NEW QUESTION # 55

Which SAP applications can be used for forecasting in Supply Chain Planning? Note: There are 2 correct answers to this question.

- A. Supply Chain Management (SCM)
- B. Material Requirements Planning (MRP)
- C. Integrated Business Planning (IBP)
- D. Capacity Requirements Planning (CRP)

Answer: A,C

Explanation:

In SAP S/4HANA and its broader ecosystem, forecasting for supply chain planning is supported by advanced tools:

* Integrated Business Planning (IBP)(A): SAP IBP is a cloud-based solution designed for advanced supply chain planning, including demand forecasting. It uses statistical models, machine learning, and real-time data integration to predict demand, making it a primary tool for forecasting (e.g., SAP IBP for Demand).

* Supply Chain Management (SCM)(B): SAP SCM, particularly its Advanced Planning and Optimization (APO) module (e.g., Demand Planning - DP), provides robust forecasting capabilities using historical data and planning algorithms. While SAP is transitioning APO functionalities to IBP, SCM remains relevant in on-premise or hybrid setups.

Material Requirements Planning (MRP)(C) in S/4HANA focuses on material planning based on existing demand (e.g., PIRs or sales orders) and does not perform forecasting itself; it relies on inputs from Demand Management. Capacity Requirements Planning (CRP)(D) deals with capacity leveling and scheduling, not demand forecasting. These distinctions are clear in SAP's supply chain planning documentation.

NEW QUESTION # 56
