Microsoft AZ-500 (Microsoft Azure Security Technologies) Exam is a certification exam that verifies a candidate's expertise in securing Microsoft Azure. AZ-500 exam measures the candidate's ability to manage identity and access, protect data, configure network security, and monitor security solutions. AZ-500 exam is intended for security professionals who want to demonstrate their knowledge and abilities in securing Azure environments.

Microsoft AZ-500 certification exam is intended for IT professionals who have experience in the implementation and management of Azure security solutions. Candidates should have a solid understanding of Azure services, security technologies, and best practices, as well as experience with security management and compliance. AZ-500 Exam is suitable for security engineers, security architects, security analysts, and other professionals who are responsible for securing Azure environments.

Microsoft AZ-500 exam is suitable for professionals who are interested in enhancing their knowledge and skills in Azure security technologies. It is ideal for security administrators, security engineers, and IT professionals who are responsible for securing cloud-based applications and data. AZ-500 exam validates the expertise of candidates in implementing and managing security solutions for Azure resources and services.

Hence AZ-500 Dumps are a special feast for all the exam takers and sure to bring them not only AZ-500 exam success but also maximum score.

Microsoft Azure Security Technologies Sample Questions (Q132-Q137):

NEW QUESTION # 132

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique

solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a hybrid configuration of Azure Active Directory (Azure AD).

You have an Azure HDInsight cluster on a virtual network.

You plan to allow users to authenticate to the cluster by using their on-premises Active Directory credentials.

You need to configure the environment to support the planned authentication.

Solution: You deploy an Azure AD Application Proxy.

Does this meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

Instead, you connect HDInsight to your on-premises network by using Azure Virtual Networks and a VPN gateway.

Note: To allow HDInsight and resources in the joined network to communicate by name, you must perform the following actions:

* Create Azure Virtual Network.

* Create a custom DNS server in the Azure Virtual Network.

NEW QUESTION # 133

You have an Azure subscription that contains an Azure key vault named KeyVault1 and the virtual machines shown in the following table.

☐ You set the Key Vault access policy to Enable access to Azure Disk Encryption for volume encryption.

KeyVault1 is configured as shown in the following exhibit.

☐ For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

☐ Explanation

NEW QUESTION # 134

You have the role assignments shown in the following exhibit.

☐ Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 135

You have an Azure subscription that contains the resources shown in the following table.

☐ User1 is a member of Group1. Group1 and User2 are assigned the Key Vault Contributor role for Vault1.

On January 1, 2019, you create a secret in Vault1. The secret is configured as shown in the exhibit. (Click the Exhibit tab.)

☐

User2 is assigned an access policy to Vault1. The policy has the following configurations:

Key Management Operations: Get, List, and Restore

Cryptographic Operations: Decrypt and Unwrap Key

Secret Management Operations: Get, List, and Restore

Group1 is assigned an access to Vault1. The policy has the following configurations:

Key Management Operations: Get and Recover

Secret Management Operations: List, Backup, and Recover

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Answer:

Explanation:

NEW QUESTION # 136

You are troubleshooting a security issue for an Azure Storage account.

You enable the diagnostic logs for the storage account.

What should you use to retrieve the diagnostics logs?

- A. Azure Security Center
- **B. Azure Storage Explorer**
- C. SQL query editor in Azure
- D. File Explorer in Windows

Answer: B

Explanation:

Explanation

If you want to download the metrics for long-term storage or to analyze them locally, you must use a tool or write some code to read the tables. You must download the minute metrics for analysis. The tables do not appear if you list all the tables in your storage account, but you can access them directly by name. Many storage-browsing tools are aware of these tables and enable you to view them directly (see Azure Storage Client Tools for a list of available tools).

Microsoft provides several graphical user interface (GUI) tools for working with the data in your Azure Storage account. All of the tools outlined in the following table are free.
