The Real4test is a leading and trusted platform that has been assisting the AB-900 exam candidates since its beginning. Over this long time period, Real4test has helped countless candidates in their preparation and enabled them to pass the final AB-900 Exam easily. The Real4test offers real, valid, and updated Microsoft Exam Questions.

Microsoft AB-900 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Perform basic administrative tasks for Copilot and agents: This domain focuses on managing Copilot and agents, including licensing, feature controls, and usage monitoring. It also covers creating agents, managing prompts, configuring user access, and monitoring agent activity through admin centers.
Topic 2	<ul style="list-style-type: none">Identify the core features and objects of Microsoft 365 services: This domain covers the main Microsoft 365 objects such as users, groups, licenses, mailboxes, SharePoint sites, and Teams. It also focuses on managing organization settings, roles, authentication, authorization, and core security features using Microsoft Entra and Microsoft Defender.

Topic 3	<ul style="list-style-type: none"> Understand data protection and governance tasks for Microsoft 365 and Copilot: This domain explains how Microsoft Purview protects and governs organizational data through classification, sensitivity labels, retention, and compliance tools. It also covers how Copilot accesses data, follows permissions, and how administrators monitor risks, alerts, and oversharing.

We have three formats of study materials for your leaning as convenient as possible. Our Microsoft 365 Certified question torrent can simulate the real operation test environment to help you pass this test. You just need to choose suitable version of our AB-900 guide question you want, fill right email then pay by credit card. It only needs several minutes later that you will receive products via email. After your purchase, 7*24*365 Day Online Intimate Service of AB-900 question torrent is waiting for you. We believe that you don't encounter failures anytime you want to learn our AB-900 guide torrent.

Microsoft 365 Copilot & Agent Administration Fundamentals Sample Questions (Q49-Q54):

NEW QUESTION # 49

Select the answer that correctly completes the sentence.

Answer:

Explanation:

Explanation:

The correct answer is Microsoft SharePoint sites . Microsoft Learn documents that Microsoft Purview sensitivity labels for containers can be applied to Microsoft Teams, Microsoft 365 groups, and SharePoint sites . These labels can control settings such as privacy, external sharing, and unmanaged device access for the labeled site. That is the official Microsoft feature that matches the sentence in the question.

The other options are not the best match for this item. Microsoft 365 Copilot conversations are not the standard object to which admins directly apply a sensitivity label in the way this question is asking. Copilot can honor labels on source content and may display label context in responses, but the selectable resource here is not "Copilot conversations." Azure Blob Storage is also not the intended answer in the Microsoft 365 Copilot and Agent Admin context for Purview sensitivity labels.

So for this hotspot, the sentence is correctly completed with Microsoft SharePoint sites , because Microsoft explicitly supports applying Purview sensitivity labels to SharePoint sites as a container-level labeling capability.

NEW QUESTION # 50

Your organization has a Microsoft 365 subscription.

You need to evaluate your organization's Identity Secure Score.

Which two factors affect the score? Each correct answer presents a complete the solution.

NOTE: Each correct selection is worth one point.

- A. passwords that are never expired
- B. the number of global administrators
- C. the location of the users
- D. the SharePoint site permissions

Answer: A,B

Explanation:

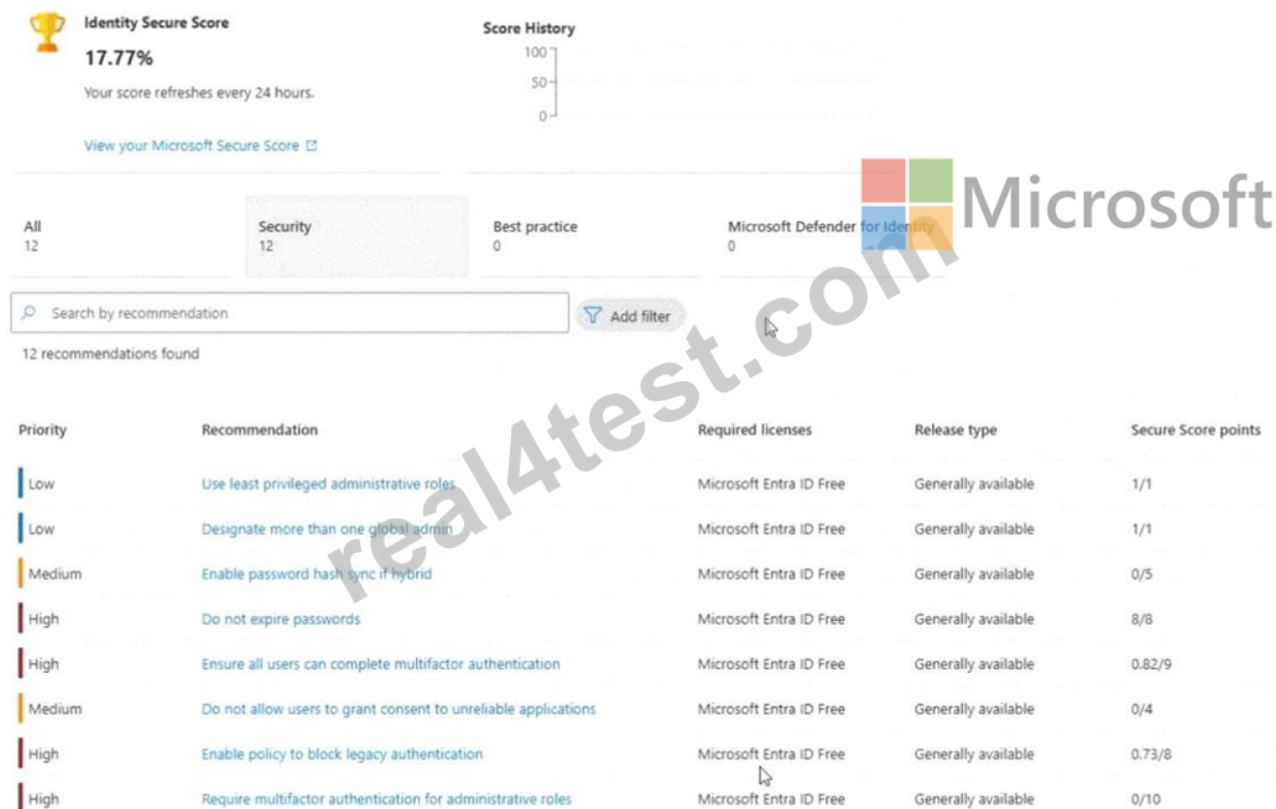

The correct answers are B and C . Microsoft documents that Identity Secure Score in Microsoft Entra is based on identity security recommendations, including recommendations such as "Designate more than one Global Administrator" and "Do not expire passwords." Those recommendations directly map to the number of global administrators and whether passwords are set to never expire , so both factors affect the score.

Option A is incorrect because SharePoint site permissions are part of SharePoint content and collaboration security, not a direct factor in the Microsoft Entra Identity Secure Score model. Option D is also incorrect because the location of users can be used in Conditional Access and other access control decisions, but Microsoft does not list user geographic location itself as a direct Identity Secure Score recommendation.

Identity Secure Score is driven by Entra identity best-practice checks and recommendations rather than by SharePoint permission structure or user location data.

NEW QUESTION # 51

You open the Microsoft Entra admin center as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

Answer:

Explanation:

Explanation:

The correct answer is Require multifactor authentication for administrative roles . In the exhibit, each recommendation shows its available Secure Score points . The listed values are 1/1 for Use least privileged administrative roles , 8/8 for Do not expire passwords , 0.73/8 for Enable policy to block legacy authentication , and 0/10 for Require multifactor authentication for administrative roles . Because 10 points is the highest value among the options shown, resolving that recommendation would improve the Identity Secure Score the most.

Microsoft Learn explains that Identity Secure Score in Microsoft Entra is based on Microsoft security recommendations, and each recommendation contributes a specific number of points depending on its impact and implementation state. Recommendations related to administrator protection are especially important because privileged accounts are high-value attack targets. Microsoft also emphasizes multifactor authentication for admin roles as a core identity security best practice. Therefore, both from the screenshot and from Microsoft's identity guidance, the recommendation with the greatest score improvement is Require multifactor authentication for administrative roles .

NEW QUESTION # 52

A Finance user received a sophisticated phishing email with a malicious link that was neutralized.

The security team needs a single, centralized view to review the incident timeline, related alerts (email and endpoint), and recommended actions to harden posture across email and endpoints.

Which Defender XDR capability or portal area gives the security operations team that unified incident timeline and improvement recommendations?

- A. Microsoft Defender for Office 365
- B. Microsoft Defender Vulnerability Management
- C. The unified Incidents and Alerts experience plus Secure Score in the Microsoft Defender portal
- D. Microsoft Defender for Identity

Answer: C

NEW QUESTION # 53

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
To use Microsoft 365 Copilot Chat to reason over web data, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input type="radio"/>
To use the Researcher agent in Microsoft 365 Copilot, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input type="radio"/>
To add an agent in the Microsoft 365 Copilot app, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
To use Microsoft 365 Copilot Chat to reason over web data, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input checked="" type="radio"/>
To use the Researcher agent in Microsoft 365 Copilot, you need a Microsoft 365 Copilot license.	<input checked="" type="radio"/>	<input type="radio"/>
To add an agent in the Microsoft 365 Copilot app, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input checked="" type="radio"/>

Explanation:

* To use Microsoft 365 Copilot Chat to reason over web data, you need a Microsoft 365 Copilot license. Answer: No

* To use the Researcher agent in Microsoft 365 Copilot, you need a Microsoft 365 Copilot license. Answer: Yes

* To add an agent in the Microsoft 365 Copilot app, you need a Microsoft 365 Copilot license. Answer: No
The correct selections are No, Yes, No . Microsoft documents that Microsoft 365 Copilot Chat is available at no additional cost for eligible Entra account users with qualifying Microsoft 365 licenses, and that it includes secure AI chat grounded in the web . That means a separate Microsoft 365 Copilot add-on license is not required just to use Copilot Chat over web data.

Statement 2 is Yes because Microsoft states that Researcher is part of the core default experience for Microsoft 365 Copilot licensed users . In other words, access to the Researcher agent requires the Microsoft 365 Copilot license.

Statement 3 is No because Microsoft documents that users can access agents and create them in the Microsoft 365 Copilot app through Copilot Chat, and Microsoft 365 service descriptions state that web- grounded agents are available at no extra cost for commercial users with a qualifying Microsoft 365 license.

A Copilot add-on license is required for certain advanced capabilities, but not simply to add an agent in the app in general.

NEW QUESTION # 54

.....

Today the pace of life is increasing with technological advancements. It is important for ambitious young men to arrange time properly. As busy working staff good AB-900 test simulations will be helper for your certification. Keeping hard working and constantly self-enhancement make you grow up fast and gain a lot of precious opportunities. Our AB-900 test simulations will help you twice the result with half the effort. Chance favors the one with a prepared mind.
