Pass Guaranteed The Best Plat-Dev-210 - Salesforce Certified Omnistudio Developer Free Pdf Guide

One way to makes yourself competitive is to pass the Plat-Dev-210 certification exams. Hence, if you need help to get certified, you are in the right place. SureTorrent offers the most comprehensive and updated braindumps for Salesforce's certifications. To ensure

that our products are of the highest quality, we have tapped the services of Salesforce experts to review and evaluate our Plat-Dev-210 Certification test materials. In fact, we continuously provide updates to every customer to ensure that our Plat-Dev-210 products can cope with the fast changing trends in Plat-Dev-210 certification programs.

Salesforce Plat-Dev-210 Exam Syllabus Topics:

Topic	Details
Topic 1	• Omniscripts: This portion of the exam measures the skills of a Business Analyst and focuses on the use of OmniScripts to create dynamic, guided user experiences. It includes comparing and contrasting various OmniScript elements and their configurations to fulfill given use cases. The section also examines the candidate's understanding of the JSON structure that supports OmniScripts, as well as the ability to select appropriate elements and properties to address functional requirements effectively.
Topic 2	• Flexcards: This section of the exam measures the skills of a Solution Architect and covers the ability to design and configure FlexCards based on specific business requirements. It evaluates the candidate's knowledge in selecting appropriate card styles, defining data sources and fields, and implementing user actions across different card states. Additionally, this domain tests the understanding of constructing the underlying JSON data structure that powers the FlexCards framework, ensuring that the configured cards meet both functional and technical specifications.
Topic 3	• Omnistudio Data Mappers: This part of the exam measures the skills of a Data Engineer and focuses on the use of Omnistudio Data Mappers for extracting, transforming, and loading data. It includes identifying the appropriate Data Mapper for a given requirement, as well as determining the necessary Extract, Load, Transform, and Turbo Extract functionalities based on specific use cases. This section ensures the candidate can effectively map and manipulate data to support business processes.
Topic 4	• Integrated Troubleshooting and Deployment: This final section measures the skills of a Support Engineer and focuses on identifying and resolving issues within Omnistudio tools. It involves diagnosing errors based on given scenarios and determining where breakdowns occur in the data flow for specific customer issues. This ensures the candidate can effectively troubleshoot, debug, and maintain solutions to ensure optimal performance and reliability.
Topic 5	• Integration Procedures: This section measures the skills of an Integration Architect and involves designing and configuring Integration Procedures to automate processes and integrate systems. It requires comparing and contrasting different elements and configurations within Integration Procedures to meet specific use cases. Candidates are also tested on selecting the correct elements and properties to satisfy functional requirements, ensuring seamless data flow and process automation.

Salesforce Certified Omnistudio Developer Sample Questions (Q46-Q51):

NEW QUESTION # 46
A developer creates a Flexcard that displays a contact's mailing address and passes the contact's postal code to a child FlexCard. When configuration text elements in the child FlexCard, what syntax should a developer use to refer to the contact's postal code?

- A. {Parent.postalcode}
- B. {Records.postalcode}
- C. {Params.postalcode}
- D. {Postalcode}

Answer: C

Explanation:
The Params node contains the data that is passed from the parent FlexCard to the child FlexCard. The developer should use {Params.postalcode} to refer to the contact's postal code in the child FlexCard.

NEW QUESTION # 47
The OmniScript must retrieve device details stored in the Asset object and then call an external system to send troubleshooting

commands via REST API to the device.
Which two OmniScript element should the developer use to configure this functionality?

- A. HTTP Action
- B. REST API Action
- C. DataRaptor Extract Action
- D. SOQL Action
- E. Navigation Action

Answer: A,C

Explanation:
According to the OmniScript Action Elements page, a DataRaptor Extract Action can be used to "get data from one or more Salesforce records" and an HTTP Action can be used to "get, save, or delete data through a web application programming interface (API)".

NEW QUESTION # 48
In an OmnoScript, a developer needs to configure a Disclosure element to require user input only if the user already checked a Non-Disclosure Agreement Checkbox.
How should the developer configure the conditional view to meet this requirement?

- A. Set element to optional if false
- B. Set element to require if true
- C. Show element if true
- D. Disable read only if true

Answer: B

Explanation:
Setting the element to require if true allows the developer to configure a Disclosure element to require user input only if a condition is met. In this case, the condition is that the user already checked a Non-Disclosure Agreement Checkbox. The other options are either incorrect or irrelevant for this requirement.

NEW QUESTION # 49
A developer creates a new FlexCardto display customer data and actions, such as updating billing information and changing the contact for the customer account. The FlexCard contains 10 fields and 5 actions.
During testing, several fields display with the correct data, but one of the fieldsshows only the label.
What could cause this?

- A. There are no test parameters configured.
- B. The field is null 0 the Salesforce record.
- C. {recordld} us misspelled in the Data Source Input Map.
- D. The fields have exceeded the maximum number allowed on the card.

Answer: B

Explanation:
According to the FlexCard Designer Overview page, another possible cause of a field showing only the label is that "the field is null on the Salesforce record".

NEW QUESTION # 50
A developer creates an Integration Procedure with a Set Values and a DataRaptor Extract Action that requires AccountId as a key. When the developer previews the Integration Procedure, thedeveloper enters the AccountId correctly and execute the Preview. The developer sees the data extract by the DataRaptor in the Debug Log, but the response is empty.
What is the likely cause of this issue?

- A. The AccountId used for the preview is invalid.
- B. The DataRaptor Action did not have the add response Ro Response JSON property set to true.

- C. A Response Action was not added to the integration Procedure.
- D. The Response cannot be previewed directly.

Answer: C

Explanation:
According to the OmniStudio Developer Guide, "To return a response from an Integration Procedure, add a Response action as the last action in your Integration Procedure." Therefore, the correct answer is C.

NEW QUESTION # 51

......

If you are finding a study material to prepare your exam, our material will end your search. Our Plat-Dev-210 exam torrent has a high quality that you can't expect. I think our Salesforce Certified Omnistudio Developer prep torrent will help you save much time, and you will have more free time to do what you like to do.
