Fate is not an opportunity but a choice. As long as you choose our COF-C02 exam materials, you will certainly do more with less. Your work efficiency will far exceed others. COF-C02 practice guide has such effects because they have a lot of advantages. Not only our COF-C02 Practice Braindumps can help you study the latest knowledge on the subject but also it will help you achieve the certification for sure so that you will get a better career.

Snowflake SnowPro Core Certification Exam Sample Questions (Q845-Q850):

NEW QUESTION # 845

Which of the following describes how multiple Snowflake accounts in a single organization relate to various cloud providers?

- A. Each Snowflake account can be hosted in a different cloud vendor and region.
- B. Each Snowflake account can be hosted in a different cloud vendor, but must be in the same region.
- C. Each Snowflake account must be hosted in a different cloud vendor and region
- D. All Snowflake accounts must be hosted in the same cloud vendor and region

Answer: A

Explanation:

Snowflake's architecture allows for flexibility in account hosting across different cloud vendors and regions. This means that within a single organization, different Snowflake accounts can be set up in various cloud environments, such as AWS, Azure, or GCP, and in different geographical regions. This allows organizations to leverage the global infrastructure of multiple cloud providers and optimize their data storage and computing needs based on regional requirements, data sovereignty laws, and other considerations.

NEW QUESTION # 846

Which Snowflake object type can be used to restrict users from viewing the DDL associated with an object?

- A. Materialized view
- B. Data masking policy
- C. Stored procedure
- D. Secure view

Answer: D

NEW QUESTION # 847

Which Snowflake feature enables loading data from cloud storage as soon as files are available in a stage?

- A. Snowpipe
- B. Direct share
- C. Data replication
- D. COPY INTO <location> command

Answer: A

Explanation:

* Snowpipe is Snowflake's continuous data ingestion service that loads data from cloud storage (e.g., S3, Azure Blob, Google Cloud Storage) into Snowflake as soon as the files become available in a stage.

* Snowpipe uses event-driven architecture to automatically detect new files and load them with low- latency.

Why Other Options Are Incorrect:

- * A. COPY INTO <location> command: This command is for manual or scheduled bulk data loading, not continuous, automated loading.
 - * B. Data replication: Used for replicating databases across regions, not for data loading.
 - * D. Direct share: Used for sharing data between Snowflake accounts, not for loading files.
- References:
- * Snowpipe Documentation

NEW QUESTION # 848

The Snowflake Search Optimization Services supports improved performance of which kind of query?

- A. Selective point lookup queries
- B. Queries against tables larger than 1 TB
- C. Queries against a subset of columns in a table
- D. Queries against large tables where frequent DML occurs

Answer: A

Explanation:

Reference:
