C_BCBAI_2509덤프데모문제, C_BCBAI_2509높은 통과율 시험공부자료

SAP C_BCBAI_2509 덤프의 PDF 버전과 Software 버전의 내용은 동일합니다. PDF버전은 프린트 가능한 버전으로 서 단독구매하셔도 됩니다. Software 버전은 테스트용으로 PDF 버전 공부를 마친후 시험전에 실력테스트 가능합니다. Software 버전은 PDF버전의 보조용이기에 단독 판매하지 않습니다. 소프트웨어버전까지 필요하신 분은 PDF버전을 구입하실때 공동구매하셔야 합니다.

SAP C_BCBAI_2509 시험요강:

주제	소개

주제 1	<ul style="list-style-type: none"> Positioning SAP Business AI: This section of the exam measures the skills of SAP Consultants and focuses on understanding how SAP Business AI fits into the SAP Business Suite. It covers the ability to explain the key concepts of Business AI, its role in modern enterprise solutions, and the value it delivers to customers. Candidates are expected to demonstrate knowledge of positioning AI capabilities in real business scenarios to enhance operational efficiency and decision-making.
주제 2	<ul style="list-style-type: none"> Exploring Joule Agents: This section of the exam measures the skills of AI Solution Architects and emphasizes knowledge of Joule Agents. It involves exploring how these agents function, their integration into SAP systems, and their potential use cases. The section also addresses how Joule Agents support intelligent automation, improve productivity, and enable personalized enterprise solutions.

최신 SAP Certified Associate C_BCBAI_2509 무료 샘플문제 (Q20-Q25):

질문 # 20

How can you interact with Joule and boost productivity and decision-making? Note: There are 3 correct answers to this question.

- A. Informational
- B. Analytical
- C. Navigational
- D. Conventional
- E. Educational

정답: A,B,C

질문 # 21

What are some activities SAP recommends customers consider when integrating agent AI systems into their operations? Note: There are 3 correct answers to this question.

- A. Implement change management to align teams with AI agent functions
- B. Set up an AI agent governance board to prevent ethical issues
- C. Measure and evaluate AI agent performance
- D. Provide internal data for training
- E. Maintain expert oversight over AI agent decisions

정답: C,D,E

질문 # 22

In SAP Business AI, what are some safeguards for protecting customer data? Note: There are 3 correct answers to this question.

- A. Clean core maintenance
- B. Consent-based model training
- C. Tenant isolation
- D. SAP-hosted AI infrastructure

정답: B,C,D

설명:

SAP Business AI incorporates robust safeguards to protect customer data, ensuring privacy and compliance. The consent-based model training approach ensures that AI models are trained only on data for which explicit user consent has been obtained, aligning with global data protection regulations such as GDPR. This minimizes the risk of unauthorized data usage. SAP-hosted AI infrastructure provides a secure environment where data is processed within SAP's controlled, enterprise-grade cloud infrastructure, reducing exposure to external vulnerabilities. Tenant isolation ensures that each customer's data is stored and processed in a dedicated environment, preventing cross-tenant data leakage and enhancing security. These measures collectively uphold SAP's commitment to data privacy and security, as outlined in the SAP Business AI documentation. Clean core maintenance, while important for system efficiency, is not directly related to data protection. Sustainability is not a safeguard for customer data.

Reference:

질문 # 23

(What are some key differentiators of SAP Business AI? Note: There are 3 correct answers to this question.)

- A. AI Foundation
- B. Embedded AI
- C. Ecosystem of Innovation
- D. Predictive Analytics
- E. Large Foundation Models

정답: A,B,C

설명:

Comprehensive and Detailed Explanation From Exact Extract: Key differentiators of SAP Business AI include embedded AI directly integrated into business applications for seamless use, an AI Foundation providing the underlying infrastructure and tools in SAP BTP, and an Ecosystem of Innovation through partnerships and open standards for collaborative advancements. These set SAP apart by focusing on integration, foundational support, and ecosystem-driven innovation.

Exact extracts supporting this:

Embedded AI: "Embedded AI: Our relevant, reliable, and responsible SAP Business AI is ... key differentiators."learning.sap.com

AI Foundation: "For that, we established an AI foundation."learning.sap.com "SAP's main differentiators are... deep domain and industry expertise."community.sap.com (Foundation as base.) Ecosystem of Innovation: "Maximize the value of AI across your business with a single AI interface that seamlessly integrates data and workflows across your SAP and non-SAP applications."sap.com Implies ecosystem.

Other options are incorrect because:

Option C: Predictive analytics is a capability but not a key differentiator; focus is on embedded and foundational aspects.

Option D: SAP integrates large foundation models from partners but does not claim them as differentiators; emphasis is on business grounding.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: From SAP Learning course "Discovering SAP Business AI," units on market point of view and role of Business AI, highlighting embedded AI, foundation, and ecosystem as differentiators, per C_BCBAI_2502 materials.

질문 # 24

What are the main domain clusters of SAP's guiding principles for ethical AI? Note: There are 3 correct answers to this question.

- A. Executive Sponsorship
- B. Organizational practice
- C. AI System engineering
- D. AI Ethics Steering Committee

정답: B,C,D

설명:

SAP's guiding principles for ethical AI are organized into key domain clusters, including the AI Ethics Steering Committee, Organizational practice, and AI System engineering, as outlined in the SAP Responsible AI Framework. The AI Ethics Steering Committee oversees governance, ensuring AI development aligns with ethical standards. Organizational practice involves embedding ethical considerations into business processes, training, and culture to promote responsible AI use. AI System engineering focuses on designing AI systems with transparency, fairness, and accountability, incorporating technical safeguards to mitigate bias and ensure reliability. Executive Sponsorship, while important for leadership support, is not a defined domain cluster, and AI System definition is not explicitly listed in SAP's framework. These clusters ensure SAP's AI solutions are trustworthy and aligned with global ethical standards.
