### Palo Alto Networks Cybersecurity Practitioner Sample Questions (Q207-Q212):

#### NEW QUESTION # 207

What are two functions of User and Entity Behavior Analytics (UEBA) data in Prisma Cloud CSPM? (Choose two.)

- A. Detecting and correlating anomalies
- B. Assessing severity levels
- C. Unifying cloud provider services
- D. Identifying misconfigurations

**Answer: A,B**

Explanation:

Assessing severity levels - UEBA data helps prioritize incidents by evaluating the risk and severity based on user and entity behavior.  
Detecting and correlating anomalies - UEBA continuously analyzes activity to identify abnormal behavior and correlate anomalies that may indicate insider threats or compromised accounts.

#### NEW QUESTION # 208

Which two statements apply to the SSL/TLS protocol? (Choose two.)

- A. It provides administrator privileges to manage and control the access of network resources.
- B. It contains password characters that users enter to access encrypted data.
- C. It ensures the data that is transferred between a client and a server remains private.
- D. It is a method used to encrypt data and authenticate web-based communication.

**Answer: C,D**

Explanation:

SSL/TLS encrypts and authenticates web-based communication to ensure secure data transmission over networks. It ensures privacy by encrypting the data exchanged between a client and a server, protecting it from interception or tampering. It doesn't handle user input like passwords directly.

#### NEW QUESTION # 209

What is a reason IoT devices are more susceptible to command-and-control (C2) attacks?

- A. Increased sharing of data through the internet
- B. Higher attack surface due to mobility
- C. Decreased connection quality within a local area network
- D. Limited battery life preventing always-on security

**Answer: A**

Explanation:

IoT devices often have constant internet connectivity and increased data sharing, making them more vulnerable to command-and-control (C2) attacks. Their limited security features and exposure to external networks provide attackers more opportunities to compromise and control them remotely.

#### NEW QUESTION # 210

Which SOAR feature coordinates across technologies, security teams, and external users for centralized data visibility and action?

- A. Ticketing system
- **B. Playbooks**
- C. Integrations
- D. Case management

**Answer: B**

Explanation:

Playbooks are collections of workflows that automate and orchestrate tasks, alerts, and responses to incidents. Playbooks are triggered by rules or incidents and can coordinate across technologies, security teams, and external users for centralized data visibility and action. Playbooks can help improve the efficiency and effectiveness of security operations by reducing manual work, streamlining processes, and enhancing collaboration. #### NEW QUESTION # 211

Which tool automates remediation of a confirmed cybersecurity breach?

- A. EDR
- B. ISIM
- C. SIEM
- **D. SOAR**

**Answer: D**

Explanation:

Security Orchestration, Automation, and Response (SOAR) platforms are designed to automate the remediation of confirmed cybersecurity breaches by executing predefined response playbooks, reducing response time and manual effort during incidents.
