Pass Guaranteed Salesforce - AP-211 - Efficient Reliable Salesforce Health Cloud Accredited Professional Braindumps Book

Are you preparing for the Salesforce certification recently? Maybe the training material at your hands is wearisome and dull for you to study. Here Actual4Cert will give you a very intelligence and interactive AP-211 study test engine. AP-211 test engine can simulate the examination on the spot. As some statistics revealed, the bad result not only due to the poor preparation, but also the anxious mood. Now, our AP-211 Simulated Test engine can make you feel the actual test environment in advance. Besides, the high quality AP-211 valid exam dumps will help you prepare well. You can must success in the AP-211 real test.

Salesforce Health Cloud Accredited Professional Sample Questions (Q17-

Q22):

NEW QUESTION # 17

A MedTech company is implementing Health Cloud to better plan and track surgical case visits, manage device inventory, and run cycle counts.

Which data model should a consultant recommend the company use?

- **A. Inventory Management**
- B. Provider Engagement
- C. Life Sciences
- D. Intelligent Sales

Answer: A

Explanation:

The use case mentions:

Plan and track surgical case visits

Manage device inventory

Run cycle counts

These requirements directly align with the Health Cloud Inventory Management data model.

Inventory Management in Health Cloud is designed for MedTech and Life Sciences companies to track:

Surgical case planning and scheduling

Medical device and implant inventory management

Cycle counts and stock levels across facilities

It supports end-to-end surgical case tracking, ensuring the right devices are available at the right place and time.

Why not the others?

A . Life Sciences - Broader model used for clinical trials, patient programs, and pharma engagement, but not focused on surgical case + device inventory.

B . Provider Engagement - Used for managing provider relationship data (e.g., physician affiliations, facilities), not inventory or surgical planning.

C . Intelligent Sales - Focused on sales optimization and customer engagement, not surgical case or inventory management.

Salesforce Health Cloud Reference:

Salesforce Health Cloud - Inventory Management Guide:

"Use the Inventory Management data model to manage device inventory, surgical case planning, cycle counts, and medical device tracking across healthcare facilities."

NEW QUESTION # 18

An agent at a MedTech company requires a UI component that displays customer data and contains a link to create a new order.

Once clicked, the link starts a process to build a new order and displays the available products for purchase.

Which three OmniStudio capabilities are required to solve this use case?

Choose 3 answers

- **A. Flexcards**
- **B. DataRaptors**
- C. Document Generation
- D. Integration Procedures
- **E. OmniScript**

Answer: A,B,E

Explanation:

The use case describes:

A UI component to display customer data → FlexCards

A link to start a process (build a new order) → OmniScript

Retrieving and displaying available products → DataRaptors (and often Integration Procedures if orchestration is needed).

Let's map it step by step:

D . FlexCards → Used to display contextual customer data on the UI and provide clickable actions (like "Create New Order").

E . OmniScript → Guides the user through the order creation process, step by step (product selection, details, confirmation).

A . DataRaptors → Extract and load Salesforce data (e.g., retrieving available products, saving the order).

These three are the core capabilities needed.

Why not the others?

B . Integration Procedures - Helpful if the solution requires multiple data sources or orchestration, but the question doesn't explicitly state external integration or complex orchestration. If data is all within Salesforce, DataRaptors are enough.

C . Document Generation - Used to create documents (PDFs, Word, etc.), which isn't part of this order creation flow.

Salesforce Health Cloud / OmniStudio Reference:

Salesforce OmniStudio Developer Guide

"FlexCards present contextual information and actions in a UI component."

"Use OmniScripts to guide users through business processes such as creating orders."

"DataRaptors retrieve, transform, and save Salesforce data for use in OmniScripts and FlexCards."

NEW QUESTION # 19

A pharmaceutical company is looking to support patients throughout their clinical journey. One of the factors the company needs to track is the socioeconomic and cultural barriers that could hinder a patient's process.

Which Health Cloud capability should a consultant implement to fulfill this requirement?

- A. Social Determinants of Health
- B. Care Blockers
- C. Clinical Barriers
- D. Utilization management

Answer: A

Explanation:

* Tracking Socioeconomic & Cultural Barriers:

Exact Extract:

"The Social Determinants of Health data model in Health Cloud enables organizations to document and track social, cultural, and economic barriers affecting patients." Reference:

* Other Options:

Clinical Barriers, Utilization Management, and Care Blockers are not documented Health Cloud features for tracking socioeconomic/cultural barriers.

NEW QUESTION # 20

Bloomington Caregivers has decided to enable Integrated Care Management so that its end users can leverage Health Cloud Assessments. Administrators must now configure their org to be able to use Assessments.

Which three steps should the administrator take as part of the org setup to enable Assessments?

Choose 3 answers

- A. Update sharing settings in Setup.
- B. Download and Install OmniStudio.
- C. Enable users to view and complete Assessments.
- D. Enable Discovery Framework in Setup.
- E. Add the Assessment component to the Patient page.

Answer: B,C,D

NEW QUESTION # 21

A pharma customer requires a scheduling tool to book infusions with multiple steps as part of its Health Cloud implementation. It needs a solution for care coordinators to book appointments without having to manually check availability and resources themselves.

Which solution should a consultant recommend?

- A. Intelligent Appointment Management
- B. Advanced Therapy Management
- C. Salesforce Scheduler
- D. Procedure Scheduling

Answer: B
