Exam NSE6_FSR-7.3 Prep & Reliable NSE6_FSR-7.3 Test Labs

Questions remain unsuccessful in the NSE6_FSR-7.3 test and lose their resources. That's why Actual4dump is offering real Fortinet NSE6_FSR-7.3 Questions that are real and can save you from wasting time and money. Hundreds of applicants have studied

successfully from our NSE6_FSR-7.3 latest questions in one go. We have launched our NSE6_FSR-7.3 Practice Test after consulting with experts who have years of experience in this field. People who have used our NSE6_FSR-7.3 exam preparation material rated it as the best option to study for the NSE6_FSR-7.3 exam in a short time.

Fortinet NSE6_FSR-7.3 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> System Operation: For System Engineers, this section covers Elasticsearch data management that may need to be externalized or migrated to accommodate system needs. Additionally, this section covers configuring the recommendation engine and utilizing the war room functionality.
Topic 2	<ul style="list-style-type: none"> System Configuration: FortiSOAR requires careful setup of applications for FortiSoar System Administrators. It covers system fixtures, and proxy settings to function optimally.
Topic 3	<ul style="list-style-type: none"> Security Management: This section covers how Security Engineers implement role-based access control (RBAC) and set up team structures within FortiSOAR to streamline security management.
Topic 4	<ul style="list-style-type: none"> System Monitoring and Maintenance: For FortiSOAR Administrators, this domain covers using various tools for system monitoring to ensure consistent performance. This includes how to regularly oversee FortiSOAR processes, along with other critical functions.
Topic 5	<ul style="list-style-type: none"> SOC and SOAR Overview: Security Engineers can gain an understanding of SOC and SOAR deployment requirements, including licensing management for FortiSOAR.

Fortinet NSE 6 - FortiSOAR 7.3 Administrator Sample Questions (Q14-Q19):

NEW QUESTION # 14

Which SMS vendor does FortiSOAR support for two-factor authentication?

- A. Google Authenticator
- **B. Telesign**
- C. 2factor
- D. Twilio

Answer: B

Explanation:

For two-factor authentication (2FA) via SMS, FortiSOAR supports integration with Telesign. This vendor provides SMS-based 2FA services, enabling FortiSOAR to leverage Telesign's API for sending verification codes as part of its security features. Telesign's service is compatible with FortiSOAR, ensuring secure user authentication when accessing the platform or certain features.

NEW QUESTION # 15

View the exhibit:

What does the command output mean?

```
root@fortisoar ~]# csadm db --check-connect
The file db_external_config.yml does not exist. Failed to connect the instance.
[root@fortisoar ~]#
```

- **A. The configuration to enable database externalization has not been completed.**
- B. There is no connectivity between the PostgreSQL databases of the primary and secondary FortiSOAR instances.
- C. The local PostgreSQL database is disabled on the FortiSOAR instance.
- D. The local PostgreSQL database is configured on the FortiSOAR instance.

Answer: A

NEW QUESTION # 16

A security analyst has reported unauthorized access to System Configuration. You must review the user's current level of access, and then restrict their access according to your organization's requirements. As part of your auditing process, which two actions should you perform? (Choose two.)

- A. Remove the create, read, update, and delete (CRUD) permissions or roles that the user does not require.
- **B. Review the user's team hierarchy to ensure that the appropriate relationships are configured.**
- C. Remove all record ownership that is assigned to the user.
- **D. View the user's effective role permissions, and then investigate which role is providing that access.**

Answer: B,D

Explanation:

To audit and restrict a user's access within FortiSOAR, particularly in response to unauthorized access reports, it's necessary to review the user's effective role permissions. This involves checking which roles grant the user access to the System Configuration module and adjusting as needed. Additionally, reviewing the user's team hierarchy ensures that the user's access aligns with the organization's policies. Misconfigurations in team relationships can sometimes inadvertently provide elevated access; hence, confirming that the team setup is correct is a critical part of the auditing process.

NEW QUESTION # 17

An administrator is issuing the following command on a node trying to join a FortiSOAR cluster as a standby:
csadm ha join-cluster --status active -role secondary --primary-node 10.0.1.160 The node fails to join the cluster. What is the issue?

- A. The role value should be worker.
- **B. The status value should be passive.**
- C. The IP address should be for secondary-node Instead of primary-node.
- D. The primary node needs to be resolvable via FQDN.

Answer: B

Explanation:

When joining a FortiSOAR cluster as a standby node, the correct status value should be passive. Using active would imply that the node is trying to join as an active node, which could cause conflicts in the cluster setup.

In FortiSOAR, standby nodes must be set as passive to ensure they are recognized correctly and to avoid conflicts with the primary node or other active nodes within the cluster. Therefore, setting the status to passive will resolve the issue and allow the node to join the cluster as intended.

NEW QUESTION # 18

Which three features are installed with the FortiSOAR Incidence Response Content Pack? (Choose three answers)

- **A. System playbooks2**
- B. SLA template module
- **C. Sample data for playbooks**
- D. System monitoring connectors1
- **E. Sample alerts and incidents**

Answer: A,C,E

Explanation:

Comprehensive and Detailed Explanation From FortiSOAR 7.3 Exact Extract study guide:

The FortiSOAR Incidence Response Content Pack (which is essentially the predecessor or foundational component of the SOAR Framework Solution Pack in version 7.3) is designed to provide users with an immediate, functional environment. According to the FortiSOAR 7.3 Administration Guide and Content Hub documentation:

* Sample Alerts and Incidents (C):The content pack includes a set of demo records.³Upon installation and clicking the "Demo IR Records" button, the system populates the Alerts and Incidents modules with pre-configured samples, including associated indicators and assets, to demonstrate how records are handled.⁴

* System Playbooks (D):It installs a comprehensive collection of "out-of-the-box" (OOB) playbooks.

These include system-level playbooks used for triaging, indicator extraction, and managing standard record lifecycles (such as auto-

populating dates when a record is closed).⁵

* Sample Data for Playbooks (B): Along with the records themselves, the pack includes simulation and training data (often referred to as "Playbook Samples" or "Mock Data").⁶ This allows administrators to test playbook logic and workflows without requiring live feeds from third-party security tools.

Why other options are incorrect:

* System monitoring connectors (A): While the pack may configure some basic internal connectors (like the Code Snippet connector), "system monitoring connectors" are generally standalone integrations or part of specific device solution packs rather than the core IR pack.

* SLA template module (E): Although the pack includes playbooks that manage SLAs (calculating response and resolution times), the "SLA Management" or "SLA Template" capability is often categorized as an additional module or handled via the Module Editor, rather than being a specific "feature" installed solely by the IR pack.

NEW QUESTION # 19

.....

We can't forget the advantages and the conveniences that reliable NSE6_FSR-7.3 real dump compiled by our companies bring to us. First, by telling our customers what the key points of learning, and which learning NSE6_FSR-7.3 exam training questions is available, they may save our customers money and time. They guide our customers in finding suitable jobs and other information as well. Secondly, a wide range of practice types and different version of our NSE6_FSR-7.3 Exam Training questions receive technological support through our expert team. Without this support our customers would have to pay much more for practicing. Thirdly, perfect NSE6_FSR-7.3 practice materials like us even provide you the opportunities to own goal, ideal struggle, better work, and create a bright future.
