## Plat-Dev-301 Free Study Material | Plat-Dev-301 Exam Labs

This format enables you to assess your Plat-Dev-301 test preparation with a Salesforce Plat-Dev-301 certification exam. You can also customize your time and the kinds of Salesforce Plat-Dev-301 Exam Questions of the Salesforce Plat-Dev-301 practice test.

Test4Engine has formulated Plat-Dev-301 PDF questions for the convenience of Salesforce Plat-Dev-301 test takers.

## Salesforce Certified Platform Developer II - Multiple Choice Sample Questions (Q131-Q136):

### NEW QUESTION # 131

Consider the following code snippet:

- As part of the deployment cycle, a developer creates the following test class:
- When the test class runs, the assertion fails. Which change should the developer implement in the Apex test method to ensure the test method executes successfully? A)
- B)
- C)
- D)

- A. Option D
- B. Option A
- C. Option C
- **D. Option B**

**Answer: D**

Explanation:

To ensure that test methods execute successfully and are able to verify the behavior of the code, it is important to set up the proper context and to make sure that the test covers the expected outcomes accurately.

Option B is correct because enclosing the method call within `Test.startTest()` and `Test.stopTest()` ensures that any asynchronous operations are completed before the assertions are made. This is crucial when the code being tested is expected to perform operations that may run after the initial transaction, such as future methods, queueable jobs, or batch operations.

Options A, C, and D are incorrect because they do not address the issue of ensuring that all operations are completed before the assertion is made. Option A incorrectly suggests modifying the test setup code, while Options C and D suggest changes that are not related to the test execution flow.

Salesforce Developer Documentation on Testing Best Practices: Apex Testing Best Practices

### NEW QUESTION # 132

Part of a custom Lightning component displays the total number of Opportunities in the org, which are in the millions. The Lightning component uses an Apex method to get the data it needs.

What is the optimal way for a developer to get the total number of Opportunities for the Lightning component?

- A. SOQL for loop that counts the number of Opportunities records
- B. `SUM()` SOQL aggregate query on the Opportunity object
- C. `COUNT()` SOQL aggregate query on the Opportunity object
- **D. Apex batch job that counts the number of Opportunity records**

**Answer: D**

### NEW QUESTION # 133

Given a list of Opportunity records named `opportunityList`, which code snippet is best for querying all Contacts of the Opportunity's Account?

- A)
- B)
- C)
- D)

- A. Option D
- B. Option B
- C. Option C
- **D. Option A**

**Answer: D**

#### NEW QUESTION # 134

As part of their quoting and ordering process, a company needs to send POFs to their document storage system's REST endpoint that supports OAuth 2.0. Each Salesforce user must be individually authenticated with the document storage system to send the PDF.

What is the optimal way for a developer to implement the authentication to the REST endpoint?

- A. Hierarchy Custom Setting with 2 password custom field
- B. Hierarchy Custom Setting with an OAuth token custom field
- **C. Named Credential with an OAuth Authentication Provider**
- D. Named Credential with Password Authentication

**Answer: C**

Explanation:

Named Credentials with OAuth handle secure API calls. Individual authentication for each user with OAuth 2.0 is managed through Named Credentials.

#### NEW QUESTION # 135

A developer is building a Lightning web component that retrieves data from Salesforce and assigns it to the record property.

□ What must be done in the component to get the data from Salesforce? A)

□ B) C)

- A. Option B
- B. Option C
- **C. Option A**

**Answer: C**

Explanation:

Option A is the correct answer. The @wire decorator is used in conjunction with getRecord from lightning/uiRecordApi to retrieve a record from Salesforce. The syntax @wire(getRecord, { recordId: '\$recordId', fields: '\$fields' }) sets up a reactive property, which means it will automatically rerun whenever the recordId or fields property changes.

Get Record Data

#### NEW QUESTION # 136

.....

Helping our candidates to pass the Plat-Dev-301 exam and achieve their dream has always been our common ideal. We believe that your satisfactory is the drive force for our company. So on one hand, we adopt a reasonable price for you, ensures people whoever is rich or poor would have the equal access to buy our useful Plat-Dev-301 real study dumps. On the other hand, we provide you the responsible 24/7 service. Our candidates might meet so problems during purchasing and using our Plat-Dev-301 Prep Guide, you can contact with us through the email, and we will give you respond and solution as quick as possible. With the commitment of helping candidates to pass Plat-Dev-301 exam, we have won wide approvals by our clients. We always take our candidates' benefits as the priority, so you can trust us without any hesitation.
