Palo Alto Networks Cloud Security Professional Sample Questions (Q203-Q208):

NEW QUESTION # 203
Which action must be taken to enable a user to interact programmatically with the Prisma Cloud APIs and for a nonhuman entity to be enabled for the access keys?

- A. Create a role with System Admin and generate access keys.
- B. Create a role with Account Group Read Only and assign it to the user.
- C. Create a user with a role that has minimal access.
- D. Create a role and assign it to the Service Account.

Answer: D

Explanation:
To enable a user to interact programmatically with Prisma Cloud APIs and for a nonhuman entity to access keys, the correct action is to create a role and assign it to the Service Account (D). Service accounts in Prisma Cloud are designed for programmatic access by applications or automated tools, allowing these entities to interact with Prisma Cloud APIs securely. By creating a specific role with the necessary permissions and assigning it to a service account, administrators can ensure that the entity has the appropriate level of access required for its operations, aligning with the principle of least privilege and enhancing the security posture of API interactions.

NEW QUESTION # 204
Which statement applies to Adoption Advisor?

- A. It helps adopt security capabilities at a fixed pace regardless of the organization's needs.
- B. It includes security capabilities from subscriptions for CSPM, CWP, CCS, OEM, and Data Security.
- C. It is only available for organizations that have completed the cloud adoption journey.
- D. It only provides guidance during the deploy phase of the application lifecycle.

Answer: B

Explanation:
Adoption Advisor is a feature within Prisma Cloud that provides organizations with guidance on adopting various security capabilities based on their unique needs and the stage they are at in their cloud security journey. It doesn't enforce a fixed pace but rather suggests a tailored path for enhancing security posture, taking into account the organization's specific requirements and the complexity of their cloud environment.
The Adoption Advisor supports a broad range of security capabilities, encompassing Cloud Security Posture Management (CSPM), Cloud Workload Protection (CWP), Cloud Code Security (CCS), Out-of-Band (OEM), and Data Security. This comprehensive approach ensures that organizations can secure their cloud environments effectively across different phases of the application lifecycle, from development to deployment, and across various cloud resources and services.

NEW QUESTION # 205
