P.S. Free 2026 Microsoft AZ-800 dumps are available on Google Drive shared by TrainingDump: https://drive.google.com/open?id=141I_YjZ0oFomXKGLBcPpzTD79y9Tlo55

After you purchase AZ-800 exam questions, you should always pay attention to your email address. Once there is a new version, we will send updated information to your email address. As we all know, the authority of a product matches its hit rate. How high the authority of AZ-800 Real Exam is, I don't need to say any more. You just know what you will know. You can't really find a product that has a higher hit rate than our AZ-800 study materials!

The AZ-800 exam covers a wide range of topics related to Windows Server hybrid core infrastructure, including configuring and managing servers, implementing and managing storage solutions, managing virtual machines and containers, and implementing and managing Azure services. Candidates who pass AZ-800 exam are expected to have a deep understanding of Windows Server technologies, including Active Directory and Group Policy, as well as experience with Azure services such as Azure Virtual Machines, Azure Storage, and Azure Site Recovery.

To be eligible for the AZ-800 Exam, candidates should have a solid understanding of Windows Server technologies, as well as experience managing hybrid cloud environments. They should also have experience with Azure services, including Azure Active Directory, Azure Virtual Machines, and Azure Storage. Microsoft recommends that candidates have at least one year of experience managing Windows Server environments, including experience with Windows Server 2016 or later.

One more to mention, we can help you make full use of your sporadic time to absorb knowledge and information. In a word, compared to other similar companies aiming at AZ-800 Test Prep, the services and quality of our products are highly regarded by our customers and potential clients.

Microsoft Administering Windows Server Hybrid Core Infrastructure Sample Questions (Q33-Q38):

NEW QUESTION # 33

Your network contains an Active Directory Domain Services (AD DS) domain named adatum.com. The domain contains a server named Server1 and the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2
User3	Group3

Server1 contains a folder named D:\Folder1. The advanced security settings for Folder1 are configured as shown in the Permissions exhibit. (Click the Permissions tab.)

Folder1 is shared by using the following configurations:

The share permissions for Share1 are shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 34

You deploy a single-domain Active Directory Domain Services (AD DS) forest named contoso.com.

You deploy a server to the domain and configure the server to run a service.

You need to ensure that the service can use a group managed service account (gMSA) to authenticate.

Which three PowerShell cmdlets should you run in sequence? To answer, move the appropriate cmdlets from the list of cmdlets to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation

NEW QUESTION # 35

You create a new Azure subscription.

You plan to deploy Azure Active Directory Domain Services (Azure AD DS) and Azure virtual machines. The virtual machines will be joined to Azure AD DS.

You need to deploy Active Directory Domain Services (AD DS) to ensure that the virtual machines can be deployed and joined to Azure AD DS.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

- 1 - Create an Azure virtual network.
- 2 - Create an Azure AD DS instance.
- 3 - Modify the settings of the Azure virtual network.

Topic 1, Fabrikam inc.

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements, if the case study has an All Information tab. Note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Fabrikam, Inc. is a manufacturing company that has a main office in New York and a branch office in Seattle.

On-premises Servers

The on-premises network contains servers that run Windows Server as shown in the following table.

DC1 hosts all the operation master roles.

WEB1 and WEB2 run an Internet Information Services (IIS) web app named Webapp1.

On-premises Network

The New York and Seattle offices are connected by using redundant WAN links.

The client computers in each office get IP addresses from their local DHCP server.

DHCP1 contains a scope named Scope1 that has addresses for the New York office. DHCP2 contains a scope named Scope2 that has addresses for the Seattle office.

Group Policy Object (GPOs)

The cwp.fabrikam.com domain contains the organizational units (OUs) and custom Group Policy Objects (GPOs) shown in the following table.

Requirements:

Fabrikam identifies the following planned changes:

- * Create a single Azure subscription named Sub1 that will contain a single Azure virtual network named Vnet1.
- * Replace the WAN links between the Seattle and New York offices by using Azure Virtual WAN and ExpressRoute. Both on-premises offices will be connected to Vnet1 by using ExpressRoute.
- * Create three Azure file shares named newyorkfiles, seattlefiles, and companyfiles.
- * Create a domain controller named dc3.corp.fabrikam.com in Vnet1.
- * Deploy an Azure Virtual Desktop host pool to Vnet1. The Azure Virtual Desktop session hosts will be hybrid Azure AD joined.
- * License all servers for Microsoft Defender for servers.
- * Use Azure Policy to enforce configuration management policies on the servers in Azure and on-premises.

Networking Requirements

Fabrikam identifies the following security requirements:

- * Apply GP04 to the Azure Virtual Desktop session hosts. Ensure that Azure Virtual Desktop user sessions lock after being idle for 10 minutes. Users must be able to control the lockout time manually from their client computer.
- * Ensure that server administrators request approval before they can establish a Remote Desktop connection to an Azure virtual machine. If the request is approved, the connection must be established within two hours.
- * Prevent user passwords from containing all or part of words that are based on the company name, such as Fab, fabrikam or f5br!|.
- * Ensure that all instances of Webapp1 use the same service account. The password of the service account must change automatically every 30 days.
- * Prevent domain controllers from directly contacting hosts on the internet.

File Sharing Requirements

You need to configure the synchronization of Azure files to meet the following requirements:

- * Ensure that seattlefiles syncs to FS2.
- * Ensure that newyorkfiles syncs to FS1.
- * Ensure that companyfiles syncs to both FS1 and FS2.

NEW QUESTION # 37

Your network contains an Active Directory Domain Services (AD DS) forest. The forest contains the servers shown in the following table.

On Server1, you create a DNS zone named Zone1.com as shown in the following exhibit.

To which DNS servers is Zone1.com replicated?

- A. Server2 only
- B. Server2 and Server4 only
- C. Server2, Server3, and Server4 only
- D. Server2 and Server3 only
- E. Server2, Server3, Server4, and Server5

Answer: C

NEW QUESTION # 38

.....

The three formats of AZ-800 practice material that we have discussed above are created after receiving feedback from thousands of professionals around the world. You can instantly download the Administering Windows Server Hybrid Core Infrastructure (AZ-800) real questions of the TrainingDump right after the payment. We also offer our clients free demo version to evaluate the of our Administering Windows Server Hybrid Core Infrastructure (AZ-800) valid exam dumps before purchasing.
