

Exam Oracle 1z0-1073-25 Overview & 1z0-1073-25 Latest Dumps Book

P.S. Free 2026 Oracle 1z0-1073-25 dumps are available on Google Drive shared by ValidDumps: <https://drive.google.com/open?id=1u-jZLI26zI2oRzgEOY9Fat6A92Cv62K0>

Of course, when we review a qualifying exam, we can't be closed-door. We should pay attention to the new policies and information related to the test 1z0-1073-25 certification. For the convenience of the users, the 1z0-1073-25 test materials will be updated on the homepage and timely update the information related to the qualification examination. As a result, the 1z0-1073-25 Test Prep can help users to spend the least time, know the test information directly, let users save time and used their time in learning the new hot spot concerning about the knowledge content.

Oracle 1z0-1073-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Using AI ML Mobile and Other Automation Features: This section of the exam assesses the awareness of Cloud Application Consultants in using AI, machine learning, and automation tools. Candidates should understand the practical value these technologies bring to predictive analytics, mobile usage, and overall operational efficiency within Inventory Management.
Topic 2	<ul style="list-style-type: none"> Implementing Enterprise Structures: This section of the exam measures the knowledge of Oracle Cloud Inventory Consultants and covers the foundational concepts of enterprise structure setup. Candidates must understand the purpose and interaction of components like Item Organizations and Inventory Organizations. It also assesses the ability to configure Inventory Organizations and tailor enterprise structure settings to support business operations efficiently.
Topic 3	<ul style="list-style-type: none"> Implementing Inventory Counts: This domain targets the skills of Warehouse Inventory Controllers and covers all aspects of cycle counting and physical inventory processes. It emphasizes the configuration of ABC classifications, troubleshooting inventory counting processes, and accurate execution of stock audits. Candidates must demonstrate their understanding of how to maintain inventory accuracy through routine and scheduled counts.
Topic 4	<ul style="list-style-type: none"> Implementing Inventory Replenishment: This section tests the ability of Inventory Replenishment Planners to configure and execute automated replenishment strategies. Candidates should understand how to define PAR locations and apply Min-Max planning. It assesses hands-on knowledge in running replenishment plans that maintain inventory levels across different storage locations.
Topic 5	<ul style="list-style-type: none"> Implementing Advanced Inventory Transactions: This part of the exam assesses the skills of Supply Chain Analysts in handling complex inventory flows. It explores advanced scenarios like consignment processes, supply chain orchestration, and back-to-back orders. Candidates must also demonstrate configuration of barcode scanning, product recalls, and support for electronic signatures in compliance environments.

Topic 6	<ul style="list-style-type: none"> • Implementing Inventory Transactions: This domain measures the ability of Inventory Application Developers to manage and execute inventory transactions. It covers the understanding of inventory balances, item availability, and reservation functionalities. Candidates must show proficiency in configuring transaction controls, handling serial and lot control, and managing common transaction types like subinventory transfers and interorganization transfers.
Topic 7	<ul style="list-style-type: none"> • Understanding External Integration: This portion evaluates how System Integration Specialists understand and support integrations between Inventory Management and other Oracle or third-party systems. It includes familiarity with key integration points necessary for streamlined operations and system data consistency.

1z0-1073-25 Latest Dumps Book & New 1z0-1073-25 Test Labs

If you buy 1z0-1073-25 study materials, you will get more than just a question bank. You will also get our meticulous after-sales service. The purpose of the 1z0-1073-25 study materials' team is not to sell the materials, but to allow all customers who have purchased 1z0-1073-25 study materials to pass the exam smoothly. The trust and praise of the customers is what we most want. We will accompany you throughout the review process from the moment you buy 1z0-1073-25 Study Materials. We will provide you with 24 hours of free online services. All our team of experts and service staff are waiting for your mail all the time.

Oracle Inventory Cloud 2025 Implementation Professional Sample Questions (Q29-Q34):

NEW QUESTION # 29

Which three sort criteria are available to pick material for a movement request?

- A. Serial
- B. Lot (*)
- C. Revision (*)
- D. Subinventory (*)

Answer: B,C,D

NEW QUESTION # 30

What does order promising do when the requested date for a sales order is before the infinite availability time fence definition?

- A. Looks for on-hand supply
- B. Promises on the requested date and doesn't check availability
- C. Does a supply chain search (*)
- D. Promises on the requested date and checks availability
- E. Looks for on-hand supply

Answer: D

NEW QUESTION # 31

SIMULATION

Back-to-Back Supply Creation Flows

You can set up Oracle Fusion Cloud applications that support back-to-back fulfillment to trigger supply creation flows (buy, make, transfer, and on hand) after a sales order is entered and scheduled.

Each variant of the back-to-back flow differs in the supply document that's created and the supply execution application in which the document is created. Depending on the source of the item, supply is provided from manufacturing, procurement, or inventory. Then, after the supply is received into the fulfillment warehouse, the back-to-back order is ready for shipment to your customer.

The following table describes the supply creation flows and associated supply document supported for each flow when using back-

to-back fulfillment.

□ Back-to-Back Supply Creation Buy Flow

The supply document for a back-to-back buy flow is a purchase order. Based on supply recommendations from Oracle Global Order Promising, a purchase order is created and reserved against the sales order. When the purchase order is received by the supplier, on hand is created to ship out the back-to-back sales order.

The following figure shows the back-to-back supply creation buy flow.

□

Answer:

Explanation:

Back-to-Back Supply Creation Flows in Oracle Cloud

Back-to-back (B2B) fulfillment in Oracle Fusion Cloud allows organizations to trigger supply creation (Buy, Make, Transfer, or On-Hand Reservation) after a sales order is entered and scheduled. The system dynamically generates supply documents depending on the source of the item and executes supply fulfillment through Oracle Procurement, Manufacturing, or Inventory Management.

1. Overview of Back-to-Back Supply Creation Flows

Each back-to-back flow follows these key steps:

Sales Order Entry & Scheduling - A customer places an order that requires supply creation.

Supply Order Generation - The system determines the best supply source based on predefined sourcing rules.

Supply Execution - The supply is created using procurement (Buy), manufacturing (Make), transfer (Transfer), or existing stock (On-Hand).

Receiving & Reservation - The supply is received and linked to the sales order.

Order Fulfillment - The sales order is shipped to the customer.

2. Back-to-Back Supply Creation Buy Flow (Procurement-Based Fulfillment) The Buy Flow is used when the required item is procured from an external supplier because it is not available in stock or another warehouse.

Step-by-Step Buy Flow Process

Below is the step-by-step breakdown of the Back-to-Back Buy Flow with Oracle Fusion applications involved:

Step 1: Initiate Back-to-Back Sales Order

The customer places a sales order in Oracle Order Management.

The system checks stock availability in Oracle Inventory Cloud.

If no stock is available, Oracle Supply Chain Orchestration (SCO) triggers a supply request.

Oracle Global Order Promising (GOP) determines procurement as the best supply source.

The sales order is scheduled for back-to-back fulfillment.

□ System Action: The system marks the sales order for procurement and creates a supply order.

Step 2: Create Supply Order

Oracle Supply Chain Orchestration (SCO) generates a Supply Order.

The system determines that a Purchase Order (PO) is needed.

A Purchase Requisition is created in Oracle Procurement Cloud.

□ System Action: The system sends a request for procurement.

Step 3: Request Purchase Order (PO)

Oracle Procurement Cloud converts the requisition into a Purchase Order (PO).

The PO is sent to the external supplier.

The PO is linked to the sales order, ensuring that supply is dedicated to fulfilling the order.

□ System Action: The system creates a Purchase Order (PO) and tracks supplier delivery.

Step 4: Receive the Purchase Order (PO)

The supplier delivers the goods to the fulfillment warehouse.

The warehouse team receives the PO in Oracle Receiving.

The received inventory is updated in Oracle Inventory Cloud.

The supply is reserved against the back-to-back demand.

□ System Action: The system marks the received supply as reserved for the sales order.

Step 5: Ship the Back-to-Back Sales Order

The order is picked, packed, and shipped from the warehouse.

Oracle Shipping Execution updates the order status.

An invoice is generated in Oracle Receivables.

The sales order is closed.

□ Final Action: The system completes the order and ships it to the customer.

3. Oracle Fusion Cloud Applications Involved in Back-to-Back Buy Flow

□

4. Benefits of the Back-to-Back Buy Flow

✓ Reduces Inventory Holding Costs - No need to stock large quantities in advance.

✓ Ensures Order-Specific Procurement - Every sales order is directly linked to supply.

- ✓ Automates Procurement & Order Processing - Seamless integration between Oracle modules.
- ✓ Enhances Customer Satisfaction - Quick fulfillment by sourcing products efficiently.
- ✓ Optimizes Supplier Collaboration - Real-time PO creation and tracking with suppliers.

5. Real-World Use Case

Scenario: Electronics Distributor Fulfilling a Large Order

A distributor selling high-end laptops does not keep them in stock but procures them from suppliers only when an order is placed.

Process Flow:

A corporate customer places an order for 50 laptops.

The system checks stock and finds no available inventory.

A Purchase Order is created in Oracle Procurement Cloud and sent to the supplier.

The supplier delivers the laptops to the warehouse.

The laptops are reserved against the sales order.

The laptops are shipped to the customer, and the invoice is generated.

□ Result: The distributor minimizes inventory costs while fulfilling customer demand efficiently.

NEW QUESTION # 32

Which two purposes can be achieved by using an item organization?

- A. Sales catalog definition
- B. Master organization definition
- C. Inventory tracking
- D. Financial tracking

Answer: A,B

NEW QUESTION # 33

What can your supplier invoices, created through spreadsheet upload for consigned inventory, be matched against?

- A. Consumption advice (*)
- B. Receipts
- C. Consignment order
- D. Consignment agreement

Answer: A

NEW QUESTION # 34

.....

Being anxious for the exam ahead of you? Have a look of our 1z0-1073-25 training engine please. Presiding over the line of our 1z0-1073-25 practice materials over ten years, our experts are proficient as elites who made our 1z0-1073-25 learning questions, and it is their job to officiate the routines of offering help for you. And i can say no people can know the 1z0-1073-25 exam braindumps better than them since they are the most professional.
