Sie können den kürzesten Weg zum Erfolg der CBCI Prüfung finden, der Ihnen helfen, BCI CBCI Prüfung mit guter Note bestanden. Das ist ja BCI CBCI Dumps von ITZert. Wenn Sie diese CBCI Prüfung sehr leicht bestehen wollen, probieren Sie bitte diese Dumps.

BCI Certificate of the Business Continuity Institute (CBCI) CBCI Prüfungsfragen mit Lösungen (Q87-Q92):

87. Frage

The professional practice that aims to measure the competence of individuals, team cohesiveness and the effectiveness of Business

Continuity (BC) capability is:

- A. Enabling Solutions
- B. Solutions Design
- C. Analysis
- **D. Validation**

Antwort: D

Begründung:

In CBCI 7.0 (based on BCI GPG 7.0), Validation (PP6) is the professional practice that confirms whether the BCMS meets the objectives set out in policy and whether the organization can actually perform response and recovery as intended. Validation does this through exercising, maintenance, and review, which collectively test and measure real-world performance-how competent individuals are in their roles, how well teams coordinate under pressure, and whether capabilities (plans, tools, procedures, resources) work to the required standard.

Solutions Design (PP4) selects strategies and solutions, but it does not measure competence. Analysis (PP3) identifies requirements (impacts, priorities, targets) and informs what should be validated. Enabling Solutions (PP5) implements solutions and develops response structures and plans, but the act of measuring team cohesiveness and capability effectiveness happens through validation activities-especially exercises and post-activity reviews that identify lessons learned and improvement actions.

88. Frage

Which type of review provides an evaluation of the Business Continuity Management System (BCMS) outputs against the requirements or expectations to determine whether Business Continuity is incorporated into every task undertaken through the BCMS?

- **A. Quality Assurance (QA)**
- B. Performance Appraisal
- C. External Audit
- D. Post-incident Review

Antwort: A

Begründung:

The CBCI 7.0 course identifies Quality Assurance (QA) reviews as evaluations that assess whether BCMS processes and outputs meet defined standards and requirements. QA examines whether Business Continuity principles and practices are effectively embedded into organizational tasks and workflows. Unlike performance appraisals (individual focus) or post-incident reviews (event focus), QA provides systematic assurance that Business Continuity is integrated consistently and effectively throughout the BCMS lifecycle.

External audits verify compliance but QA focuses on continuous process improvement.

89. Frage

Which type of review provides an evaluation of the Business Continuity Management System (BCMS) outputs against the requirements or expectations to determine whether Business Continuity is incorporated into every task undertaken through the BCMS?

- **A. Quality Assurance (QA)**
- B. Performance Appraisal
- C. External Audit
- D. Post-incident Review

Antwort: A

Begründung:

The CBCI 7.0 course identifies Quality Assurance (QA) reviews as evaluations that assess whether BCMS processes and outputs meet defined standards and requirements. QA examines whether Business Continuity principles and practices are effectively embedded into organizational tasks and workflows. Unlike performance appraisals (individual focus) or post-incident reviews (event focus), QA provides systematic assurance that Business Continuity is integrated consistently and effectively throughout the BCMS lifecycle. External audits verify compliance but QA focuses on continuous process improvement.

90. Frage

Which of the following will determine the way that an organization uses Business Impact Analysis (BIA)?

- A. Feedback from risk management professionals
- B. The outcomes of exercises testing existing BC plans
- C. Consultation with internal and external stakeholders on their views of priorities and risks
- **D. The size, complexity and type of organization**

Antwort: D

Begründung:

In CBCI 7.0 / GPG 7.0, BIA is a core Analysis technique, but it is not "one size fits all." The depth, method, and tooling used for BIA are determined primarily by the organization's size, complexity, and type, because these factors dictate how products/services are delivered, how many activities and dependencies exist, how centralized or distributed operations are, and how much formalization is needed to produce consistent outputs. The BCI GPG Lite explicitly notes that implementation should suit "organizational size and complexity," which directly applies to how BIA is performed (e.g., workshops vs. questionnaires, single-layer vs. multi-layer BIA, degree of consolidation, number of stakeholder groups involved). (thebci.org) Stakeholder consultation (A) provides valuable input but doesn't "determine the way" BIA is used as strongly as organizational characteristics do. Exercise outcomes (C) inform validation and improvements, not the fundamental BIA approach. Risk management feedback (D) can help align approaches, but BIA design is primarily shaped by organizational structure and complexity. Therefore, B is correct.

91. Frage

What should an organization do when it does not yet have fully developed Business Continuity (BC) solutions, response structures, and Business Continuity plans in place?

- A. Conduct an initial Business Impact Analysis (BIA)
- B. Implement a "go to" strategy and acquire the required resources, equipment, and services when disruption occurs
- **C. Develop and implement an interim crisis management plan**
- D. Outsource the response to a Business Continuity service provider when a crisis or disruption occurs

Antwort: C

Begründung:

When an organization lacks fully developed BC solutions, response structures, or plans, the CBCI 7.0 course recommends the immediate development and implementation of an interim crisis management plan. This plan serves as a temporary framework to manage disruptions while the comprehensive BCMS is being established. An interim plan prioritizes rapid response capability, outlining essential roles, responsibilities, and immediate actions to stabilize incidents. Conducting a BIA is important but follows initial crisis preparedness. Outsourcing or reactive procurement of resources without a foundational plan risks ad hoc responses and inefficiency. Establishing an interim plan ensures the organization is not unprepared during the transition towards a mature BCMS.

92. Frage

.....

Haben Sie keine gute Methode, BCI CBCI Zertifizierungsprüfungen vorzubereiten? BCI CBCI Zertifizierungsprüfung ist eine der bedeutendsten Zertifizierung bei IT-Zertifizierungen. Seit Jahren hat IT-Branchen die Aufmerksamkeit der ganzen Welt gewonnen. Und es wird auch ein unverzichtbarer Bestandteil des modernen Lebens. Und BCI Zertifizierungen sind schon international anerkannt. Deshalb entwickeln viele IT-Fachleute ihre Kenntnisse und Fähigkeiten durch BCI exam. Und CBCI Zertifizierungsprüfung ist eine der wichtigsten Prüfung. Diese Zertifizierung kann Leuten größere Interessen bringen.
