

Ping Identity PAP-001 Latest Exam Experience, Sample PAP-001 Test Online

Where can you purchase the best quality and cheapest PAP-001 exam dumps? Dumps4PDF will meet all examinees' needs with cheaper price and high quality PAP-001 exam dumps and answers. The sales of PAP-001 certification training materials on Dumps4PDF site is in front of the same work areas. The passing rate of our PAP-001 VCE Dumps is 100%. In a word, choosing Dumps4PDF for you to pass PAP-001 test is equal to choose success.

Ping Identity PAP-001 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Installation and Initial Configuration: This section of the exam measures skills of System Engineers and reviews installation prerequisites, methods of installing or removing PingAccess, and securing configuration database passwords. It explains the role of run.properties entries and outlines how to set up a basic on-premise PingAccess cluster.
Topic 2	<ul style="list-style-type: none">• Policies and Rules: This section of the exam measures the skills of Security Administrators and focuses on how PingAccess evaluates paths for applying policies and resources. It covers the role of different rule types, their configuration, and the implementation of rule sets and rule set groups for consistent policy enforcement.
Topic 3	<ul style="list-style-type: none">• Integrations: This section of the exam measures skills of System Engineers and explains how PingAccess integrates with token providers, OAuth and OpenID Connect configurations, and site authenticators. It also includes the use of agents and securing web, API, and combined applications through appropriate integration settings.
Topic 4	<ul style="list-style-type: none">• Security: This section of the exam measures skills of Security Administrators and highlights how to manage certificates and certificate groups. It covers the association of certificates with virtual hosts or listeners and the use of administrator roles for authentication management.

Quick Preparation with Ping Identity PAP-001 Questions

The software boosts varied self-learning and self-assessment functions to check the results of the learning. The software can help the learners find the weak links and deal with them. Our PAP-001 exam torrent boosts timing function and the function to stimulate the exam. Our product sets the timer to stimulate the exam to adjust the speed and keep alert. Our PAP-001 study questions have simplified the complicated notions and add the instances, the stimulation and the diagrams to explain any hard-to-explain contents.

Ping Identity Certified Professional - PingAccess Sample Questions (Q47-Q52):

NEW QUESTION # 47

An administrator must onboard a new application from the application team. The application has multiple paths that will need different rules. What would be the first step in this process?

- A. Identity mapping
- **B. Application**
- C. Web session
- D. Resource

Answer: B

Explanation:

All onboarding in PingAccess begins with defining an Application. Once the application exists, the administrator can define Resources within it and assign different rules to those resources.

Exact Extract:

"Before you can configure resources and rules, you must first create an application in PingAccess."

- * Option A (Identity Mapping) may be required later but not the first step.
- * Option B (Web Session) can be shared but is not the first onboarding step.
- * Option C (Application) is correct - the starting point for onboarding.
- * Option D (Resource) comes after creating the application.

Reference: PingAccess Administration Guide - Creating Applications

NEW QUESTION # 48

A change is made to the configuration that prevents user access to an application. No one claims to have made the change. Which log file should the administrator use to determine who made the change?

- A. pingaccess_agent_audit.log
- B. pingaccess.log
- C. pingaccess_engine_audit.log
- **D. pingaccess_api_audit.log**

Answer: D

Explanation:

All administrative API calls that change PingAccess configuration are logged in pingaccess_api_audit.log.

This allows administrators to track who made configuration changes.

Exact Extract:

"The pingaccess_api_audit.log file contains entries for all administrative API calls and is used to audit configuration changes."

- * Option A (pingaccess.log) contains runtime system messages but not detailed API audit entries.
- * Option B (pingaccess_engine_audit.log) is specific to engine request/response audit logging.
- * Option C (pingaccess_agent_audit.log) is used for PingAccess Agent traffic auditing, not administrative changes.
- * Option D (pingaccess_api_audit.log) is correct - it tracks admin API modifications.

Reference: PingAccess Administration Guide - Log Files

NEW QUESTION # 49

Which two protocols does PingAccess use for authentication and authorization? (Choose 2 answers.)

- **A. OIDC**
- B. SAML
- **C. OAuth2**
- D. WS-Fed
- E. WS-Trust

Answer: A,C

Explanation:

PingAccess is designed to work with modern identity protocols. It does not support legacy WS-* protocols directly.

Exact Extract:

"PingAccess integrates with OAuth 2.0 and OpenID Connect (OIDC) to provide authentication and authorization for web and API resources."

* Option A (SAML) is incorrect - PingAccess does not natively consume SAML assertions; SAML can be used indirectly via PingFederate.

* Option B (WS-Fed) is not supported.

* Option C (WS-Trust) is not supported.

* Option D (OAuth2) is correct - used for authorization and token validation.

* Option E (OIDC) is correct - used for user authentication and sessions.

Reference: PingAccess Administration Guide - Supported Protocols

NEW QUESTION # 50

How many administrators are supported using HTTP Basic Authentication in the Administrative Console?

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

Explanation:

When using HTTP Basic Authentication (admin.auth=native), PingAccess only supports a single administrative account (the default admin user). For multiple administrators, SSO integration (e.g., OIDC) is required.

Exact Extract:

"When admin authentication is set to native (HTTP Basic), only one administrative user is supported. For multiple admins, configure UI authentication with an OIDC provider."

* Option A (1000) is incorrect.

* Option B (1) is correct - only one basic auth admin account.

* Option C (10) and Option D (100) are incorrect.

Reference: PingAccess Administration Guide - Admin Authentication

NEW QUESTION # 51

An administrator is preparing to rebuild an unrecoverable primary console and must promote the replica admin node. Which two actions must the administrator take? (Choose 2 answers.)

- **A. Change `pa.operational.mode` to `CLUSTERED_CONSOLE` on the replica admin node.**
- B. Change `pa.operational.mode` to `CLUSTERED_CONSOLE_REPLICA` on one of the engine nodes.
- C. Restart the replica admin node.
- **D. Modify `bootstrap.properties` and set `theengine.admin.configuration.host` value to point at the replica admin node.**
- E. Restart all nodes in the cluster.

Answer: A,D

Explanation:

From the "Promoting the replica administrative node" documentation:

* Exact Extract:

"Open the <PA_HOME>/conf/run.properties file in a text editor. Locate the pa.operational.mode line and change the value from CLUSTERED_CONSOLE_REPLICA to CLUSTERED_CONSOLE. These properties are case-sensitive. Do not restart the replica node during the promotion process." Ping Identity Documentation

* Also from the documentation under "Next steps" / manual promotion / "Using the admin API ..." "When promoting the replica, there is also mention of setting the new host-port in the primary admin configuration so that engine nodes and configuration references now point to the promoted replica. One of the API properties is editRunPropertyFile (to flip the mode), another is editPrimaryHostPort, which causes the primary-admin host setting to be updated." Ping Identity Documentation Using those facts:

Why C is correct:

* Option C says: Change pa.operational.mode to CLUSTERED_CONSOLE on the replica admin node.

This directly matches the documented manual promotion step: switch pa.operational.mode from CLUSTERED_CONSOLE_REPLICA to CLUSTERED_CONSOLE. Ping Identity Documentation+1

* This is essential for promoting the replica to primary console.

Why E is correct:

* Option E: Modify bootstrap.properties and set the engine.admin.configuration.host value to point at the replica admin node. While the documentation doesn't always name the exact property engine.admin.

configuration.host, the "promote via admin API" includes updating the "primary host:port" in the configuration so that engine nodes' configuration queries (or whatever is used by engines) point to the new primary. This maps to ensuring that engine nodes know that the promoted replica is now the administrative node. This requiring modifying the bootstrap or configuration that engine nodes use to find the administrative host is essential. Ping Identity Documentation Why the other options are incorrect:

* A. Change pa.operational.mode to CLUSTERED_CONSOLE_REPLICA on one of the engine nodes. No.

Engine nodes should have pa.operational.mode = CLUSTERED_ENGINE, not console modes.

CLUSTERED_CONSOLE_REPLICA is an admin/replica console mode, not applicable for engines.

docs.ping.directory+2 Ping Identity Documentation+2

* B. Restart all nodes in the cluster. The documentation explicitly says do not restart the replica node during the promotion process because restart can cause file corruption or failure to properly promote.

Only certain restarts are needed after configuration updates. So restarting all nodes is not a correct required action. Ping Identity Documentation

* D. Restart the replica admin node. As above, for manual promotion, a restart of the replica admin node is not required (and is even discouraged during the promotion process). The change in run.properties is detected without restarting. Ping Identity Documentation Reference: Ping Access Reference Guide - Promoting the replica administrative node / Manually promoting the replica administrative node Ping Identity Documentation+1

NEW QUESTION # 52

.....

We promise you will pass the PAP-001 exam and obtain the PAP-001 certificate successfully with our help of PAP-001 exam questions. According to recent survey of our previous customers, 99% of them can achieve their goals, so believe that we can be the helping hand to help you achieve your ultimate goal. Besides we have high-quality PAP-001 Test Guide for managing the development of new knowledge, thus ensuring you will grasp every study points in a well-rounded way.
