Microsoft Collaboration Communications Systems Engineer Sample Questions (Q238-Q243):

NEW QUESTION # 238

You have a Microsoft Teams deployment that has Teams Premium licenses. You create and assign an enhanced encryption policy for sensitive Teams meetings. Which meeting feature is available in an encrypted meeting?

- A. Copilot for Teams meetings
- B. breakout rooms
- C. recording
- D. screen sharing

Answer: D

Explanation:

When you apply enhanced encryption to a Teams meeting, it ensures that meeting data is protected both in transit and at rest. While enhanced encryption increases security, certain features that involve data storage, such as recording, may be restricted to prevent sensitive information from being stored.

Screen sharing in Teams can still be allowed during encrypted meetings because it is a real-time activity, and the content being shared is encrypted during transmission. This makes it a secure feature that can continue to function even under stricter encryption policies.
