

# C\_S4CPB\_2602 New Exam Materials & C\_S4CPB\_2602 Valid Exam Forum

The TrainingDumps wants you make your SAP C\_S4CPB\_2602 exam questions preparation journey simple, smart, and successful. To do this the TrainingDumps is offering real, valid, and updated SAP C\_S4CPB\_2602 exam practice questions in three different formats. These formats are TrainingDumps C\_S4CPB\_2602 PDF Questions files, desktop practice test software, and web-based practice test software. With any C\_S4CPB\_2602 exam questions format you will get everything that you need to prepare and pass the difficult SAP C\_S4CPB\_2602 certification exam with flying colors.

TrainingDumps provides latest C\_S4CPB\_2602 practice exam questions and C\_S4CPB\_2602 certifications training material products for all those customers who are looking to pass C\_S4CPB\_2602 exams. There is no doubt that the C\_S4CPB\_2602 exams can be tough and challenging without valid C\_S4CPB\_2602 brain dumps. We offer the guaranteed success with high marks in all C\_S4CPB\_2602 exams. Our multiple C\_S4CPB\_2602 certifications products let customers prepare and assess in the best way possible. We provide in-depth C\_S4CPB\_2602 Study Material in the form of C\_S4CPB\_2602 PDF dumps questions answers that will allow you to prepare yourself for the exam. C\_S4CPB\_2602 exams PDF question answers also come with one year free update. We also provide live support chat to all our customers who have concerns about C\_S4CPB\_2602 exams.

## 2026 C\_S4CPB\_2602 New Exam Materials | Valid SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C\_S4CPB\_2602) 100% Free Valid Exam Forum

Our exam questions just need students to spend 20 to 30 hours practicing on the platform which provides simulation problems, can let them have the confidence to pass the C\_S4CPB\_2602 exam, so little time great convenience for some workers. It must be your best tool to pass your exam and achieve your target. We provide free download and tryout before your purchase and if you fail in the exam we will refund you in full immediately at one time. Purchasing our C\_S4CPB\_2602 Guide Torrent can help you pass the exam and it costs little time and energy.

## SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C\_S4CPB\_2602) Sample Questions (Q18-Q23):

### NEW QUESTION # 18

#### SIMULATION

Create a Custom Launchpad Space and Page Business Scenario

You are building a custom business role that will be assigned to all employees in the organization. The business role and its corresponding Launchpad Space and Page need to include the apps that have been granted through the business catalogs assigned to the business role to ensure employees have an easy time finding the relevant applications.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Assign the business role to your user and save. Then refresh the browser and navigate home to verify the new Launchpad Space and tiles are visible.

**Answer:**

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to assign the newly created custom all-employee business role to your own business user, save the assignment, refresh the browser, and then verify that the new Launchpad Space and its tiles are visible on the homepage.

This is the final verification step for the all-employee role and launchpad setup.

Business Scenario Explanation

In the previous tasks, you created and configured:

a new custom business role for all employees,

the required business catalogs,

a custom launchpad space,

a custom launchpad page,

and the employee self-service tiles:

Manage My Timesheet

Concur Travel Expense

However, even if all of that is configured correctly, you still will not see the new page and tiles on your homepage until the custom role is assigned to your own business user.

This task connects the configuration to your user and verifies the final end-user result.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact business role ID.

Save the user after adding the role.

Refresh the browser after saving.

Then navigate back to Home and confirm the space/page/tiles are visible.

Required Business Role

Assign the custom all-employee role created earlier:

Business Role ID: Z\_EMPLOYEES\_ALL\_#####

Business Role Description: All Employee Role #####

Example

If your suffix is 000013, the role is:

Z\_EMPLOYEES\_ALL\_000013

Detailed Step-by-Step Procedure

Step 1: Open the app "Maintain Business Users"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Search for:

Maintain Business Users

Open the app.

Explanation:

This app is used to assign business roles to users.

The launchpad space and tiles will only become visible after the custom role is assigned to your own user.

Step 2: Search for your own business user

In Maintain Business Users:

Enter your own user name or business user ID in the search field.

Click Go.

Explanation:

You must assign the role to your own user because you are the one who will verify the launchpad result on the homepage.

Step 3: Open your user record

From the search results:

Click your user entry.

Open the user details page.

Explanation:

This opens the maintenance page where assigned business roles can be reviewed and changed.

Step 4: Switch to Edit mode

On the business user page:

Click Edit

Explanation:

Without edit mode, the role assignment list is display-only.

Step 5: Open the "Assigned Business Roles" tab

Inside the user record:

Click:

Assigned Business Roles

Explanation:

This tab contains the list of all business roles currently assigned to your user and is the correct place to add the all-employee role.

Step 6: Click Add

In the Assigned Business Roles section:

Click Add

This opens the popup:

Add Business Roles

Explanation:

This popup allows you to search for and assign the custom all-employee role.

Step 7: Search for the custom all-employee role

In the Add Business Roles popup:

In the business role search field, enter:

Z\_EMPLOYEES\_ALL\_#####

Click Go

Select the role:

Z\_EMPLOYEES\_ALL\_#####

All Employee Role #####

Example

If your suffix is 000013, search for:

Z\_EMPLOYEES\_ALL\_000013

Explanation:

This is the custom role created in the earlier launchpad/employee-role tasks.

It contains the launchpad space, catalogs, and page content that must now become visible to your user.

Step 8: Add the role

After selecting the role:

Click OK or Apply

Explanation:

This adds the role to your user in draft mode.

Step 9: Save the business user

Back on the business user page:

Click Save

Explanation:

This is a mandatory step.

Without saving, the role assignment is not finalized, and the new launchpad content will not appear for your user.

Step 10: Confirm the role assignment

After saving, verify that your assigned roles list includes:

Z\_EMPLOYEES\_ALL\_#####

All Employee Role #####

Explanation:

This confirms that the role is now officially assigned to your user.

Step 11: Refresh the browser

After saving:

Refresh the browser completely

Explanation:

SAP launchpad content is often cached in the current session.

A browser refresh ensures the newly assigned role content is loaded.

Step 12: Navigate back to Home

After refreshing:

Return to Home

Explanation:

The role's launchpad space and page must be verified from the end-user homepage, not only from configuration apps.

Step 13: Open the page / launchpad tab

On the homepage, look for the custom page/tab that contains the employee content.

In your run, the visible page was:

General

Explanation:

The launchpad page created earlier was titled General, so that is the page you should open to verify the result.

Step 14: Verify the section title

On the page, confirm that you can see the section:

Self-Services

Explanation:

This was the section title created in the earlier page-content maintenance task.

Step 15: Verify the tiles

Under the Self-Services section, confirm that both tiles are visible:

Concur Travel Expense

Manage My Timesheet

Explanation:

These are the two required employee self-service tiles added to the page in the previous task.

Seeing both of them confirms that:

the catalogs were assigned correctly,

the launchpad page was maintained correctly,

the business role was assigned correctly,

and the browser refresh loaded the new content successfully.

Expected Result

After completing this task successfully:

your own user has the custom business role assigned,

the role is saved successfully,

after browser refresh the launchpad updates,

the homepage shows the new launchpad page,

the Self-Services section is visible,

and the tiles Concur Travel Expense and Manage My Timesheet are visible.

The screenshot shows the SAP S/4HANA Page Content Maintenance interface. The page title is 'Z\_ALL\_EMP\_000013' and the section title is 'Self-Services'. The interface includes a search bar for tiles, a list of tiles, and a 'Save' button. The tiles listed are 'Concur Travel Expense' and 'Manage My Timesheet'. The interface also shows a 'Derived from Roles' section with a search bar and a 'Manually Selected' section with a search bar. The SAP logo is visible in the background.

## NEW QUESTION # 19

SIMULATION

Migrate Bank Data

Business Scenario

You are responsible for migrating bank data into the SAP S/4HANA Cloud Public Edition system. You have determined the best method is Migrate Data Using Staging Tables, as you only have a couple banks to migrate.

Prerequisites:

Note:

In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task. Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

## Your Task

Assign the Configuration Expert - Data Migration (BR\_CONFIG\_EXPERT\_DATA\_MIG) business role to your user and save.

## Answer:

### Explanation:

See Explanation below for all solution

### Explanation:

#### Objective

The purpose of this task is to assign the Configuration Expert - Data Migration business role to your own user so that you can use the migration cockpit and perform the bank data migration scenario using staging tables.

The required business role is:

Business Role ID: BR\_CONFIG\_EXPERT\_DATA\_MIG

Business Role Description: Configuration Expert - Data Migration

#### Business Scenario Explanation

In this scenario, you are responsible for migrating bank data into SAP S/4HANA Cloud Public Edition.

Because only a few banks need to be loaded, the chosen migration method is:

#### Migrate Data Using Staging Tables

Before you can use migration apps such as Migrate Your Data, your user must have the correct migration authorization.

That is why this task requires assigning the business role:

Configuration Expert - Data Migration

BR\_CONFIG\_EXPERT\_DATA\_MIG

Without this role, you may not be able to:

create migration projects,

open migration objects,

upload staging-table files,

validate and transfer data,

execute mapping tasks,

or run the migration itself.

#### Important Notes

Always replace ##### with the last 6 digits of your group number in later migration tasks.

Use the exact role ID required by the task:

BR\_CONFIG\_EXPERT\_DATA\_MIG

Save the user after role assignment.

Make sure the user is not left only in draft status.

#### Required Role

##### Field

##### Value

Business Role ID

BR\_CONFIG\_EXPERT\_DATA\_MIG

Business Role Description

Configuration Expert - Data Migration

#### Detailed Step-by-Step Procedure

Step 1: Open the app "Maintain Business Users"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Use the app search.

Search for:

Maintain Business Users

Open the app.

#### Explanation:

This app is used to assign business roles to business users.

Since the task asks to assign a role to your own user, this is the correct starting point.

Step 2: Search for your own user

Inside Maintain Business Users:

In the search/filter area, enter your own user ID.

Click Go.

#### Explanation:

You must assign the migration role to your own user because you are the one who will execute the migration tasks.

Step 3: Open your user record

From the search results:

Click your user entry.

Open the business user details page.

Explanation:

This opens the screen where assigned roles can be reviewed and maintained.

Step 4: Switch to Edit mode

On the business user page:

Click Edit

Explanation:

Edit mode is necessary before the Assigned Business Roles list can be changed.

Step 5: Open the "Assigned Business Roles" tab

Inside the business user record:

Click:

Assigned Business Roles

Explanation:

This is the section where the new business role will be assigned.

Step 6: Click Add

In the Assigned Business Roles area:

Click Add

This opens the popup:

Add Business Roles

Explanation:

This popup allows you to search for and assign standard SAP business roles.

Step 7: Search for the migration role

In the Add Business Roles popup:

In the role search field, enter:

BR\_CONFIG\_EXPERT\_DATA\_MIG

Click Go

Select:

Configuration Expert - Data Migration

BR\_CONFIG\_EXPERT\_DATA\_MIG

Explanation:

This is the exact role required for the bank migration scenario.

Step 8: Add the role

After selecting the role:

Click OK or Apply

Explanation:

This adds the migration role to your user in draft mode.

Step 9: Save the user

Back on the business user page:

Click Save

Explanation:

This finalizes the assignment.

Without saving, the role will not be available for use in the migration tasks.

Step 10: Verify the role assignment

After saving, confirm that your assigned roles list includes:

Configuration Expert - Data Migration

BR\_CONFIG\_EXPERT\_DATA\_MIG

Explanation:

This verifies that your user is now authorized to work with migration projects and staging-table migration.

Expected Result

After this task is completed successfully:

your user has the role BR\_CONFIG\_EXPERT\_DATA\_MIG,

the role assignment is saved,

your user can proceed with the bank migration project tasks,

migration-related apps are available to your user.

## NEW QUESTION # 20

### SIMULATION

Create a Custom Launchpad Space and Page

### Business Scenario

You are building a custom business role that will be assigned to all employees in the organization. The business role and its corresponding Launchpad Space and Page need to include the apps that have been granted through the business catalogs assigned to the business role to ensure employees have an easy time finding the relevant applications.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Create a Launchpad Space and Page with the information below.

Parameter	Value
Space ID	Z_ALL_EMP_#####
Space Title	General
Space Description	General
Page ID	Z_ALL_EMP_#####

  

Parameter	Value
Page Title	General
Page Description	General

### Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to create a custom launchpad space and page for the all-employee business role so employees can easily find the apps granted through the assigned business catalogs.

This task belongs to the all-employee role created in the previous tasks, for example:

Business Role ID: Z\_EMPLOYEES\_ALL\_#####

The page values shown in the task are:

Page Title: General

Page Description: General

Space ID	Space Description	Space Title	Type	Template	Merge ID
<input type="checkbox"/> Z_ALL_EMP_000013	General	General	Managed by Customer		

### Business Scenario Explanation

In SAP S/4HANA Cloud, business catalogs grant the app authorizations, but users still need a clean launchpad structure so they can actually find those apps easily.

That is why this task requires creating:

a Launchpad Space

a Launchpad Page

for the all-employee role.

The space acts like a container in the launchpad navigation, and the page acts like the content area where app tiles will later be displayed.

### Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact text values shown in the task.

The task image explicitly shows:

Page Title = General

Page Description = General

Save each object after creation.

Required Values

From the task image, use:

Parameter

Value

Page Title

General

Page Description

General

Additional execution values used in your run

During your actual execution, the custom launchpad space/page used this pattern:

Space ID: Z\_ALL\_EMP\_#####

Space Description: General

Space Title: General

Page ID: Z\_ALL\_EMP\_#####

Page Title: General

Page Description: General

Objective

The purpose of this task is to create a custom launchpad space and page for the all-employee business role so employees can easily find the apps granted through the assigned business catalogs.

This task belongs to the all-employee role created in the previous tasks, for example:

Business Role ID: Z\_EMPLOYEES\_ALL\_#####

The page values shown in the task are:

Page Title: General

Page Description: General

Business Scenario Explanation

In SAP S/4HANA Cloud, business catalogs grant the app authorizations, but users still need a clean launchpad structure so they can actually find those apps easily.

That is why this task requires creating:

a Launchpad Space

a Launchpad Page

for the all-employee role.

The space acts like a container in the launchpad navigation, and the page acts like the content area where app tiles will later be displayed.

### Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact text values shown in the task.

The task image explicitly shows:

Page Title = General

Page Description = General

Save each object after creation.

Required Values

From the task image, use:

Parameter

Value

Page Title

General

Page Description

General

Additional execution values used in your run

During your actual execution, the custom launchpad space/page used this pattern:

Space ID: Z\_ALL\_EMP\_#####

Space Description: General

Space Title: General

Page ID: Z\_ALL\_EMP\_#####

Page Title: General  
Page Description: General  
Add Launchpad Space

Space ID: \*  
Z\_ALL\_EMP\_000457

Space Description: \*  
General

Space Title: \*  
General

Create Page from Business Catalogs and Groups

Enter page details manually

**Z\_ALL\_EMP\_000013**  
General

General Data **Pages (1)** Roles (1)

Page ID	Merge ID	Title / Description	Visibility

## NEW QUESTION # 21

### SIMULATION

Set up an Integration Scenario

Business Scenario

You are responsible for setting up the Bank Integration with File Interface (IEG). During an actual implementation, you would first download the Set-up Instructions for the business process from SAP Signavio Process Navigator. In this practical exam, all the information will be provided to you, so you do not need to download the Set-up Instructions.

Prerequisites

Note:

In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task. Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Your Task

Create a Communication Arrangement for Finance - Account Receivable Bank Statement Integration with the information below and save.

Parameter	Value
Scenario	SAP_COM_0316
Arrangement Name	SAP_COM_0316_#####
Communication System	Select previously created system (SAP_SYSTEM_#####)

### Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to create a Communication Arrangement for the bank integration scenario using the communication system created in the previous task.

The required scenario is:

Scenario ID: SAP\_COM\_0316

Scenario Description: Finance - Account Receivable Bank Statement Integration This is the final configuration step in the integration scenario setup sequence.

Business Scenario Explanation

In the previous tasks, you created:

a Communication User

a Communication System

Now you must create the Communication Arrangement that links the communication scenario to the communication system.

In SAP S/4HANA Cloud, the communication arrangement defines:  
 which communication scenario is used,  
 which communication system is connected,  
 which inbound/outbound services are active,  
 and which technical settings are applied for the integration.

For this task, the communication arrangement is used for:  
 Finance - Account Receivable Bank Statement Integration  
 Scenario: SAP\_COM\_0316

**Important Notes**

Always replace ##### with the last 6 digits of your group number.

Use the exact values provided.

Do not change spaces, underscores, or capitalization.

The communication system selected must be the one created in Task 14:

1EG\_SYSTEM\_#####

**Required Values**

Use the following values exactly as shown in the task image.

Parameter	Value
Scenario	SAP_COM_0316
Arrangement Name	SAP_COM_0316_#####
Communication System	Select previously created system 1EG_SYSTEM_#####

**Example**

If your suffix is 000013, then the values become:

Scenario = SAP\_COM\_0316

Arrangement Name = SAP\_COM\_0316\_000013

Communication System = 1EG\_SYSTEM\_000013

Step 1: Open the app "Communication Arrangements"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Use the search bar or app finder.

Search for:

Communication Arrangements

Open the app.

Explanation:

This app is used to create and maintain communication arrangements for SAP communication scenarios.

Because the task explicitly asks to create a communication arrangement, this is the correct starting point.

Step 2: Start creating a new communication arrangement

Inside the Communication Arrangements app:

Click:

New

Explanation:

This starts the creation wizard for a new communication arrangement.

Step 3: Enter the communication scenario

In the Scenario field, enter:

SAP\_COM\_0316

Then confirm or continue.

Explanation:

This is the required SAP communication scenario for:

Finance - Account Receivable Bank Statement Integration

It is critical to use the exact scenario ID because the arrangement configuration is generated from this selection.

Step 4: Continue to the arrangement creation screen

After selecting the scenario:

Click Create

or

Click Continue

depending on the screen behavior.

Explanation:

This opens the detailed arrangement creation screen where the arrangement name and communication system are maintained.

Step 5: Enter the Arrangement Name

In the Arrangement Name field, enter:

SAP\_COM\_0316\_#####

Example

If your suffix is 000013, enter:

SAP\_COM\_0316\_000013

Explanation:

This is the technical/business name of the communication arrangement and must match the task exactly.

Step 6: Select the previously created Communication System

In the Communication System field:

Open the value help or selection list.

Select the communication system created in the previous task:

1EG\_SYSTEM\_#####

Example

If your suffix is 000013, select:

1EG\_SYSTEM\_000013

Explanation:

This step links the communication arrangement to the communication system that contains:

the technical host definition,

the communication user assignment,

and the inbound communication settings.

Without this link, the arrangement is incomplete.

Step 7: Review the automatically derived communication details

After selecting the communication system, SAP may automatically populate integration-related sections such as:

inbound communication user

authentication method

service endpoints

service URLs

Explanation:

These values are normally derived automatically from the selected communication scenario and communication system.

You usually do not need to manually change them unless the task explicitly requires it.

Step 8: Review all required values

Before saving, verify:

Scenario = SAP\_COM\_0316

Arrangement Name = SAP\_COM\_0316\_#####

Communication System = 1EG\_SYSTEM\_#####

Explanation:

This final review ensures there are no typing errors or wrong system selections.

Step 9: Save the Communication Arrangement

Click:

Save

Explanation:

This finalizes the communication arrangement creation.

Without saving, the configuration does not exist and the integration setup is incomplete.

Step 10: Verify the saved arrangement

After saving, confirm that the arrangement shows:

Arrangement Name = SAP\_COM\_0316\_#####

Communication System = 1EG\_SYSTEM\_#####

Scenario = SAP\_COM\_0316

scenario description:

Finance - Account Receivable Bank Statement Integration

Explanation:

This is the confirmation that the communication arrangement was created successfully and is ready for later use in the bank integration scenario.

Expected Result

After this task is completed successfully:

the communication arrangement exists,

it uses scenario SAP\_COM\_0316,

it has the correct arrangement name,

it is linked to the previously created communication system,

the arrangement is saved successfully.

## NEW QUESTION # 22

### SIMULATION

Note: In this practical certification exam, you will only be given high-level instructions. The step descriptions are complete and tested to work. They are not detailed, as this is a test of your knowledge of navigating the system on your own.

Caution: Please make sure you are always using your assigned group number. The last 6 digits are denoted as ##### in the following tasks. Your results will not be recorded if you are not using your own group number. To find your group number: Select your user in the top right corner. You will see your user name with a series of numbers. Use the last 6 digits as your group number

Caution: To keep the system running smoothly and avoid unnecessary costs, please follow the assigned exercises carefully when using the SAP Landscape. Avoid going beyond the exercise scope and only use your group number to help maintain a stable and efficient environment for everyone.

### Answer:

Explanation:

See Explanation below for all solution

Explanation:

Purpose: Identify your own six-digit suffix and use it consistently in every task.

Open the user menu at the top-right of SAP S/4HANA Cloud.

Read your user name and note the last six digits.

Use those last six digits in every place the task PDF shows #####.

Example used in this guide: 000013
