Are you still worried about not passing the Plat-Admn-202 exam? Do you want to give up because of difficulties and pressure when reviewing? You may have experienced a lot of difficulties in preparing for the exam, but fortunately, you saw this message today because our well-developed Plat-Admn-202 Study Materials will help you tide over all the difficulties. As a multinational company, our Plat-Admn-202 study materials serve candidates from all over the world. No matter which country you are currently in, you can be helped by our Plat-Admn-202 study materials.

Salesforce Plat-Admn-202 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • App Deployment: This section of the exam measures the skills of Release Managers and Salesforce Administrators and covers the application lifecycle from planning through deployment. It requires determining the appropriate strategy when working with different sandboxes and managing milestones during development. Candidates must know when to use change sets and how to troubleshoot deployment issues. The section also includes understanding the implications of using unmanaged versus managed packages and selecting the correct deployment plan for various business scenarios.
Topic 2	<ul style="list-style-type: none"> • Salesforce Fundamentals: This section of the exam measures the skills of Salesforce Administrators and Junior Salesforce Consultants and covers the essential concepts needed to understand how Salesforce works at a foundational level. It focuses on recognizing when to use declarative tools versus programmatic customization, determining when AppExchange apps extend org capabilities, and understanding key methods for managing object, record, and field access. It also evaluates your ability to choose the right sharing model based on business needs and to apply reporting tools effectively, including report types and dashboards. Additionally, the domain reviews how to optimize the mobile experience through actions and layouts, and how Chatter can be used to support collaboration.
Topic 3	<ul style="list-style-type: none"> • Business Logic and Process Automation: This section of the exam measures the skills of Process Automation Specialists and Salesforce Administrators and covers the key tools Salesforce provides to automate and enforce business logic. It focuses on using formula fields, roll-up summary fields, and validation rules to meet defined requirements. Candidates must also understand approval processes and know how to select the right automation tool to prevent conflicts or errors. The domain emphasizes evaluating business requirements and recommending automation solutions that maintain system stability and accuracy.

Topic 4	<ul style="list-style-type: none"> • User Interface: This section of the exam measures the skills of Salesforce UI Designers and Lightning App Builders and covers the ways in which Salesforce interfaces can be customized to improve usability. It includes understanding available options for UI customization and demonstrating when to apply custom buttons, links, and actions. The domain also distinguishes between declarative and programmatic methods for incorporating Lightning components in applications, ensuring that the right approach is selected for different user interface needs.
Topic 5	<ul style="list-style-type: none"> • Data Modeling and Management: This section of the exam measures the skills of Data Analysts and Salesforce Administrators and covers the core principles of designing and maintaining Salesforce data structures. It requires selecting the correct data model in various scenarios and understanding relationship types and how they influence reporting, record access, and the user interface. It also tests knowledge of field data types and the operational impact of changing them. The section includes evaluating the use of Schema Builder and understanding the considerations involved in importing and exporting data across internal and external sources.

Plat-Admn-202 Latest Test Simulations - Plat-Admn-202 Test Cram Review

When you first contact our software, different people will have different problems. Maybe you are not comfortable with our Plat-Admn-202 exam question and want to know more about our products and operations. As long as you have questions, you can send e-mail to us, we have online staff responsible for ensuring 24-hour service to help you solve all the problems about our Plat-Admn-202 test prep. After you purchase our Plat-Admn-202 quiz guide, we will still provide you with considerate services. Maybe you will ask whether we will charge additional service fees. We assure you that we are focused on providing you with guidance about our Plat-Admn-202 Exam Question, but all services are free. If you encounter installation problems, we will have professionals to provide you with remote assistance. Of course, we will humbly accept your opinions on our Plat-Admn-202 quiz guide. If you have good suggestions to make better use of our Plat-Admn-202 test prep, we will accept your proposal and make improvements. Each of your progress is our driving force. We sincerely serve for you any time.

Salesforce Certified Platform App Builder Sample Questions (Q12-Q17):

NEW QUESTION # 12

Northern Trail Outfitters wants the field sales team to only see the accounts that they own Separate North American and European marketing teams should only see accounts in their respective regions. The inside sales team needs to see all accounts in Salesforce. How can this be accomplished?

- **A. Set the Organization-Wide Default to Private for accounts. Create criteria- based sharing rules for each marketing team, and create an Inside Sales Team profile with the "View All" setting for accounts.**
- B. Set the Organization-Wide Default to Private for accounts. Create permission sets for each marketing team, and create an Inside Sales Team profile with the "View All" setting for accounts.
- C. Set the Organization-Wide Default to Public for accounts. Create profiles for each marketing team, and create an Inside Sales Team role that is at the top of the Role Hierarchy
- D. Set the Organization-Wide Default to Public for accounts. Create criteria- based sharing rules for each marketing team, and create an Inside Sales Team permission set with the "View All" setting for accounts,

Answer: A

Explanation:

Set the Organization-Wide Default to Private for accounts and create criteria-based sharing rules for each marketing team are the actions that can accomplish the requirement of restricting access to accounts based on region and role. Setting the Organization-Wide Default to Private will limit access to accounts to only owners and administrators. Creating criteria-based sharing rules will grant additional access to accounts based on region for each marketing team. Creating an Inside Sales Team profile with the "View All" setting for accounts will grant access to all accounts for the inside sales team. Update the Sales profile, update the organization-wide defaults to Public for accounts, create profiles for each marketing team, create permission sets for each marketing team, and create an Inside Sales Team role are not necessary or sufficient actions for this requirement.

NEW QUESTION # 13

A production org includes custom objects containing confidential information. A sandbox is needed that includes data records, excludes all of the confidential objects, and can be refreshed weekly. What steps should an App Builder take to meet these requirements?

- A. Create a Full Sandbox and use a sandbox template
- B. Create a Developer Pro Sandbox and schedule Data loader to download selected object data weekly.
- C. Create a Developer Sandbox and schedule Data loader to download selected object data weekly.
- **D. Create a Partial Copy Sandbox and use a sandbox template.**

Answer: D

Explanation:

The steps that the app builder should take to meet these requirements are creating a Partial Copy Sandbox and using a sandbox template. A Partial Copy Sandbox can include data records, exclude confidential objects, and be refreshed weekly. A sandbox template can specify which objects and data are copied from the production org to the sandbox org. Option A is incorrect because creating a Full Sandbox and using a sandbox template is not necessary for this requirement, as Full Sandboxes copy all data and metadata from the production org and can only be refreshed every 29 days. Option B is incorrect because creating a Developer Pro Sandbox and scheduling Data Loader to download selected object data weekly is not feasible for this requirement, as Developer Pro Sandboxes do not include data records by default and Data Loader cannot be scheduled to run weekly. Option D is incorrect because creating a Developer Sandbox and scheduling Data Loader to download selected object data weekly is not feasible for this requirement, as Developer Sandboxes do not include data records by default and Data Loader cannot be scheduled to run weekly.

NEW QUESTION # 14

DreamHouse Realty (DHR) recently acquired Cloud Kicks (CK), a company that is still on Salesforce Classic. DHR is keeping the CK Salesforce org; however, it will migrate this org to Lightning Experience.

Where should the app builder find prebuilt resources to help with this project and overall adoption?

- **A. AppExchange**
- B. Flow Builder
- C. Lightning Object Creator
- D. Import Wizard

Answer: A

Explanation:

AppExchange is a marketplace where app builders can find prebuilt resources to help with migration and adoption projects. AppExchange offers apps, components, solutions, and consulting services that can assist with moving from Classic to Lightning Experience. Import Wizard, Lightning Object Creator, and Flow Builder are not sources of prebuilt resources, but tools for data import, object creation, and automation respectively.

NEW QUESTION # 15

Universal Containers wants to deliver purchased containers to remote construction address. In these cases, the customers will supply UC with the coordinates to the location.

What type of field should the app builder use to capture this information?

- A. External Lookup
- B. Number
- C. Text
- **D. Geo location**

Answer: D

Explanation:

A geolocation field can be used to capture the coordinates of a location in latitude and longitude. This field type can also be used in reports, formulas, validation rules, and Apex

NEW QUESTION # 16

At Universal Containers, each admin and developer use a separate developer pro sandbox. Configuration and code are then migrated to a partial data sandbox for combination and initial testing. Once approved the configuration and code are then migrated to a full sandbox for final load and regression testing before going to production.

When should the full sandbox be refreshed?

- A. After each push from the partial data sandbox.
- B. After user acceptance testing is complete.
- C. After a new user is added to production.
- **D. After each major release to production.**

Answer: D

Explanation:

The full sandbox should be refreshed after each major release to production. This way, the full sandbox will have the most updated data and metadata from the production org, and can be used for final load and regression testing before the next release. Option A is incorrect because refreshing the full sandbox after user acceptance testing is complete is not necessary, as user acceptance testing can be done in the partial data sandbox or the production org. Option B is incorrect because refreshing the full sandbox after each push from the partial data sandbox is not necessary, as the full sandbox can receive configuration and code changes from the partial data sandbox without refreshing. Option D is incorrect because refreshing the full sandbox after a new user is added to production is not necessary, as adding a new user does not affect the data and metadata in the full sandbox.

NEW QUESTION # 17

.....

Are you still feeling distressed for expensive learning materials? Are you still struggling with complicated and difficult explanations in textbooks? Do you still hesitate in numerous tutorial materials? Plat-Admn-202 study guide can help you to solve all these questions. Plat-Admn-202 certification training is compiled by many experts over many years according to the examination outline of the calendar year and industry trends. Plat-Admn-202 Study Guide not only apply to students, but also apply to office workers; not only apply to veterans in the workplace, but also apply to newly recruited newcomers. Plat-Admn-202 guide torrent uses a very simple and understandable language, to ensure that all people can read and understand.
