In fact time is money.

## Amazon AWS Certified Developer Associate Exam (DVA-C02) Sample Questions (Q123-Q128):

### NEW QUESTION # 123

A photo-sharing service stores pictures in Amazon Simple Storage Service (S3) and allows application sign-in using an OpenID Connect-compatible identity provider. Which AWS Security Token Service approach to temporary access should you use for the Amazon S3 operations?

- A. Cross-Account Access
- B. SAML-based Identity Federation
- C. Web Identity Federation
- D. AWS IAM users

Answer: C

### NEW QUESTION # 124

A company is developing a web application that allows its employees to upload a profile picture to a private Amazon S3 bucket. There is no size limit for the profile pictures, which should be displayed every time an employee logs in. For security reasons, the pictures cannot be publicly accessible. What is a viable long-term solution for this scenario?"

- A. Generate a presigned URL when a picture is uploaded Save the URL in an Amazon DynamoDB table Return the URL to the browser when the employee logs in
- B. Encode a picture using base64 Save the base64 string in an Amazon DynamoDB table Allow the browser to retrieve the string and convert it to a picture
- **C. Save the picture's S3 key in an Amazon DynamoDB table Create an Amazon S3 VPC endpoint to allow the employees to download pictures once they log in.**
- D. Save the picture's S3 key in an Amazon DynamoDB table. Use a function to generate a presigned URL every time an employee logs in. Return the URL to the browser.

**Answer: C**

#### NEW QUESTION # 125

You are writing to a DynamoDB table and receive the following exception: "ProvisionedThroughputExceededException". though according to your Cloudwatch metrics for the table, you are not exceeding your provisioned throughput.

What could be an explanation for this?

- **A. You're exceeding your capacity on a particular Hash Key**
- B. You haven't configured DynamoDB Auto Scaling triggers
- C. You're exceeding your capacity on a particular Sort Key
- D. You're exceeding your capacity on a particular Range Key
- E. You haven't provisioned enough DynamoDB storage instances

**Answer: A**

Explanation:

#### NEW QUESTION # 126

A set of APIs are exposed to customers using the Amazon API Gateway. These APIs have caching enabled on the API Gateway. Customers have asked for an option to invalidate this cache for each of the APIs.

What action can be taken to allow API customers to invalidate the API Cache?

- **A. Ask customers to invoke an AWS API endpoint which invalidates the cache.**
- B. Ask customers to pass an HTTP header called Cache-Control: max-age=0.
- C. Ask customers to add a query string parameter called "INVALIDATE\_CACHE" when making an API call.
- D. Ask customers to use AWS credentials to call the InvalidateCache API.

**Answer: A**

#### NEW QUESTION # 127

A user has created a snapshot of an EBS volume. Which of the below mentioned usage cases is not possible with respect to a snapshot?

- A. Launch an instance
- B. Mirroring the volume from one AZ to another AZ
- C. Increase the size of the volume
- **D. Decrease the volume size**

**Answer: D**

Explanation:

The EBS snapshots are a point in time backup of the volume. It is helpful to move the volume from one AZ to another or launch a new instance. The user can increase the size of the volume but cannot decrease it less than the original snapshot size.
