DeutschPrüfung bietet Ihnen eine reale Umgebung, in der Sie sich auf die Salesforce Plat-Con-201 Prüfung vorbereiten. Wenn Sie Anfänger sind oder Ihre beruflichen Fertigkeiten verbessern wollen, wird DeutschPrüfung Ihnen helfen, Ihrem Traum Schritt für Schritt zu nähern. Wenn Sie Fragen haben, werden wir Ihnen sofort helfen. Innerhalb eines Jahres bieten wir kostenlosen Update-

Service.

Salesforce Certified Omnistudio Consultant Plat-Con-201 Prüfungsfragen mit Lösungen (Q23-Q28):

23. Frage

A company implements an integration procedure that is invoked from an OmniScript. The integration procedure includes a recommend to improve performance and address users concerns Which feature should the consultant recommend to improve performance and address users concerns?

- A. Try Catch
- B. Conditions
- C. Chaining
- D. Batch jobs

Antwort: C

Begründung:

The two actions that the consultant should recommend to the project team are replace existing APEX using DataRaptors and HTTPActions, and implement FlexCards and OmniScripts for the front-end. Replacing existing APEX using DataRaptors and HTTPActions would reduce implementation time, as these tools are declarative and do not require coding. Implementing FlexCards and OmniScripts for the front-end would ensure end-user processes are as simple as possible, as these tools provide guided interactions and contextual data. Creating new LWC templates for branding and styling would increase implementation time, as this would require coding and testing. Using existing APEX classes as data sources would not ensure optimal UX, as this would limit the flexibility and scalability of the solution.

24. Frage

A company has a requirement to create a 360° view of their customers using FlexCards. At this company, customer data is stored in Salesforce but also in external legacy systems. A consultant reviews the use cases needed and recommends a FlexCard canvas that contains 5 child FlexCards inside the state of the parent FlexCard.

How many different data sources can be configured using FlexCards in this scenario?

- A. 0
- B. 1
- C. 2
- D. 3

Antwort: B

Begründung:

The number of different data sources that can be configured using FlexCards in this scenario is 6. A FlexCard can have one data source per state, and a state can have multiple child FlexCards, each with its own data source. Therefore, the parent FlexCard can have one data source for its state, and each of the 5 child FlexCards can have a different data source, making a total of 6 data sources

25. Frage

A Salesforce Omnistudio Consultant is validating an Omniscrypt they have developed for a client. The client has specific business requirements that the script must meet.

What is the best way for the consultant to ensure that the Omniscrypt meets the client's business requirements?

- A. Conduct a thorough review of the Omniscrypt, comparing each step with the client's business requirements.
- B. Assume that the Omniscrypt meets the client's business requirements without conducting a review.
- C. Ask the client to review the Omniscrypt with their internal team.
- D. Implement the Omniscrypt without comparing it with the client's business requirements.

Antwort: A

Begründung:

* Conducting a thorough review (C) - The best way to ensure the OmniScript meets the business requirements is to review each

step and compare it with the documented requirements.

* This includes validating the data flow, user interactions, and integration points to make sure the script functions as intended.

* A. Implement the OmniScript without comparing it with the client's business requirements - Skipping the review process can lead to errors and misalignment with business needs.

* B. Assume that the OmniScript meets the client's business requirements without conducting a review - This is risky and unprofessional; assumptions should not replace validation.

* D. Ask the client to review the OmniScript with their internal team - While client feedback is important, the consultant must first conduct their own thorough review before involving the client.

Comprehensive and Detailed In-Depth Explanation: Why not the other options?? Salesforce OmniStudio Reference:

* OmniScript Best Practices & Validation

* OmniScript Testing & Debugging

26. Frage

A company needs to implement new verification processes for contacts in their org. This process relies on three Contact record types: Recruiter, Candidate, and Trainer. The verification process is different for each type of contact. For example, recruiters must pass a background check; trainers must complete mandatory training classes, and candidates must achieve certifications.

Which OmniStudio tools should the consultant recommend to meet these requirements?

- A. Single FlexCard with an Action to invoke an OmniScript
- B. Single OmniStudio Action that invokes separate Omniscritps
- C. Specific FlexCards with Actions for each type of Contact
- **D. Multiple OmniStudio Actions that invoke separate OmniScripts**

Antwort: D

Begründung:

The OmniStudio tools that should be recommended to meet these requirements are single OmniStudio Action that invokes separate Omniscritps. OmniStudio Action can be used to conditionally launch different Omniscritps based on the record type of the contact. Omniscritps can be used to implement the verification processes for each type of contact. Specific FlexCards with Actions for each type of Contact would require creating redundant FlexCards and Actions for each record type. Multiple OmniStudio Actions that invoke separate Omniscritps would require creating redundant Actions for each record type. Single FlexCard with an Action to invoke an Omniscritp would not allow for different verification processes based on the record type.

27. Frage

What is the purpose of a DataRaptor Load?

- A. Load data to an Interface object
- B. Send data to a PDF template
- C. Post data to Salesforce APIs
- **D. Write data to Salesforce objects**

Antwort: D

Begründung:

The purpose of a DataRaptor Load is to write data to Salesforce objects. A DataRaptor Load can map data from an Interface object or a JSON object to one or more Salesforce objects, and perform insert, update, upsert, or delete operations. A DataRaptor Load can also use formulas and functions to transform the data before writing it to Salesforce

28. Frage

.....

Wenn Sie DeutschPrüfung wählen, würden wir mit äußerster Kraft Ihnen helfen, die Salesforce Plat-Con-201 Prüfung zu bestehen. Außerdem bieten wir einen einjährigen kostenlosen Update-Service. Zögern Sie nicht, wählen Sie doch DeutschPrüfung. Er würde die beste Garantie für die Salesforce Plat-Con-201 Zertifizierungsprüfung sein. Fügen Sie doch die Produkte von DeutschPrüfung in Ihren Einkaufswagen hinzu.
