you pass the exam just one time. We promise that if you fail to pass the exam, we will give you full refund. If you have any questions for CEM Exam Test materials, you can contact with us online or by email, we will give you reply as quickly as we can.

Budget-friendly CEM study guides have been created by VCEdumps because the registration price for the AEE CEM exam is already high. You won't ever need to look up information in various books because our AEE CEM Real Questions are created with that in mind. We provide 365 days free upgrades.

HOT CEM Certified Questions 100% Pass | Trustable AEE Certified Energy Manager (CEM) Exam Discount Voucher Pass for sure

Keeping in mind all these benefits, we ensure you can pass the Certified Energy Manager (CEM) CEM exam on your maiden attempt with the help of our exceptional AEE CEM dumps material. Our dedicated and committed team takes feedback from over

90,000 experts worldwide in the AEE CEM Dumps field to update our product.

AEE Certified Energy Manager (CEM) Sample Questions (Q46-Q51):

NEW QUESTION # 46

An energy-saving project saves \$30,000 per year. The project life is 10 years and the company minimum annual rate of return (MARR) is 15%. How much can the project cost and still be cost effective?

- A. \$188,343
- B. \$198,992
- C. \$201,123
- D. \$150,570
- E. \$165,903

Answer: E

NEW QUESTION # 47

A facility replaces a natural gas heating system rated at 10,000 kJ/h and 80% efficiency with an electric heat pump rated at 10,000 kJ/h and a coefficient of performance (COP) of 2.3. Will this project also reduce the annual energy utilization index (EUI) for the facility?

- A. Yes
- B. No

Answer: A

Explanation:

The Energy Utilization Index (EUI) is measured as total energy consumption per unit area.

Step 1: Compare Energy Inputs for Both Systems

* Existing Natural Gas System:

* Heating output: 10,000 kJ/h

* Efficiency: 80%

* Required input energy

A screenshot of a math test AI-generated content may be incorrect.

The screenshot displays a comparison of energy inputs for two heating systems. At the top, a calculation for the natural gas system is shown: $\frac{10,000}{0.80} = 12,500 \text{ kJ/h}$. Below this, a bulleted list for the 'Electric Heat Pump' includes: 'Heating output: 10,000 kJ/h', 'COP: 2.3', and 'Required input energy:'. Next to the last bullet, a calculation is shown: $\frac{10,000}{2.3} = 4,347.8 \text{ kJ/h}$. A section titled 'Step 2: Determine Energy Savings' follows, containing two bullet points: 'The heat pump requires 4,347.8 kJ/h, which is significantly lower than the 12,500 kJ/h required by the gas system.' and 'Since less total energy is consumed, the EUI will decrease.' The final conclusion states: 'Thus, the correct answer is A. Yes.'

NEW QUESTION # 48

The International Performance Measurement and Verification Protocol (IPMVP) has how many categories (method options) to determine the performance of an energy- or water-consuming system?

- A. 3 Options
- B. 5 Options
- C. 2 Options
- D. 6 Options
- E. 4 Options

Answer: E

NEW QUESTION # 49

Which of the following is NOT included in commissioning documentation?

- A. Financing payment structure reports
- B. Equipment operations and maintenance manuals
- C. Original facility and equipment design intent
- D. As-built drawings
- E. Equipment control sequence documentation

Answer: A

Explanation:

Commissioning documentation, per AEE CEM and ASHRAE Guideline 0, focuses on ensuring systems are designed, installed, operated, and maintained as intended.

Included commissioning documentation typically consists of:

- * Original facility and equipment design intent (OPR/BOD)
- * As-built drawings
- * Equipment control sequence documentation
- * Operations & Maintenance (O&M) manuals

Financing payment structure reports are related to project finance or performance contracting, not commissioning.

NEW QUESTION # 50

Natural gas costs \$4.80/GJ. How much does it cost to heat 500 liters of water from 18°C to 50°C using a natural gas water heater with an efficiency of 85%? [The efficiency and fuel price are both based on HHV.

The specific heat of water (C) is 4.2 kJ/kg-°C.]

- A. \$1.25
- B. \$1.44
- C. \$0.25
- D. \$0.76
- E. \$0.38

Answer: D

Explanation:

To calculate the cost of heating water using natural gas:

Step 1: Compute Energy Required to Heat the Water

Given:

* Mass of water = 500 L = 500 kg

* Temperature rise (ΔT) = 50°C - 18°C = 32°C

* Specific heat of water (C_p) = 4.2 kJ/kg-°C

Energy Required (Q) = $m \times C_p \times \Delta T$

= $500 \times 4.2 \times 32$

= 67,200 kJ = 67.2 MJ

Step 2: Convert Energy Requirement to GJ

$$67.2 \text{ MJ} = 0.0672 \text{ GJ}$$

Step 3: Adjust for Water Heater Efficiency (85%)

$$\text{Input Energy Required} = \frac{0.0672}{0.85} = 0.0791 \text{ GJ}$$

Step 4: Compute Cost

$$\text{Total Cost} = 0.0791 \times 4.80 = 0.76 \text{ USD}$$

Thus, the correct answer is C. \$0.76.

NEW QUESTION # 51

.....

Take advantage of the VCEdumps's AEE training materials to prepare for the exam, let me feel that the exam have never so easy to pass. This is someone who passed the examination said to us. With VCEdumps AEE CEM Exam Certification training, you can sort out your messy thoughts, and no longer twitchy for the exam. VCEdumps have some questions and answers provided free of charge as a trial. If I just said, you may be not believe that. But as long as you use the trial version, you will believe what I say. You will know the effect of this exam materials.
