required to perform functional consulting tasks for Microsoft Dynamics 365 Supply Chain Management. MB-335 Exam covers topics such as configuring and implementing supply chain management, managing inventory and logistics, and optimizing manufacturing processes.

## Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Sample Questions (Q81-Q86):

### NEW QUESTION # 81

A company is implementing Dynamics 365 Supply Chain Management. The company is a subcontractor that produces subassemblies for two major customers, CustomerA and CustomerB. The company prioritizes CustomerA production orders to start on Mondays. The production orders may take several days to complete. CustomerB's orders are produced throughout the week, after CustomerA orders are completed. Work in process (WIP) must be calculated and consolidated for CustomerA and CustomerB respectively on the financial reports.

You need to configure the production requirements.

What should you configure? To answer, drag the appropriate configurations to the correct requirements. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

### NEW QUESTION # 82

A company uses Dynamics 365 Supply Chain Management for its accounts receivable and accounts payable operations.

The company must issue payments to customers based on the sales quantities invoiced over a specific period.

A record must be labeled as Pending review when it is generated before anything else is done to the record.

You need to configure the system to apply this labeling functionality to records.

Solution: Configure a business event for the rebate creation.

Create a power automate flow for approvals to lock the record until it is approved.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

### NEW QUESTION # 83

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A manufacturing plant uses Lean processes. You plan to outsource a painting operation to a subcontracting vendor. You create a service item named SP 01 to represent the painting service.

You need to create a subcontracting activity for the painting service.

Solution:

\* Create a vendor warehouse for the subcontracting vendor.

\* Create a vendor resource and add it to a new work cell for outsource painting.

\* Create a production flow transfer activity and specify the vendor warehouse as The target warehouse.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

Explanation:

Explanation

The solution does not meet the goal. Here is the explanation:

To create a subcontracting activity for the painting service, you should use the following steps1:

Create a vendor warehouse for the subcontracting vendor. This step is correct, because you need to create a warehouse that is assigned to the vendor account and set it as vendor-managed1. This way, you can track the inventory that is located at the vendor's site.

Create a vendor resource and add it to a new work cell for outsource painting. This step is correct, because you need to create a resource that is assigned to the vendor account and add it to a resource group that represents the subcontracting work cell1. This way, you can assign the subcontracting activity to the vendor resource.

Create a production flow transfer activity and specify the vendor warehouse as the target warehouse. This step is incorrect, because you need to create a production flow process activity, not a transfer activity, for the subcontracting service1. A process activity represents an operation that transforms material into products or semi-finished goods2. A transfer activity represents a movement of material or products from one location to another2. You also need to specify the service item (SP 01) as the product of the process activity, and select the Generate license plate option on the mobile device menu item that is used for reporting as finished1.

#### NEW QUESTION # 84

An automobile manufacturer leases cars to companies for use as company cars.

A car leased to a company breaks down and requires repairs.

You must open a maintenance request and replace the car with an equivalent model until the original car is repaired and returned to the company. When the manufacture' receives and inspects the car, the replacement car can be released to the company.

You need to select the maintenance request components to use.

Which components should you use? To answer, drag the appropriate components to the correct assets. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Note: Each correct selection is worth one point.

**Answer:**

Explanation:

#### NEW QUESTION # 85

A manufacturing company uses discreet manufacturing to make skateboards. Production order picking lists are manually posted after finished good are reported as finished.

A production order has six picking lists posted. The quantities on the picking lists do not match any of the reported or finished quantities. This causes an inventory error for the raw materials. All raw material transactions must be tracked on production order and reconciled.

You need to process a single picking list for each production order.

What should you do first?

- A. Delete the six posted picking list journals.
- B. Create a counting journal to reconcile the inventory that was posted in error.
- C. Create a movement journal and select the proper account for production postings to reconcile the inventory that was posted in error.
- **D. Create a production picking list. When creating lines select option Full reversal.**

**Answer: D**

#### NEW QUESTION # 86
