

# 100% Pass Quiz 2026 High-quality Saviynt SCAIP Valid Exam Guide

Candidates all around the globe use their full potential only to get Saviynt SCAIP certification. Once the candidate is a Saviynt certified, he gets multiple good career opportunities in the Saviynt sector. To pass the SCAIP Certification Exam a candidate needs to be updated and reliable Saviynt Certified Advanced IGA Professional (Level 200) (SCAIP) prep material.

If you have any doubts about the SCAIP pdf dump, please feel free to contact us, our team I live 24/7 to assist you and we will try our best to satisfy you. Now, you can download our SCAIP free demo for try. If you think our SCAIP study torrent is valid and worthy of purchase, please do your right decision. EduDump will give you the best useful and latest SCAIP Training Material and help you 100% pass. Besides, your information is 100% secure and protected, we will never share it to the third part without your permission.

## Saviynt Realistic SCAIP Valid Exam Guide Free PDF Quiz

Some other top features of EduDump SCAIP exam questions are real, valid, and updated Saviynt Certified Advanced IGA Professional (Level 200) (SCAIP) exam questions, subject matter experts verified Saviynt Certified Advanced IGA Professional (Level 200) (SCAIP) exam questions, free EduDump SCAIP Exam Questions demo download facility, three months updated EduDump SCAIP exam questions download facility, affordable price and 100 percent Saviynt SCAIP exam passing money back guarantee.

## Saviynt Certified Advanced IGA Professional (Level 200) Sample Questions (Q47-Q52):

### NEW QUESTION # 47

An EIC Administration has a requirement to configure a separate password policy for service accounts along with the password policy for regular accounts. How can this be achieved in EIC?

- A. Define a separate Password Policy for Service Account and select the checkbox Password Policy Service Account field under Password Policy configurations
- **B. Define a separate Password Policy for Service Account and select it in Policy Rule Service Account field under Security System**
- C. Only one Password Policy can be defined in the Security System which applies to both regular and service accounts
- D. Define a separate Password Policy for Service Account and select it in Policy Rule Service Account field under Global Configurations

**Answer: B**

Explanation:

In Saviynt EIC, password management is highly configurable, allowing organizations to define separate password policies for different account types, including service accounts and regular user accounts. This requirement is achieved by creating a dedicated password policy specifically for service accounts and associating it appropriately within the system.

Option A is correct because Saviynt allows administrators to define a separate Password Policy for Service Accounts and map it using the Policy Rule Service Account field under the Security System configuration.

This ensures that when service account operations such as password resets or provisioning occur, the system enforces the correct policy distinct from regular user accounts.

Option B is incorrect since Saviynt supports multiple password policies and does not restrict to a single policy. Option C is incorrect because simply selecting a checkbox in password policy configuration does not link it to service account usage. Option D is incorrect as Global Configurations do not directly assign password policies for service accounts at the execution level.

Thus, configuring and mapping the policy at the Security System level ensures correct enforcement for service accounts.

#### NEW QUESTION # 48

Which of the following scenarios are True to trigger Technical Rule Execution in EIC? (Multi-Select)

- A. The existing user is updated and satisfies a user update rule with action as Re-run provisioning rules
- B. A new user is registered or created from the UI and the condition in the rule matches
- C. When users are imported through Import Job and the condition in the rule matches
- D. When a user is deleted and the condition in the rule matches

**Answer: A,B,C**

Explanation:

In Saviynt EIC, Technical Rules are triggered based on lifecycle events related to user creation, updates, and imports, provided the defined conditions evaluate to true. The correct answers are B, C, and D.

Option B is correct because during Import Jobs, when users are brought into Saviynt from authoritative sources, Technical Rules are evaluated, and if conditions match, they are executed. This is a common mechanism for provisioning access during onboarding.

Option C is also correct since when a new user is created via the UI, Technical Rules can be triggered if the user attributes meet the rule conditions. This ensures consistent provisioning regardless of how users are created.

Option D is correct because when an existing user is updated, and a User Update Rule is configured to re-run provisioning rules, it can trigger associated Technical Rules again.

Option A is incorrect because deletion events typically trigger deprovisioning workflows rather than standard Technical Rule execution.

Thus, Technical Rules are triggered during import, creation, and update events—not deletion.

#### NEW QUESTION # 49

A customer requires provisioning of time-bound access through roles that should be revoked automatically after certain days from the day of assignment. What option in EIC will help the customer achieve this requirement?

- A. Configure Dynamic Attributes for Roles
- B. Configure an Emergency Access Role
- C. Configure an Enterprise Role and enable timestamp under Role Details
- D. Enable Time-bound for Roles in Global Configurations > Roles

**Answer: D**

Explanation:

In Saviynt EIC, time-bound access is a standard feature used to ensure that access granted to users is automatically revoked after a defined duration. This requirement is fulfilled by enabling the time-bound configuration for roles under Global Configurations > Roles (Option B). Once this setting is enabled, users can request roles with a specified start and end date, and Saviynt automatically deprovisions the access when the validity period expires.

This capability is essential for enforcing least privilege and compliance requirements, as it eliminates the need for manual revocation and reduces the risk of lingering access. The system leverages scheduled jobs to monitor and remove expired entitlements or roles.

Option A is incorrect because Dynamic Attributes are mainly used for form customization and conditional logic, not for enforcing access expiration. Option C (Emergency Access Role) is designed for temporary elevated access but follows a different configuration pattern and use case. Option D is not a valid standard approach for enabling automatic revocation.

Thus, enabling time-bound roles in global configuration is the correct and scalable solution.

### NEW QUESTION # 50

What are the different features available under Role Intelligence? (Multi-Select)

- A. Role Governance
- B. Role Mining
- C. Entitlement Discovery
- D. Role-Access Mismatches

**Answer: A,B,C**

Explanation:

In Saviynt EIC, Role Intelligence is a key component of Identity Governance that focuses on analyzing, optimizing, and managing roles effectively. It provides multiple features that help organizations improve role design and maintain compliance.

Role Governance (A) is a core feature that ensures roles are properly defined, reviewed, and certified. It helps maintain accountability and ensures that roles align with business policies.

Entitlement Discovery (B) enables identification and analysis of entitlements across applications, helping administrators understand what access exists and how it can be grouped into meaningful roles. This is essential for building accurate and efficient role models.

Role Mining (C) is one of the most important capabilities, allowing organizations to analyze user access patterns and automatically suggest roles based on common entitlement combinations. This improves role engineering and reduces manual effort.

Option D (Role-Access Mismatches) is not considered a standard feature under Role Intelligence; it is more aligned with analytics or audit findings rather than a core Role Intelligence function.

Therefore, the correct answers are A, B, and C, which represent the foundational features of Role Intelligence in Saviynt.

### NEW QUESTION # 51

In EIC Service Account Management, when the current owner is terminated, how does EIC identify the new owner?

- A. The new owner is identified based on SQL query configured in Global Configuration
- B. The new owner is defined in the Service Account attribute: "Owner On Terminate"
- C. The new owner is defined in the Manage Owners Page
- D. The new owner is defined in the current owner's user attribute: "Owner On Terminate"

**Answer: D**

Explanation:

In Saviynt EIC, Service Account Management includes mechanisms to ensure continuity of ownership when an account owner leaves the organization. When a user is terminated, the system automatically determines the new owner based on a predefined configuration.

The correct approach is through the user attribute "Owner On Terminate" (Option B). This attribute is maintained at the user level and specifies who should inherit ownership of service accounts if the current owner is terminated. During the termination process, Saviynt checks this attribute and transfers ownership accordingly, ensuring there is no orphaned service account and maintaining accountability.

Option A is incorrect because SQL queries in Global Configuration are not typically used for ownership reassignment in this context.

Option C (Manage Owners Page) is used for manual updates, not automatic reassignment upon termination. Option D is incorrect because the ownership transfer logic is driven by the user attribute, not a service account attribute.

Thus, using the "Owner On Terminate" user attribute ensures automated, policy-driven ownership transitions in Saviynt.

### NEW QUESTION # 52

.....

Improvement in SCAIP science and technology creates unassailable power in the future construction and progress of society. As we can see, the rapid progression of the whole world is pushing people forward and the competitiveness among people who are fighting on the first line is growing intensely. Numerous advantages of SCAIP training materials are well-recognized, such as 99% pass rate in the exam, free trial before purchasing, secure privacy protection and so forth. From the customers' point of view, our SCAIP Test Question put all candidates' demands as the top priority. We treasure every customer' reliance and feedback to the optimal SCAIP practice test.

**Valid SCAIP Test Camp:** <https://www.edudump.com/exams/Saviynt/SCAIP/>

Therefore, you can rest assured that we can solve any problem you have with our SCAIP exam questions, We invited a group of professional experts who have been dedicated to compile the most effective and accurate SCAIP test bootcamp for you, As long as you have tried your best to figure out the questions in our SCAIP latest vce torrent during the 20 to 30 hours, and since all of the key points as well as the latest question types are concluded in our SCAIP free vce dumps, it is really unnecessary for you to worry about the exam any more, This SCAIP pass guide will provide you with all the necessary information to you need for SCAIP passing score.

Software Leadership: A Guide to Successful Software SCAIP Valid Exam Guide Development, Final Cut Pro X has several tools that let you sort, sift, filter, and find the perfect shot, Therefore, you can rest assured that we can solve any problem you have with our SCAIP Exam Questions.

## Are you ready to prove your technical knowledge and expertise with the Saviynt SCAIP certification exam?

We invited a group of professional experts who have been dedicated to compile the most effective and accurate SCAIP test bootcamp for you, As long as you have tried your best to figure out the questions in our SCAIP latest vce torrent during the 20 to 30 hours, and since all of the key points as well as the latest question types are concluded in our SCAIP free vce dumps, it is really unnecessary for you to worry about the exam any more.

This SCAIP pass guide will provide you with all the necessary information to you need for SCAIP passing score, Under the instruction of our SCAIP exam torrent, you can finish the preparing period in a very short time and even pass SCAIP the exam successful, thus helping you save lot of time and energy and be more productive with our Saviynt Certified Advanced IGA Professional (Level 200) prep torrent.
