

100% Pass Quiz SAP - C_IBP_2502 - SAP Certified Associate - SAP IBP for Supply Chain–Valid Pass4sure

P.S. Free & New C_IBP_2502 dumps are available on Google Drive shared by PrepAwayETE: <https://drive.google.com/open?id=1ckceO4FfhWJd3rWmDVsk3a30P0QCxajj>

With many advantages such as immediate download, simulation before the real exam as well as high degree of privacy, our C_IBP_2502 actual exam survives all the ordeals throughout its development and remains one of the best choices for those in preparation for C_IBP_2502 Exam. Many people have gained good grades after using our C_IBP_2502 real dumps, so you will also enjoy the good results. Don't hesitate any more. Time and tide wait for no man. Come and buy our C_IBP_2502 exam questions!

SAP C_IBP_2502 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Key Figures & Attributes: This section of the exam measures the skills of supply chain analysts and focuses on the key figures and attributes used in planning. It covers how to define and configure key figures to ensure accurate data representation and decision-making. Candidates are also tested on their ability to manage attributes that support various planning scenarios.
Topic 2	<ul style="list-style-type: none"> • Planning Operators & Application: Jobs This section is designed for demand planners and focuses on the configuration and execution of planning operators and application jobs. It includes an understanding of how these tools automate planning processes and improve system performance. Candidates will be tested on their ability to configure and execute jobs that support various planning functions.
Topic 3	<ul style="list-style-type: none"> • Model Sales & Operations Processes: This section targets operations managers and evaluates knowledge of sales and operations planning. It covers the alignment of supply and demand, scenario planning, and decision-making processes to optimize operational efficiency. Candidates will be assessed on their ability to configure models that support strategic business goals.
Topic 4	<ul style="list-style-type: none"> • Demand Planning: This section measures the skills of demand planners and focuses on the core concepts of demand planning. It includes understanding forecasting techniques, demand sensing, and demand propagation. Candidates are tested on their ability to manage demand signals and align planning with business objectives.
Topic 5	<ul style="list-style-type: none"> • Master Data: This section is relevant to master data specialists and focuses on managing essential data for planning activities. It includes an understanding of product, location, and resource master data within SAP. Candidates will be tested on how to maintain accurate and consistent data to support planning functions.

2026 C_IBP_2502 Pass4sure | The Best 100% Free Top C_IBP_2502 Questions

C_IBP_2502 practice exam will provide you with wholehearted service throughout your entire learning process. This means that unlike other products, the end of your payment means the end of the entire transaction our C_IBP_2502 learning materials will provide you with perfect services until you have successfully passed the C_IBP_2502 Exam. And if you have any questions, just feel free to us and we will give you advice on C_IBP_2502 study guide as soon as possible.

SAP Certified Associate - SAP IBP for Supply Chain Sample Questions (Q60-Q65):

NEW QUESTION # 60

Which processes are embedded in the sample planning areas SAP6 and SAP3?

- A. SAP6 Sales and Operations Planning and Supply Planning, and SAP3 Inventory Planning
- B. SAP6 Control Tower, and SAP3 Sales and Operations Planning and Supply Planning
- C. SAP6 Demand Planning and Sensing, and SAP3 Control Tower
- **D. SAP6 Demand Planning and Sensing, and SAP3 Inventory Planning**

Answer: D

Explanation:

SAP IBP provides sample planning areas (e.g., SAPIBP1, SAP3, SAP6) with preconfigured processes to demonstrate module-specific functionality.

* SAP6: Focused on Demand Planning and Sensing, enhancing short-term demand forecasts.

* SAP3: Focused on Inventory Optimization, managing multi-stage inventory targets.

* Option A: SAP6 Control Tower, and SAP3 Sales and Operations Planning and Supply Planning This is incorrect. SAP6 is not Control Tower-specific (that's SAP8), and SAP3 focuses on Inventory Optimization, not broad S&OP or Supply Planning.

* Option B: SAP6 Demand Planning and Sensing, and SAP3 Control Tower This is incorrect. SAP3 is Inventory Optimization, not Control Tower, which is a separate module (SAP8).

* Option C: SAP6 Demand Planning and Sensing, and SAP3 Inventory Planning This is correct.

SAP6 includes Demand Planning (statistical forecasting) and DemandSensing (short-term adjustments), while SAP3 focuses on Inventory Planning (e.g., safety stock optimization), matching their official purposes per SAP IBP's sample content documentation.

* Option D: SAP6 Sales and Operations Planning and Supply Planning, and SAP3 Inventory Planning This is incorrect. SAP6 is narrower (Demand Planning/Sensing), not full S&OP or Supply Planning (more aligned with SAPIBP1). SAP3 is correct for Inventory Planning.

Thus, C accurately reflects the processes in SAP6 and SAP3, per SAP IBP's sample planning area definitions.

NEW QUESTION # 61

You need to integrate data from SAP S/4HANA and legacy ERP to SAP IBP. What are the integration tools that you can use with such a setup for data transfer? Note: There are 2 correct answers to this question.

- **A. SAP Smart Data Integration**
- B. Real-time Integration
- C. Core Interface
- **D. SAP Cloud Integration for Data Services**

Answer: A,D

Explanation:

SAP IBP integrates with SAP S/4HANA and legacy ERP systems to transfer master and transactional data, using specific tools designed for cloud-based planning.

* Option A: SAP Cloud Integration for Data Services This is correct. SAP Cloud Integration for Data Services (CI-DS) is the primary tool for integrating SAP IBP with S/4HANA and legacy systems. It supports batch data transfers (e.g., master data, key

figures) via predefined templates, as per SAP IBP's integration framework.

* Option B: SAP Smart Data Integration This is correct. SAP Smart Data Integration (SDI), part of SAP HANA, enables real-time or batch integration from S/4HANA and legacy ERPs to SAP IBP, particularly for complex data mappings, a supported method in SAP's documentation.

* Option C: Core Interface This is incorrect. Core Interface (CIF) is used in SAP ECC/APO, not SAP IBP. IBP relies on cloud-based tools like CI-DS, not ECC's CIF.

* Option D: Real-time Integration This is incorrect. "Real-time Integration" is a concept, not a specific tool. While SDI supports real-time, it's the tool itself (B), not a standalone option.

Thus, A and B (CI-DS and SDI) are the correct integration tools for SAP IBP, per official integration guides.

NEW QUESTION # 62

You set up time-series integration using SAP Cloud Integration for Data Services. During the integration process of master data, an error occurred. In the Data Integration app the job failed with the status "Fatal Error." How can you find more details about the error?

- A. Navigate to the Manage Master Data app and open the Log
- **B. Download the Initial Problem Report in the Data Integration app**
- C. Download the Rejection Report in the Data Integration app
- D. Navigate to the Master Data Workbook in Excel and open the Log

Answer: B

Explanation:

SAP Cloud Integration for Data Services (CI-DS) integrates master data into SAP IBP, with errors logged in the Data Integration Jobs app, per SAP IBP's integration documentation.

* Option A: Navigate to the Master Data Workbook in Excel and open the Log This is incorrect. The Excel Master Data Workbook doesn't provide integration job logs; it's for manual maintenance.

* Option B: Navigate to the Manage Master Data app and open the Log This is incorrect. The Manage Master Data app manages data, not integration job logs.

* Option C: Download the Initial Problem Report in the Data Integration app This is correct. The Data Integration Jobs app provides detailed error reports (e.g., "Initial Problem Report") for failed jobs like "Fatal Error," per SAP IBP's troubleshooting guides.

* Option D: Download the Rejection Report in the Data Integration app This is incorrect. The Rejection Report details rejected records, not the full error context of a "Fatal Error." Thus, C is the correct method, per SAP IBP's official integration error handling.

NEW QUESTION # 63

Which of the following data can be tracked using a change-history-enabled key figure? Note: There are 3 correct answers to this question.

- A. Scenario ID
- B. Key figure type
- **C. Modified code**
- **D. Reason code**
- **E. Attributes**

Answer: C,D,E

Explanation:

Change-history-enabled key figures in SAP IBP track modifications to values, logging details for auditability, configured in the Planning Areas app. The tracked data is defined by SAP IBP's change history functionality, per official documentation.

* Option A: Scenario ID This is incorrect. Scenario ID identifies the planning scenario, but it's not tracked in key figure change history; it's a context, not a change detail.

* Option B: Modified code This is correct. "Modified code" (likely intended as "modification code" or user ID) tracks who made the change, a standard field in SAP IBP's change log.

* Option C: Attributes This is correct. Changed attribute values (e.g., Product ID, Location ID) tied to the key figure's planning level are tracked, per SAP IBP's documentation.

* Option D: Key figure type This is incorrect. Key figure type (e.g., stored, calculated) is a configuration setting, not a dynamic value tracked in change history.

* Option E: Reason code This is correct. Reason codes (e.g., manual adjustment justification) can be logged with changes, a feature in SAP IBP's Excel UI and change history, per official guides.

Thus, B, C, and E are tracked data elements, per SAP IBP's change history capabilities.

NEW QUESTION # 64

What function would you use to configure a year-to-date calculation?

- **A. Cumulative Aggregation**
- B. Rolling Aggregation
- C. Dynamic Rolling Aggregation
- D. Last Period Aggregation

Answer: A

Explanation:

A year-to-date (YTD) calculation in SAP IBP sums values from the start of the year to the current period, a common time-series requirement.

* Option A: Rolling Aggregation This is incorrect. Rolling aggregation typically refers to a moving window (e.g., last 3 months), not a fixed YTD scope.

* Option B: Last Period Aggregation This is incorrect. Last period aggregation focuses on the most recent period, not a cumulative YTD total.

* Option C: Cumulative Aggregation This is correct. The CUMULATE function in SAP IBP (e.g., KF2 = CUMULATE(KF1)) calculates a running total from the start of the horizon (e.g., year) to each period, ideal for YTD, per SAP IBP's calculation documentation.

* Option D: Dynamic Rolling Aggregation This is incorrect. Dynamic rolling implies a flexible window, not a fixed YTD accumulation. Thus, C is the correct function for a YTD calculation, per SAP IBP's official capabilities.

NEW QUESTION # 65

.....

The pass rate is 98.75% for C_IBP_2502 study materials, and if you choose us, we can ensure you that you can pass the exam just one time. C_IBP_2502 exam dumps are high-quality and high accuracy, since we have a professional team to compile and examine the questions and answers. What's more, C_IBP_2502 exam materials have both questions and answers, and you can check your answers very conveniently after practicing. We offer you free update for one year for C_IBP_2502 Study Materials, and our system will send the latest version to your email address automatically, and you need to receive and change your learning ways according to the latest version.
