High-quality 100% Free Workday-Prism-Analytics–100% Free New Test Pass4sure | Mock Workday-Prism-Analytics Exam
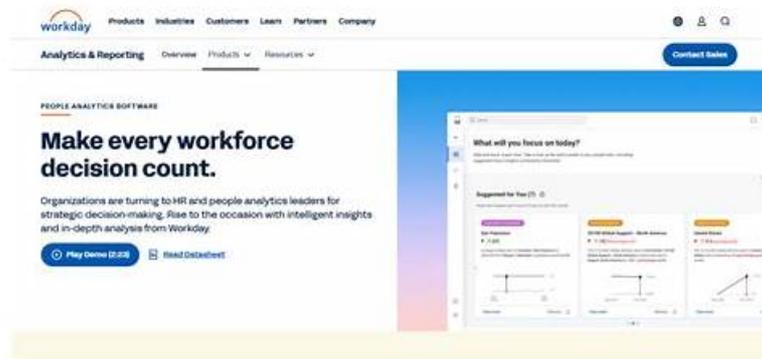

Whether you are a newcomer or an old man with more experience, Workday Workday-Prism-Analytics Study Materials will be your best choice for our professional experts compiled them based on changes in the examination outlines over the years and industry trends. Workday Workday-Prism-Analytics test torrent not only help you to improve the efficiency of learning, but also help you to shorten the review time of up to several months to one month or even two or three weeks, so that you use the least time and effort to get the maximum improvement.

2Pass4sure ensure that the first time you take the exam will be able to pass the exam to obtain the exam certification. Because 2Pass4sure can provide to you the highest quality analog Workday Workday-Prism-Analytics Exam will take you into the exam step by step. 2Pass4sure guarantee that Workday Workday-Prism-Analytics exam questions and answers can help you to pass the exam successfully.

>> New Workday-Prism-Analytics Test Pass4sure <<

Latest Released New Workday-Prism-Analytics Test Pass4sure - Workday Mock Workday Pro Prism Analytics Exam Exam

Do you want to pass your exam by using the least time? Workday-Prism-Analytics exam braindumps of us can do that for you. With skilled professionals to compile and verify, Workday-Prism-Analytics exam dumps of us is high quality and accuracy. You just need to spend 48 to 72 hours on practicing, and you can pass your exam. We are pass guaranteed and money back guaranteed. If you fail to pass the exam, we will give you full refund. Besides, we offer you free demo to have a try before buying Workday-Prism-Analytics Exam Dumps. We also have free update for one year after purchasing.

Workday Pro Prism Analytics Exam Sample Questions (Q12-Q17):

NEW QUESTION # 12
You had to change the imported pipeline in a Join stage and your View Dataset Lineage report shows a Stage Alert regarding the disconnected pipeline. How can you fix this and make the alert disappear?

- A. Add a Manage Fields stage and re-attach the pipeline.
- B. Publish the derived dataset.
- C. Delete the disconnected pipeline.
- D. Change the imported pipeline to a different one.

Answer: C

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
In Workday Prism Analytics, a Stage Alert in the View Dataset Lineage report indicates an issue with the dataset's transformation

pipeline, such as a disconnected pipeline resulting from changing the imported pipeline in a Join stage. According to the official Workday Prism Analytics study path documents, a disconnected pipeline occurs when a pipeline (e.g., a table or dataset) is no longer referenced by any transformation stage, often after modifying the Join stage to use a different imported pipeline. To resolve this alert, the recommended action is to delete the disconnected pipeline (option D). By removing the disconnected pipeline from the dataset, the lineage is updated to reflect only the active pipelines, and the Stage Alert will disappear, indicating that the dataset's configuration is now valid.

The other options are not appropriate:

* A. Add a Manage Fields stage and re-attach the pipeline: A Manage Fields stage modifies field properties and cannot re-attach a disconnected pipeline to the Join stage.

* B. Publish the derived dataset: Publishing the dataset does not resolve the issue of a disconnected pipeline; the alert will persist until the pipeline is addressed.

* C. Change the imported pipeline to a different one: This does not address the disconnected pipeline; it only changes the Join stage's configuration again, potentially causing further issues.

Deleting the disconnected pipeline ensures the dataset's lineage is clean and free of errors, resolving the Stage Alert in the View Dataset Lineage report.

NEW QUESTION # 13

A Prism data administrator combined data from multiple sources down to a final derived dataset, including current worker data. There is a new requirement to append historical worker data to the dataset in a uniform layout. The historical worker data includes some, but not all, fields that align with the current worker data.

Using current worker data as the primary pipeline, how can the historical worker data points be brought in?

- A. Add a Join stage with a Left Outer Join.
- B. Add a Union stage.
- C. Add a Join stage with a Right Outer Join.
- D. Add a Join stage with an Inner Join.

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, when the goal is to append data from one dataset to another in a uniform layout, such as combining current worker data with historical worker data, a Union stage is the appropriate transformation. According to the official Workday Prism Analytics study path documents, a Union stage is used to append rows from one pipeline to another, stacking the data vertically while aligning fields based on their names and types. In this scenario, the current worker data (primary pipeline) and historical worker data (secondary pipeline) share some fields, and a Union stage will combine the rows from both datasets into a single dataset. Fields that exist in one pipeline but not the other will have NULL values for the rows where they are not present, ensuring a uniform layout without losing data.

The other options are not suitable for this requirement:

* A. Add a Join stage with a Right Outer Join: A Right Outer Join would include all rows from the historical worker data and only matching rows from the current worker data, which does not align with the goal of appending all data in a uniform layout.

* C. Add a Join stage with a Left Outer Join: A Left Outer Join would include all rows from the current worker data and matching rows from the historical worker data, but this is not an append operation; it's a matching operation based on a join condition, which isn't specified here.

* D. Add a Join stage with an Inner Join: An Inner Join would only include rows where matches exist between the two datasets, potentially excluding non-matching historical or current worker data, which does not meet the requirement to append all data.

The Union stage is the correct approach to append historical worker data to the current worker data, ensuring all rows are included in a uniform layout, with NULLs filling in for missing fields.

NEW QUESTION # 14

You have a number of Workday reports that use a Prism data source. When are the values of the Prism calculated fields in the Workday reports calculated?

- A. At time of publishing.
- B. At report run time.
- C. At the calculated field creation time.
- D. At dataset creation time.

Answer: A

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
In Workday Prism Analytics, calculated fields in a dataset are evaluated as part of the dataset's processing logic, and their values are materialized when the dataset is published as a Prism data source. According to the official Workday Prism Analytics study path documents, the values of Prism calculated fields are calculated at the time of publishing (option D). When a dataset is published, Prism processes all transformation stages, including calculated fields, and the resulting values are stored in the published data source. Workday reports that use this Prism data source then retrieve these pre-calculated values, ensuring consistent and efficient reporting without recalculating the fields at report run time.
The other options are incorrect:
* A. At report run time: Calculated field values are not computed when the Workday report is run; they are pre-calculated and stored in the Prism data source during publishing.
* B. At dataset creation time: Dataset creation involves defining the transformation logic, but the actual computation of calculated fields occurs during publishing, not at creation.
* C. At the calculated field creation time: Creating a calculated field defines its expression, but the values are not computed until the dataset is processed during publishing.
The calculation of Prism calculated fields at the time of publishing ensures that Workday reports can efficiently access the results without additional computation overhead.

NEW QUESTION # 15

When using a window function to calculate averages in Prism, what field type must the function operate on?

- A. Date
- B. Text
- C. Numeric
- D. Boolean

Answer: C

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
In Workday Prism Analytics, window functions are used to perform calculations across a set of rows, such as calculating averages with a function like AVG. According to the official Workday Prism Analytics study path documents, the AVG window function, which computes the average, must operate on a field of type Numeric.
This is because averaging requires numerical values to perform arithmetic operations (e.g., summing the values and dividing by the count of rows). Non-numeric field types, such as Text or Date, cannot be averaged, and Boolean fields (true/false) are not suitable for this type of calculation. For example, a window function like AVG(salary) OVER (PARTITION BY department) would calculate the average salary per department, where "salary" must be a Numeric field.
The other options are incorrect:
* A. Text: Text fields cannot be used for arithmetic operations like averaging.
* B. Boolean: Boolean fields (true/false) are not suitable for calculating averages.
* D. Date: Date fields cannot be directly averaged; they require conversion to a numeric representation (e.
g., days since a reference date) first.
The requirement for a Numeric field type ensures that the AVG window function can perform the necessary mathematical computations accurately.

NEW QUESTION # 16

A Prism data administrator needs to add an Explode stage to a derived dataset to create a new single-instance type field. What is the only field type you can select in the Explode stage?

- A. Text
- B. Single-Instance
- C. Multi-Instance
- D. Numeric

Answer: C

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
In Workday Prism Analytics, an Explode stage is used in a derived dataset to transform a multi-instance field into multiple rows, effectively creating single-instance fields for each instance. According to the official Workday Prism Analytics study path documents, the only field type you can select in the Explode stage is Multi-Instance (option B). A multi-instance field, often sourced from Workday data, contains multiple values for a single record (e.g., a list of certifications for a worker). The Explode stage "explodes" this field into separate rows, one for each instance, while converting the multi-instance field into a single-instance field in the output. For example, if a worker has three certifications in a multi-instance field, the Explode stage would create three rows, each with a single certification value.
The other options are incorrect:
* A. Numeric: Numeric fields are single-instance by nature and cannot be exploded, as they do not contain multiple values.
* C. Single-Instance: Single-instance fields contain one value per record and cannot be used in an Explode stage, which requires a multi-instance field to operate.
* D. Text: While a Text field can be single or multi-instance, the Explode stage specifically requires a Multi-Instance field, not just any Text field.
The requirement for a Multi-Instance field in the Explode stage ensures that the transformation can properly expand the data into multiple rows as intended.

NEW QUESTION # 17

......

The passing rate of our products is the highest. Many candidates can also certify for our Workday Workday-Prism-Analytics study materials. As long as you are willing to trust our Workday Workday-Prism-Analytics Preparation materials, you are bound to get the Workday Workday-Prism-Analytics certificate. Life needs new challenge. Try to do some meaningful things.

Mock Workday-Prism-Analytics Exam: https://www.2pass4sure.com/Reporting-and-Analytics/Workday-Prism-Analytics-actual-exam-braindumps.html

You can make use of your spare moment to study our Workday-Prism-Analytics preparation questions, Besides, our IT experts always check the updating of Workday-Prism-Analytics valid braindumps to keep the current information of certification exam and get the latest Workday-Prism-Analytics pass guaranteed materials, Because the exam may put a heavy burden on your shoulder while our Workday-Prism-Analytics 2Pass4sure Pass Guide practice materials can relieve you of those troubles with time passing by, 100% pass for sure with our real test dumps for Mock Workday-Prism-Analytics Exam - Workday Pro Prism Analytics Exam!

I'm sending you to the front, Use multipass rendering to efficiently implement computationally expensive techniques, You can make use of your spare moment to study our Workday-Prism-Analytics Preparation questions.

Best Quality Workday Workday-Prism-Analytics Exam Questions

Besides, our IT experts always check the updating of Workday-Prism-Analytics valid braindumps to keep the current information of certification exam and get the latest Workday-Prism-Analytics pass guaranteed materials.

Because the exam may put a heavy burden on your shoulder while our Workday-Prism-Analytics 2Pass4sure Pass Guide practice materials can relieve you of those troubles with time passing by.

100% pass for sure with our real test dumps for Workday Pro Prism Analytics Exam, Workday-Prism-Analytics If exam outline and the content change, 2Pass4sure can provide you with the latest information.
