If you are curious or doubtful about the proficiency of our ISO-IEC-27001-Lead-Implementer practice materials, we can explain the painstakingly word we did behind the light. By abstracting most useful content into the ISO-IEC-27001-Lead-Implementer practice materials, they have help former customers gain success easily and smoothly. The most important part is that all contents were being sifted with diligent attention. No errors or mistakes will be found within our ISO-IEC-27001-Lead-Implementer practice materials. We stress the primacy of customers' interests, and make all the preoccupation based on your needs.

PECB Certified ISO/IEC 27001 Lead Implementer Exam Sample Questions

(Q104-Q109):

NEW QUESTION # 104

Scenario 6: Skyver offers worldwide shipping of electronic products, including gaming consoles, flat-screen TVs, computers, and printers. In order to ensure information security, the company has decided to implement an information security management system (ISMS) based on the requirements of ISO/IEC 27001.

Colin, the company's best information security expert, decided to hold a training and awareness session for the personnel of the company regarding the information security challenges and other information security-related controls. The session included topics such as Skyver's information security approaches and techniques for mitigating phishing and malware.

One of the participants in the session is Lisa, who works in the HR Department. Although Colin explains the existing Skyver's information security policies and procedures in an honest and fair manner, she finds some of the issues being discussed too technical and does not fully understand the session. Therefore, in a lot of cases, she requests additional help from the trainer and her colleagues. Based on the last paragraph of scenario 6, which principles of an effective communication strategy did Colin NOT follow?

- A. Credibility and responsiveness
- **B. Appropriateness and clarity**
- C. Transparency and credibility

Answer: B

Explanation:

According to ISO/IEC 27001 : 2022 Lead Implementer, an effective communication strategy should follow some principles, such as transparency, credibility, appropriateness, clarity, responsiveness, and consistency. These principles help to ensure that the communication is relevant, accurate, understandable, timely, and coherent. Based on the last paragraph of scenario 6, it seems that Colin did not follow the principles of appropriateness and clarity. Appropriateness means that the communication should be tailored to the needs, expectations, and level of understanding of the audience. Clarity means that the communication should be simple, concise, and precise, avoiding ambiguity and jargon. However, Colin explained the information security issues in a too technical manner, which made Lisa confused and unable to comprehend the session. Therefore, Colin should have adapted his communication style and content to suit the HR personnel, who may not have the same technical background as him.

NEW QUESTION # 105

An organization has implemented a control that enables the company to manage storage media through their life cycle of use, acquisition, transportation and disposal. Which control category does this control belong to?

- A. Organizational
- **B. Technological**
- C. Physical

Answer: B

NEW QUESTION # 106

Scenario 2: Beauty is a cosmetics company that has recently switched to an e-commerce model, leaving the traditional retail. The top management has decided to build their own custom platform in-house and outsource the payment process to an external provider operating online payments systems that support online money transfers.

Due to this transformation of the business model, a number of security controls were implemented based on the identified threats and vulnerabilities associated to critical assets. To protect customers' information.

Beauty's employees had to sign a confidentiality agreement. In addition, the company reviewed all user access rights so that only authorized personnel can have access to sensitive files and drafted a new segregation of duties chart.

However, the transition was difficult for the IT team, who had to deal with a security incident not long after transitioning to the e-commerce model. After investigating the incident, the team concluded that due to the out- of-date anti-malware software, an attacker gamed access to their files and exposed customers' information, including their names and home addresses.

The IT team decided to stop using the old anti-malware software and install a new one which would automatically remove malicious

code in case of similar incidents. The new software was installed in every workstation within the company. After installing the new software, the team updated it with the latest malware definitions and enabled the automatic update feature to keep it up to date at all times. Additionally, they established an authentication process that requires a user identification and password when accessing sensitive information.

In addition, Beauty conducted a number of information security awareness sessions for the IT team and other employees that have access to confidential information in order to raise awareness on the importance of system and network security.

Based on the scenario above, answer the following question:

After investigating the incident, Beauty decided to install a new anti-malware software. What type of security control has been implemented in this case?

- A. Detective
- B. Corrective
- C. Preventive

Answer: C

Explanation:

In the scenario described, Beauty's decision to install new anti-malware software after a security incident is a Preventive control. This type of control is aimed at preventing future security incidents by removing malicious code and protecting against malware infections. The purpose of the new anti-malware software is to proactively protect the company's systems and data from potential threats, thus it falls under the category of preventive measures.
