Quiz Microsoft Pass-Sure AZ-120 - Interactive Planning and Administering Microsoft Azure for SAP Workloads EBook

In order to cater to different kinds of needs of candidates, we offer three versions for AZ-120 training materials for you to select. Each version has its own advantage, and you can choose the most suitable one in accordance with your own needs. AZ-120 PDF version is printable, and you can print it into paper if you like. AZ-120 Soft test engine can stimulate the real exam environment, so that you can build up your confidence for the exam. AZ-120 Online test engine is convenient and easy to learn, and it supports offline proactive. You can also have a review of what you have learned through AZ-120 Online test engine.

Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q259-Q264):

NEW QUESTION # 259
You have an SAP on Azure landscape. You need to gather the following metrics:
* The network latency between an SAP NetWeaver server and an SAP HANA server.
* The throughput and latency of the storage subsystem on Windows Server and Linux platforms What should you use for each

metric? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 260

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation:
Box 1: Yes
The SAP Azure Enhanced Monitoring Extension builds on top of the Azure Diagnostic extension, which stores its data in an Azure Storage account that you specify.
Box 2: Yes
The Set-AzVMAEMExtension cmdlet updates the configuration of a virtual machine to enable or update the support for monitoring for SAP systems that are installed on the virtual machine. The cmdlet installs the Azure Enhanced Monitoring (AEM) extension that collects the performance data and makes it discoverable for the SAP system.
The -OSType specifies the OS. Either Windows or Linux.
Box 3: Yes
References:
https://docs.microsoft.com/en-us/azure/azure-monitor/platform/diagnostics-extension-overview
https://docs.microsoft.com/en-us/powershell/module/az.compute/set-azvmaemextension

NEW QUESTION # 261

Your on-premises network contains SAP and non-SAP applications. ABAP-based SAP systems are integrated with IDAP and use user name/password-based authentication for logon.
You plan to migrate the SAP applications to Azure.
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 262

You plan to deploy an SAP environment on Azure that will use Azure Availability Zones.
Which load balancing solution supports the deployment?

- A. Azure Standard Load Balancer
- B. Azure Application Gateway v1 SKU
- C. Azure Basic Load Balancer

Answer: A

Explanation:
When you deploy Azure VMs across Availability Zones and establish failover solutions within the same Azure region, some restrictions apply:
You can't use an Azure Basic Load Balancer to create failover cluster solutions based on Windows Server Failover Clustering or Linux Pacemaker. Instead, you need to use the Azure Standard Load Balancer SKU.

Topic 1, Contoso Ltd

Existing Environment
Active Directory
The network contains an on-premises Active Directory domain named ad.contoso.com. User email addresses use a domain name of contoso.com.
SAP Environment
The current SAP environment contains the following components:
SAP Solution Manager
SAP ERP Central Component (SAP ECC)
SAP Supply Chain Management (SAP SCM)
SAP application servers that run Windows Server 2008 R2
SAP HANA database servers that run SUSE Linux Enterprise Server 12 (SLES 12) Problem Statements Contoso identifies the following issues in its current environment:
The SAP HANA environment lacks adequate resources.
The Windows servers are nearing the end of support.
The datacenters are at maximum capacity.
Requirements
Planned Changes
Contoso identifies the following planned changes:
Deploy Azure Virtual WAN.
Migrate the application servers to Windows Server 2016.
Deploy ExpressRoute connections to all of the offices and manufacturing facilities.
Deploy SAP landscapes to Azure for development, quality assurance, and production.
All resources for the production landscape will be in a resource group named SAPProduction.
Business goals
Contoso identifies the following business goals:
Minimize costs whenever possible.
Migrate SAP to Azure without causing downtime.
Ensure that all SAP deployments to Azure are supported by SAP.
Ensure that all the production databases can withstand the failure of an Azure region.
Ensure that all the production application servers can restore daily backups from the last 21 days.
Technical Requirements
Contoso identifies the following technical requirements:
Inspect all web queries.
Deploy an SAP HANA cluster to two datacenters.
Minimize the bandwidth used for database synchronization.
Use Active Directory accounts to administer Azure resources.
Ensure that each production application server has four 1-TB data disks.
Ensure that an application server can be restored from a backup created during the last five days within 15 minutes.
Implement an approval process to ensure that an SAP administrator is notified before another administrator attempts to make changes to the Azure virtual machines that host SAP.
It is estimated that during the migration, the bandwidth required between Azure and the New York office will be 1 Gbps. After the migration, a traffic burst of up to 3 Gbps will occur.
Proposed Backup Policy
An Azure administrator proposes the backup policy shown in the following exhibit.
Azure Resource Manager Template
An Azure administrator provides you with the Azure Resource Manager template that will be used to provision the production application servers.

NEW QUESTION # 263
You are deploying SAP on Azure. The database server will use SAP HANA. The application servers will run Windows Server. You need to test network latency and throughput between the frontend SAP servers and the database servers. Which three tools can you use to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. SockPerf
- B. IOMeter
- C. HCMT
- D. NIPING
- E. Iatte.exe

Answer: A,C,D

If you are working all the time, and you hardly find any time to prepare for the AZ-120 exam, then PDFDumps present the smart way to AZ-120 exam prep for the exam. You can always prepare for the AZ-120 test whenever you find free time with the help of our AZ-120 Pdf Dumps. We have curated all the AZ-120 questions and answers that you can view the exam Microsoft AZ-120 PDF brain dumps and prepare for the exam. We guarantee that you will be able to pass the AZ-120 in the first attempt.
