DOWNLOAD the newest BraindumpsVCE PL-400 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1zEC2baQsic8pF3OfVwkHzuDlhQCbNxEP>

If you are applying for the PL-400 certification exam, it is great to show your dedication to it. You cannot take it for granted because the Microsoft Power Platform Developer (PL-400) certification test is tough and you have to pay a good sum for appearing in it. You will lose money and time by studying with PL-400 Exam Preparation material that is not updated. So, to avoid your loss and failure in the PL-400 exam, you must prepare with actual Microsoft PL-400 questions from BraindumpsVCE.

Skills measured

- Configure Microsoft Dataverse (15-20%)
- Create a technical design (10-15%)
- Extend the platform (15-20%)
- Extend the user experience (10-15%)
- Configure business process automation (5-10%)
- Develop integrations (5-10%)

Microsoft Power Platform is becoming increasingly popular among organizations of all sizes, as it allows them to quickly build and deploy custom solutions without the need for extensive coding knowledge. As such, the demand for skilled Power Platform developers is growing rapidly, making the PL-400 exam a valuable asset for anyone looking to advance their career in this area.

To take the PL-400 exam, candidates should have experience working with the Microsoft Power Platform, as well as knowledge of programming languages such as JavaScript, TypeScript, and C#. Candidates should also have experience working with data sources such as Microsoft Excel, Microsoft SharePoint, and Microsoft Dynamics 365. PL-400 Exam consists of various topics, including designing and developing Power Apps, designing and developing Power Automate flows, creating chatbots using Power Virtual Agents, and creating reports using Power BI. Passing the exam will demonstrate to potential employers that the candidate has a strong understanding of the Microsoft Power Platform and can create custom solutions to meet business needs.

Free PDF 2026 PL-400: Newest Microsoft Power Platform Developer Valid Dumps Ppt

As we all know, it is difficult for you to prepare a Microsoft PL-400 exam by yourself. You will feel confused about some difficult knowledge. Now, you are fortunate enough to purchase our PL-400 study questions. Our study materials are compiled by professional experts. They have researched the annual real Microsoft PL-400 exam for many years.

Microsoft Power Platform Developer Sample Questions (Q90-Q95):

NEW QUESTION # 90

A travel company has a Common Data Service (CDS) environment.

The company requires the following:

- * Custom entities that track which countries/regions their clients have traveled.

- * The dates their clients traveled to these countries/regions.

You need to create the entities and relationships to meet the requirements.

Which three actions should perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct order you select.

Actions

On the main form for ContactCountry, add the lookup fields for the Contact and Country, and a date field for the visit date.

Create a 1:N relationship from Contact to the Country entity.

Create a N:N relationship from Contact to the Country entity.

Create a 1:N relationship from ContactCountry intersect entity and Country.

Create the Country entity.

On the main form for ContactCountry, add a sub grid to view the country information.

Create an intersect entity named ContactCountry and create two N:1 relationships to Contact and Country.

Create an intersect entity named ContactCountry and create two 1:N relationships to Contact and Country.

Answer Area

Answer:

Explanation:

Actions

On the main form for ContactCountry, add the lookup fields for the Contact and Country, and a date field for the visit date.

Create a 1:N relationship from Contact to the Country entity.

Create a N:N relationship from Contact to the Country entity.

Create a 1:N relationship from ContactCountry intersect entity and Country.

Create the Country entity.

On the main form for ContactCountry, add a sub grid to view the country information.

Create an intersect entity named ContactCountry and create two N:1 relationships to Contact and Country.

Create an intersect entity named ContactCountry and create two 1:N relationships to Contact and Country.

Answer Area

Create the Country entity.

Create a 1:N relationship from Contact to the Country entity.

On the main form for ContactCountry, add a sub grid to view the country information.

Explanation:

Create the Country entity.

Create a 1:N relationship from Contact to the Country entity.

On the main form for ContactCountry, add a sub grid to view the country information.

You can configure a sub-grid on a form to display a list of records or a chart.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/customize/sub-grid-properties->

NEW QUESTION # 91

A company has a Common Data Service (CDS) environment.

The following conditions must apply when accounts are reassigned:

Ownership for completed tasks that are associated with the account must not change.

Outstanding tasks must be reassigned to the new owner of the account.

You need to configure the relationship to meet the requirements.

Which settings should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Condition	Setting
Relationship Behavior type	<div>Referential</div> <div>Referential, Restrict Delete</div> <div>Parental</div> <div>Configurable Cascading</div>
Behavior for the assigned action	<div>Cascade None</div> <div>Cascade All</div> <div>Cascade Active</div> <div>Cascade User-Owned</div>

Answer:

Explanation:

Condition

Setting

Relationship Behavior type

	▼
Referential	
Referential, Restrict Delete	
Parental	
Configurable Cascading	

Behavior for the assigned action

Microsoft

	▼
Cascade None	
Cascade All	
Cascade Active	
Cascade User-Owned

NEW QUESTION # 92

You are developing an app for a sales team to record contact details in their Common Data Service (CDS) database.

The app must handle loss of network and save the data to CDS when reconnected.

The main screen of the app has a form to collect contact data and a button. The OnSelect property for the button has the following expression:

```
1. If (
2.   Connection.Connected,
3.   Path(
4.     Contacts,
5.     Defaults(Contacts),
6.     {
7.       'First Name': DataCardValue_FirstName.Text, 'Last Name': DataCardValue_LastName.Text
8.     }
9.   );
10.  Navigate(ConfirmationScreen, ScreenTransition.Fade);
11.  ;
12.  ClearCollect(
13.    LocalRecord,
14.    {
15.      'First Name': DataCardValue_FirstName.Text, 'Last Name': DataCardValue_LastName.Text
16.    }
17.  );
18.  SaveData(LocalRecord, "LocalRecord");
19.  Navigate(PendingScreen, ScreenTransition.Fade);
20. }
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
The expression saves the data to CDS when reconnecting after losing network connection.	<input type="radio"/>	<input type="radio"/>
The collection contains all contacts not saved to CDS.	<input type="radio"/>	<input type="radio"/>
The expression updates existing contacts in CDS.	<input type="radio"/>	<input type="radio"/>
The expression handles loss of connection to CDS.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
The expression saves the data to CDS when reconnecting after losing network connection.	<input checked="" type="radio"/>	<input type="radio"/>
The collection contains all contacts not saved to CDS.	<input type="radio"/>	<input checked="" type="radio"/>
The expression updates existing contacts in CDS.	<input type="radio"/>	<input checked="" type="radio"/>
The expression handles loss of connection to CDS.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION # 93

You open a canvas app in edit mode. A warning message displays as shown in the graphic.

The screenshot shows the Microsoft Power Apps editor interface. The top bar displays 'Power Apps' and a warning message: 'This app is using a connector for the Common Data Service that will not be supported past Oct 1, 2020 Learn more'. The left sidebar shows the 'Tree view' with 'Screens' and 'Components' tabs. The main canvas displays a 'Complaint Summary' form with fields for 'Company' and 'Complaint'. The 'Company' field has a dropdown menu with options: 'Litware, Inc {sample}', 'Alpine Ski House {sample}', and 'Blue Yonder Airlines {sample}'. The 'Complaint' field has a dropdown menu with options: 'Average order shipment time {sample}', 'Complete overhaul required {sample}', 'Contact Information requested {sample}', 'Contact information required {sample}', and 'Damaged during shipment {sample}'. The bottom status bar shows 'DEBUG: App width = 1356'.

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

You need to troubleshoot the warning. What should you do?

	▼
Navigate to Solution checker and view results.	
Navigate to App checker and expand the Formulas section.	
Navigate to Advanced Tools and open the Monitor.	
Navigate to Connections and add a new connection.	

 Which component should you troubleshoot?

	▼
App	
Screen1	
customHeader_1

NEW QUESTION # 94

You need to assign the minimum environmental security role to the appropriate users.

Which security roles should you use? To answer, drag the appropriate security roles to the correct users. Each security role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Security roles	Answer Area	
	User	Security role
System Administrator	UserA	Security role
System Customizer	UserB	Security role
Common Data Service User	User C	Security role
Environment Maker	All employees	Security role

Answer:

Explanation:

Security roles	Answer Area	
	User	Security role
System Administrator	UserA	Environment Maker
System Customizer	UserB	System Administrator
Common Data Service User	User C	System Customizer
Environment Maker	All employees	Common Data Service User

Explanation:

User	Security role
UserA	Environment Maker
UserB	System Administrator
User C	System Customizer
All employees	Common Data Service User

Box 1: Environment Maker

UserA must be able to create and publish Power Apps apps.

The Environment Maker role can create resources within an environment including apps, connections, custom connectors, gateways, and flows using Power Automate.

Box 2: System Administrator

UserB must be the owner of all the systems and be able to provide permissions and create all new environments.

The System Administrator has full permission to customize the system. Can view all data in the system.

Box 3: System Customizer

UserC must be able to create apps connected to the systems and update the security roles and entities.

The System Customizer has full permission to customize the system. Can only view rows for system tables that they create.

The difference between the System Administrator and System Customizer security roles is that a system administrator has read privileges on most rows in the system and can see everything. Assign the System Customizer role to someone who needs to perform customization tasks but shouldn't see any data in the system tables.

Box 4: Common Data Service User

To stay consistent with our product rebranding effort, the security role Common Data Service User is being changed to Basic User. The Basic User security role primarily contains Basic privileges for core entities where the user can write, update, and delete records that they created or owned.
