For the H12-725_V4.0 web-based practice exam no special software installation is required. because it is a browser-based H12-725_V4.0 practice test. The web-based HCIP-Security V4.0 practice exam works on all operating systems like Mac, Linux, iOS, Android, and Windows. In the same way, IE, Firefox, Opera and Safari, and all the major browsers support the web-based Huawei H12-725_V4.0 Practice Test. So it requires no special plugins.

Huawei HCIP-Security V4.0 Sample Questions (Q47-Q52):

NEW QUESTION # 47

Which of the following statements is true about the outgoing traffic in the firewall virtual system?

- A. Traffic from the private network interface to the public network interface is limited by the inbound bandwidth.
- B. Traffic from the public network interface to the private network interface is limited by the outbound bandwidth.
- C. Traffic from the public network interface to the private network interface is limited by the inbound bandwidth.
- D. Traffic from the private network interface to the public network interface is limited by the outbound bandwidth.

Answer: D

Explanation:

Comprehensive and Detailed Explanation:

* Inbound bandwidth= Traffic entering the firewall.

* Outbound bandwidth= Traffic leaving the firewall.

* Correct answer:

* A. Private # Public traffic is controlled by outbound bandwidth.

* Why are the other options incorrect?

* B is incorrect because public # private traffic is controlled by inbound bandwidth, not outbound.

- * C is incorrect because inbound bandwidth does not apply to private # public traffic.
 - * D is incorrect because public # private traffic is controlled by inbound bandwidth.
- HCIP-Security References:
- * Huawei HCIP-Security Guide # Firewall Virtual System Bandwidth Control

NEW QUESTION # 48

If a Portal authentication user goes offline but neither the access device nor the RADIUS server detects this event, many problems may occur. To prevent this from occurring, the access device needs to detect a user logout immediately, delete the user entry, and instruct the RADIUS server to stop accounting.

Which of the following can trigger a Portal user logout?(Select All that Apply)

- A. The authentication server logs out the user.
- B. The access device logs out the user.
- C. The Portal server logs out the user.
- D. The user initiates a logout request.

Answer: A,B,C,D

Explanation:

Comprehensive and Detailed Explanation:

- * Portal authentication requires active session monitoring.
- * User logout can be triggered by multiple methods:
- * A. Portal server logout# The Portal system forcefully logs out a user.
- * B. Authentication server logout# The authentication system revokes access.
- * C. User-initiated logout# The user manually logs out via a Portal page.
- * D. Access device logout# If the firewall detects inactivity, it can remove the session.
- * Why are all options correct?
- * Each method can trigger a user logout in Portal authentication.

HCIP-Security References:

- * Huawei HCIP-Security Guide # Portal Authentication Logout Mechanisms

NEW QUESTION # 49

On a WLAN where the WAC has Portal authentication configured, VLAN authorization can be implemented with no additional configuration required. After Portal authentication is complete, the WAC forwards STA traffic based on the authorized VLANs.

- A. FALSE
- B. TRUE

Answer: A

Explanation:

Comprehensive and Detailed Explanation:

- * VLAN authorization in Portal authentication requires additional configuration.
- * To assign VLANs dynamically:
- * RADIUS must return VLAN attributes after authentication.
- * The WAC (Wireless Access Controller) must be configured to support dynamic VLAN assignment.
- * Why is this statement false?
- * VLAN authorization requires RADIUS attributes and WAC configuration-it is not automatic.

HCIP-Security References:

- * Huawei HCIP-Security Guide # WLAN & Portal Authentication

NEW QUESTION # 50

Which of the following statements is false about virtual system resource allocation?

- A. Virtual systems can share and preempt resources of the entire device. Such resources can be manually allocated.
- B. Quota-based resources are automatically allocated based on system specifications.
- C. To manually allocate resources to a virtual system, an administrator needs to configure a resource class, specify the

guaranteed quota and maximum quota of each resource in the resource class, and bind the resource class to the virtual system.

- D. Improper resource allocation may prevent other virtual systems from obtaining resources and services from running properly.

Answer: B

Explanation:

Comprehensive and Detailed Explanation:

- * Virtual system resource allocation can be manual or shared.
- * Manual allocation requires configuring a resource class, defining a quota, and binding it to a virtual system.
- * Why is D false?
- * Quota-based resources are not automatically allocated.
- * An administrator must define resource quotas.

HCIP-Security References:

- * Huawei HCIP-Security Guide # Virtual System Resource Allocation

NEW QUESTION # 51

When gateways are connected using GRE over IPsec, the IPsec encapsulation mode must be tunnel mode.

- A. FALSE
- **B. TRUE**

Answer: B

Explanation:

Comprehensive and Detailed Explanation:

- * GRE over IPsec is used to tunnel non-IP traffic, multicast, and dynamic routing protocols over IPsec VPN.
- * Tunnel mode is required because:
- * Transport mode only encrypts the payload, but GRE needs the entire original IP packet encrypted.
- * Tunnel mode encrypts the entire packet (original + GRE headers), ensuring full encapsulation.
- * Why is this statement true?
- * GRE over IPsec must use tunnel mode to fully encapsulate and protect packets.
