Sustainable-Investing Real Brain Dumps & Sustainable-Investing Valid Exam Online

Can you imagine that you only need to review twenty hours to successfully obtain the CFA Institute certification? Can you imagine that you don't have to stay up late to learn and get your boss's favor? With Sustainable-Investing study materials, passing exams is no longer a dream. If you are an office worker, Sustainable-Investing Study Materials can help you make better use of the scattered time to review. Just a mobile phone can let you do questions at any time.

CFA Institute Sustainable Investing Certificate (CFA-SIC) Exam Sample Questions (Q128-Q133):

NEW QUESTION # 128

An asset owner's ESG policies need to address how portfolio managers:

- A. assess ESG risk exposures independent of the overall risk management function.
- B. disclose ESG exposures selectively to investors most affected by the exposures.
- C. establish the rationale for ESG assessment.

Answer: C

Explanation:

Asset owners must ensure clarity of purpose: portfolio managers should establish a clear rationale for ESG assessment, such as value creation, risk reduction, or client alignment. This rationale forms the policy's basis.

Selective disclosure (option B) may breach transparency principles, and segregating ESG risk from overall risk management (option C) is generally discouraged. Instead, ESG risk should be integrated holistically with traditional financial risk into the overall risk framework.

NEW QUESTION # 129

An asset owner's ESG policies need to address how portfolio managers:

- A. assess ESG risk exposures independent of the overall risk management function.
- B. disclose ESG exposures selectively to investors most affected by the exposures.
- C. establish the rationale for ESG assessment.

Answer: C

Explanation:

Asset owners must ensure clarity of purpose: portfolio managers should establish a clear rationale for ESG assessment, such as value creation, risk reduction, or client alignment. This rationale forms the policy's basis. Selective disclosure (option B) may breach transparency principles, and segregating ESG risk from overall risk management (option C) is generally discouraged. Instead, ESG risk should be integrated holistically with traditional financial risk into the overall risk framework.

NEW QUESTION # 130

The biggest direct impact of greenwashing most likely relates to:

- A. Greater regulation.
- B. A loss of consumers' trust.
- C. Labor strikes.

Answer: B

Explanation:

Greenwashing-misleading claims about a company's environmental efforts-directly leads to a loss of consumer trust (Option C). Consumers become skeptical of sustainability claims, leading to brand damage and reduced sales.

Companies caught greenwashing (e.g., Volkswagen Dieselgate, H&M's false sustainability claims) suffer reputational and financial losses.

Option A (Labor strikes) can occur due to ESG issues, but greenwashing itself does not directly trigger strikes.

Option B (Greater regulation) is a secondary consequence, but the direct impact is consumer trust erosion.

NEW QUESTION # 131

Which of the following statements about scorecards used to assess ESG factors is most accurate?

- A. Scorecards translate qualitative judgements into numerical scores
- B. The scorecard technique could not be used on private companies
- C. The scorecard technique could not be adapted to scoring countries for sovereign bond analysis

Answer: A

Explanation:

The CFA UK ESG manual explains that scorecards are a customizable tool that allow analysts to translate qualitative insights into structured, numerical assessments. They are particularly useful where third-party ESG ratings are unavailable, such as with private companies or sovereign entities.

"Scorecards can be used to assess ESG risk and opportunity... A custom ESG self-assessment tool that reflects the sector-specific risk issues... is created... These scorecards translate qualitative judgments into numerical scores." Thus, scorecards are flexible tools, usable for both private companies and sovereigns, making option B the most accurate.

NEW QUESTION # 132

Environmental analysis will potentially determine adjustments to:

- A. Valuation multiples only.
- B. Financial forecasts only.
- C. Both financial forecasts and valuation multiples.

Answer: C

Explanation:

Environmental risks and opportunities impact both financial forecasts and valuation multiples (Option C) by:

Adjusting revenue and cost projections (e.g., higher carbon taxes or lower energy costs from renewables).

Affecting valuation multiples, as companies with strong ESG performance often receive higher price-to-earnings (P/E) or lower discount rates due to reduced risk.

Option A (Financial forecasts only) ignores the impact on valuation multiples.

Option B (Valuation multiples only) overlooks how environmental risks affect revenue, costs, and profitability.
