PCED-30-02 Braindumps Pdf & New PCED-30-02 Study Notes

It is certain that the pass rate among our customers is the most essential criteria to check out whether our PCED-30-02 training materials are effective or not. The good news is that according to statistics, under the help of our training materials, the pass rate among our customers has reached as high as 98% to 100%. And you can prepare for your PCED-30-02 Exam with under the guidance of our training materials anywhere at any time. Just take action to purchase we would be pleased to make you the next beneficiary of our PCED-30-02 exam practice.

Python Institute PCED - Certified Entry-Level Data Analyst with Python Sample Questions (Q39-Q44):

NEW QUESTION # 39

A script attempts to divide two numbers using / and //. The values are 7 and 2. The developer wants to understand the difference between true division and floor division. What are the results respectively?

- A. 3 and 3.5
- B. 3 and 4
- C. 3.5 and 3
- D. 4 and 3

Answer: C

Explanation:

The / operator performs true division, returning a float result of 3.5. The // operator performs floor division, truncating the decimal part and returning the integer value 3.

NEW QUESTION # 40

You are writing a function to validate battery voltage readings. The rules are:

- If the reading is "MISSING" or None, return "Missing".
 - If the value is below 2.5 or above 4.2, return "Outlier".
- Otherwise, return "Normal".

Which version correctly implements this logic using the most robust conditional and nested structures? Select the best answer.

- A.
- B.
- C.
- D.

Answer: C

Explanation:

It first handles the non-numeric cases ("MISSING" and None) in a single condition, preventing invalid comparisons, and then cleanly checks the numeric outlier bounds using an or condition (< 2.5 or > 4.2) before defaulting to "Normal".

NEW QUESTION # 41

A government agency collects citizen data for various public services.

What is the primary reason for emphasizing careful data management throughout the entire data lifecycle in this context? Select the best answer.

- A. To uphold data quality for effective service delivery, safeguard citizen privacy and prevent misuse, and comply with data protection laws.
- B. To streamline the initial capture of citizen details and minimize the administrative burden on both staff and the public.
- C. To guarantee the long-term availability and integrity of crucial citizen datasets for future policy formulation and evaluation.
- D. To enable seamless sharing of anonymized citizen information with other governmental bodies for collaborative initiatives.

Answer: A

Explanation:

Careful data management across the entire lifecycle ensures high data quality for reliable public services, protects sensitive citizen information from misuse, and maintains compliance with legal and regulatory data protection requirements.

NEW QUESTION # 42

A data analyst exports a cleaned dataset from Python and wants to share it with a colleague for easy use in Excel.

Which file format is best suited for this purpose? Select the best answer.

- A. SQL, because it directly converts tabular data into database tables that Excel can open.
- B. JSON, because it stores hierarchical data and is designed for visual presentation in Excel.
- C. CSV, because it stores tabular data in plain text and is compatible with spreadsheet applications.
- D. XML, because it automatically preserves spreadsheet formatting and charts.

Answer: C

Explanation:

CSV stores tabular data in a simple plain-text, comma-separated format that is widely supported by spreadsheet applications like Excel, making it ideal for sharing datasets for easy import and analysis.

NEW QUESTION # 43

You are working with city names entered by users. These names may contain inconsistent capitalization and unwanted spaces.

To standardize the data, you want to:

- Remove any leading or trailing whitespace, and
- Capitalize the first letter of each word (e.g., convert "new york" to "New York").

For example:

"New york " → "New York"

"LOS ANGELES" → "Los Angeles"

You are given a variable `city` that contains the raw input.

Which line of code correctly updates the value of `cleaned_city` to apply the required transformation? Select the best answer.

- A. `cleaned_city = city.upper().replace(" ", "")`
- B. `cleaned_city = city.upper().strip()`
- C. `cleaned_city = city.strip().capitalize()`
- **D. `cleaned_city = city.strip().title()`**

Answer: D

Explanation:

Stripping removes leading and trailing whitespace, and applying title formatting capitalizes the first letter of each word while converting the remaining letters to lowercase, producing the correctly standardized city name.

NEW QUESTION # 44

.....

If you are going to purchase PCED-30-02 Study Materials online, you may pay attention to your money safety. With applying the international recognition third party for the payment, your money and account safety can be guaranteed if you choose us. And the third party will protect your interests. In addition, PCED-30-02 training materials are high-quality, for we have a professional team to research the latest information, and you can use them at ease. Besides if you have little time to prepare for your exam, you can also choose us, you just need to spend 48 to 72 hours on studying, you can pass the exam. Choose us, and you will never regret!
