## HPE0-J68 Braindumps Downloads, HPE0-J68 Cheap Dumps

RealExamFree has assembled a brief yet concise study material that will aid you in acing the HPE Storage Solutions (HPE0-J68) exam on the first attempt. This prep material has been compiled under the expert guidance of 90,000 experienced HP professionals from around the globe. RealExamFree offers the complete package that includes all exam questions conforming to the syllabus for passing the HPE Storage Solutions (HPE0-J68) exam certificate in the first try.

HPE Storage Solutions certification is valid for three years, and the candidates are required to recertify after the expiry of the certification. The recertification can be done by passing the latest version of the HPE Storage Solutions exam or by completing the required Continuing Education (CE) credits. The CE credits can be earned by attending HPE training courses, participating in HPE webinars, or by publishing HPE-related articles or books.

## HPE Storage Solutions Sample Questions (Q77-Q82):

### NEW QUESTION # 77

Which statement is true regarding the connection of extra drive enclosures to the HPE Alletra 9000 storage array with an HPE Alletra 9000 NVMe-oF 100 GbE 2-port host bus adapter?

- A. It offers a lower speed than built-in expansion ports and should be used with slower disks
- B. Alternatively, it can be used for host connectivity
- C. It can only be used if the two 100 GbE built-in ports are already populated
- D. It must be installed on every node in the second H8A slot (slot 4)

**Answer: B**

Explanation:

The HPE Alletra 9000 NVMe-oF 100 GbE 2-port host bus adapter (HBA) is a versatile component that can be used for multiple

purposes. While it is primarily designed for high-speed host connectivity, it can also be used for connecting extra drive enclosures to the HPE Alletra 9000 storage array. This flexibility allows it to serve dual roles depending on the specific requirements of the deployment, either expanding storage capacity by connecting additional enclosures or providing high-speed connectivity to hosts.

#### NEW QUESTION # 78

A customer has a 3PAR storeserv with FC and SSD drives who would like to improve the performance for random reads. Which 3PAR Storeserve feature would provide better read performance?

- A. Deduplication
- **B. Adaptive Flash Cache**
- C. Smart Cache
- D. Express Layout

**Answer: B**

Explanation:

Adaptive Flash Cache (AFC) is a feature in HPE 3PAR StoreServ arrays that improves performance for random reads by using flash storage as an extended cache. This feature is especially beneficial for workloads with high random read activity, as it accelerates read operations by storing frequently accessed data in the flash cache, reducing latency and improving overall performance.

#### NEW QUESTION # 79

You are designing an HPE MSA iSCSI for a customer.

Which components are typically part of the solution? (Choose two.)

- A. All-inclusive Multi-system software
- B. Switch zones
- **C. Drives**
- **D. SFPs**
- E. Service Processor

**Answer: C,D**

#### NEW QUESTION # 80

A solution architect is explaining RBAC concepts behind the HPE GreenLake Platform. How can the customer manage users in HPE GreenLake Platform after creating new company account?

- A. Single company can only have one account.
- **B. The creator of the company account is automatically assigned to the Account Administrator role for the organization.**
- C. HPE Support must be used to create an administrator account for the organization.
- D. The creator of the company account must create another account with Account Administrator role.

**Answer: B**

Explanation:

In the HPE GreenLake Platform, when a new company account is created, the individual who creates the account is automatically assigned the Account Administrator role. This role grants them the ability to manage users, assign roles, and control access within the HPE GreenLake environment, ensuring that they have full administrative control over the account from the outset.

### NEW QUESTION # 81

You are designing a new storage environment for a customer. They need good performance, but need to keep costs to a minimum. They have a very limited staff, and staff is concerned about learning new technologies. You plan to recommend a Nimble HF20 solution.

Which storage connectivity components should you recommend?

- A. FC switches, Nimble FC card, FC adapters for servers
- B. Ethernet switches, Nimble FC card, dedicated FC for servers
- C. FlexFabric switches, Nimble iSCSI card, FC adapters for servers
- **D. Ethernet switches, Nimble iSCSI card, dedicated NICs for servers**

**Answer: D**

Explanation:

For a customer looking for a cost-effective storage solution with good performance, while also having a limited IT staff concerned about learning new technologies, recommending Ethernet switches, a Nimble iSCSI card, and dedicated NICs for servers (Option C) is the most appropriate choice.

This configuration is cost-effective and simplifies management by using familiar Ethernet networking technology, which most IT staff are already familiar with. The Nimble iSCSI card provides the necessary storage connectivity while leveraging Ethernet infrastructure, making it easier to deploy and manage compared to Fibre Channel solutions.
